

# MONTANA BOARD OF INVESTMENTS

## Department of Commerce

2401 Colonial Drive, 3<sup>rd</sup> Floor

PO Box 200126

Helena, MT 59620-0126

[www.investmentmt.com](http://www.investmentmt.com)

## The Honorable Judy Martz, Governor

### BOARD MEMBERS

◆ ***Richard Anderson, Chairman***

Building Contractor/Developer

Dick Anderson Construction

Helena

Term Ending 01/01/2005

◆ ***Douglas Bardwell***

Retired

Western Fed. Savings Bank

Missoula

Term Ending 01/01/2003

◆ ***Joel T. Long***

Business Executive

JTL Group, Inc.

Billings

Term Ending 01/01/2005

◆ ***Dennis Beams***

Senior Vice President

Glacier Bank

Kalispell

Term Ending 01/01/2005

◆ ***Karen Fagg***

Business Executive

HKM Engineering, Inc.

Billings

Term Ending 01/01/2003

◆ ***Maureen Fleming***

Professor of Management

School of Business Administration

University of Montana, Missoula

Term Ending 01/01/2003

◆ ***Tim Ryan***

State Director

USDA Rural Development

Bozeman

Term Ending 01/01/2005

◆ ***Jay Klawon***

Investment Representative

Edward Jones Investments

Hamilton

Term Ending 01/01/2005

◆ ***Calvin Wilson***

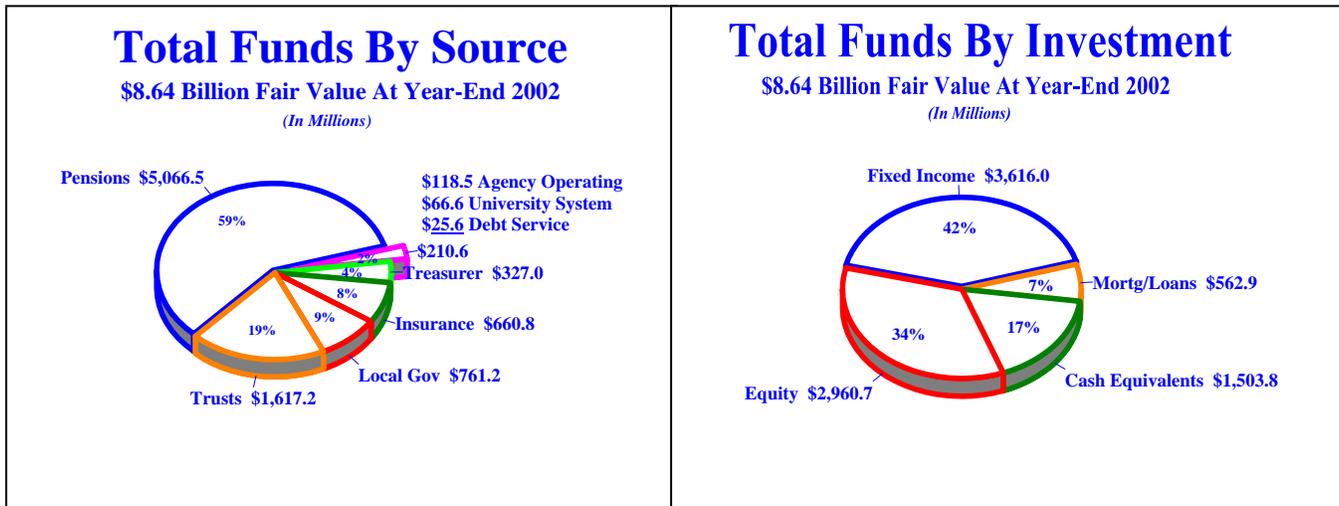

Attorney

Tribal Court

Busby

Term Ending 01/01/2003

## TOTAL FUND

### Total Fund By Source And Asset Allocation At Fair Value On June 30, 2002

Fund Type	STIP \$	MTCP \$	Fixed \$ (1)	Mortgage Loans	Other Equity (2)	Total
Pensions	116,578,596	1,881,109,520	1,725,096,997	330,437,617	1,013,318,041	5,066,540,771

7 Year Annualized	7.63	LB Aggregate Bond	7.28	0.35
5 Year Annualized	7.79	LB Aggregate Bond	7.57	0.22

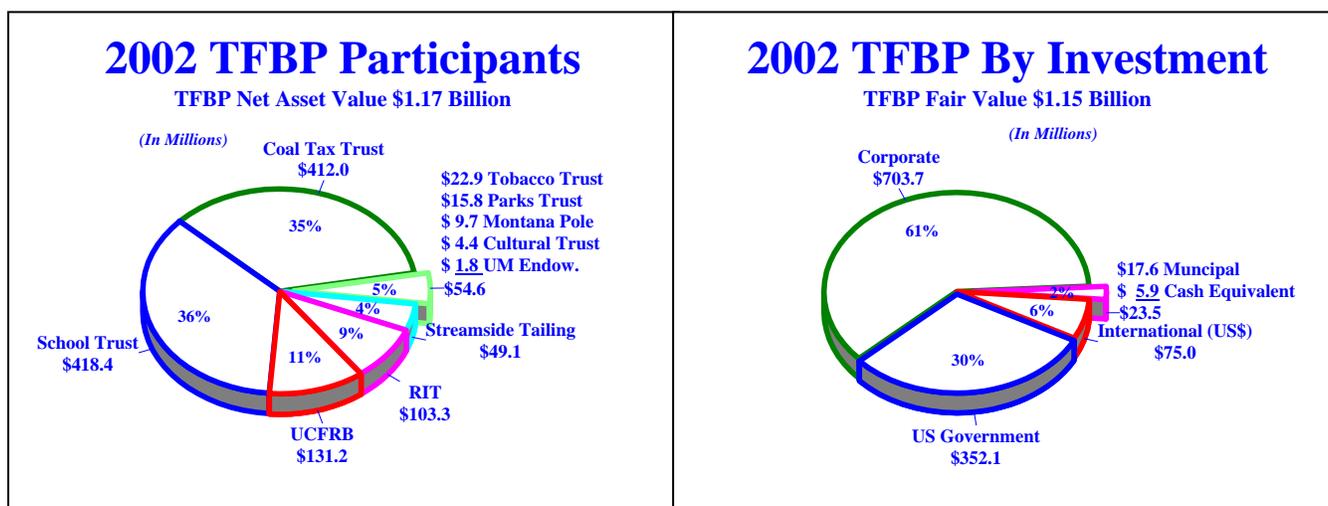

### **HISTORY**

On April 1, 1995, all fixed-income investments held by the nine pension funds were transferred to the newly-created Retirement Funds Bond Pool (RFBP). Each pension fund received shares in the pool equal in value to the fair value of their fixed-income portfolio on the date of the transfer.

### **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Diversified portfolio, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.
- Above average risk tolerance, especially long-term investment risk.
- Low liquidity requirements, except for investment purposes.
- Securities purchased are investment-grade as per Standard & Poor's or Moody's rating services with maturities not exceeding 40 years.
- Mortgage-backed securities purchased must be backed by the US Government or its agencies.
- All securities must pay in US Dollars.

## **HISTORY**

On October 1, 1995, all fixed-income investments held by the state's major trust funds were transferred to the newly-created Trust Funds Bond Pool (TFBP). Each trust fund received shares in the pool equal in value to the fair value of their fixed-income portfolio on the date of the transfer.

## **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Diversified portfolio, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.
- Above average risk tolerance, especially long-term investment risk.
- Low liquidity requirements, except for investment purposes.
- Securities purchased are investment-grade as per Standard & Poor's or Moody's rating services with maturities not exceeding 40 years.
- Mortgage-backed securities purchased must be backed by the US Government or its agencies.
- All securities must pay in US Dollars
- Current income is important since it is distributed to participants.

(1) Net Asset Value

The STIP portfolio is listed on Page B-26 in Appendix B.

## Annual STIP Yields

(In % Net of Management Fees)

**HISTORY** - The Short Term Investment Pool (STIP), created in 1974, provides participants access to a short-term money market fund. Shares are fixed at \$1.00, fractional shares may be purchased, and participants may buy or sell shares with one business day's notice. Income is distributed on the first day of the month.

The graph at left reflects the yields to STIP participants based on distributed income after management fees are deducted. The table below reflects STIP total rate of return prior to the deduction

of management fees. The return is compared to the benchmark against which performance is measured.

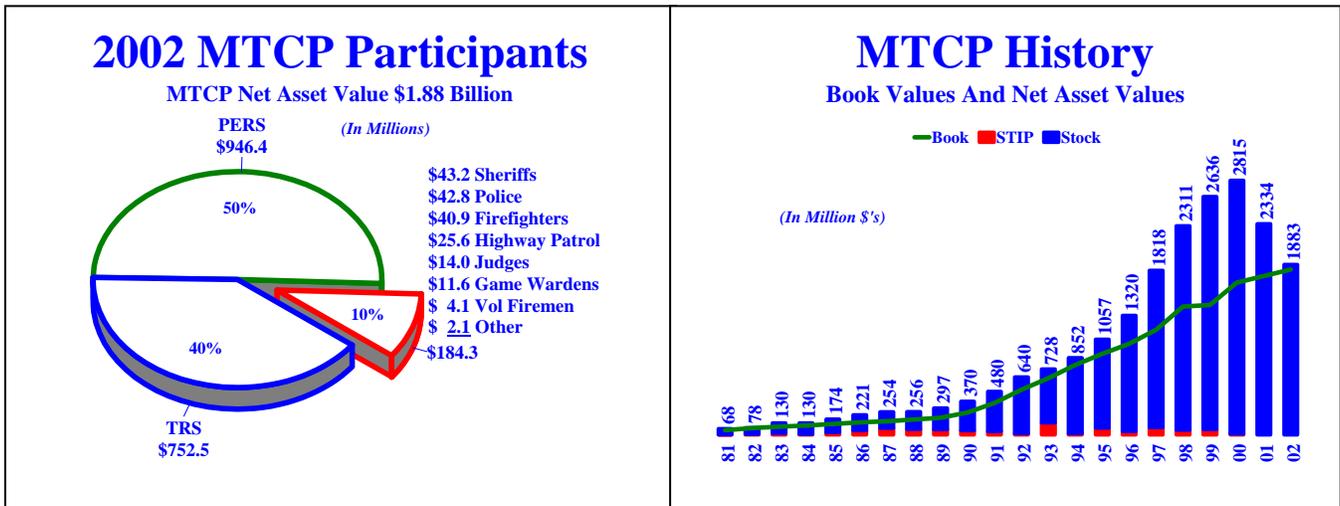

### STIP Total Rates of Returns Versus Benchmark

<u>Year</u>	<u>% Return</u>	<u>Benchmark</u>	<u>Benchmark % Return</u>	<u>Return +/- Benchmark</u>
2002	2.86	91-Day T Bill x 105%	2.58	0.28
2001	6.66	91-Day T Bill x 105%	5.92	0.74
2000	5.97	91-Day T Bill x 105%	5.58	0.39
1999	5.47	91-Day T Bill x 105%	4.95	0.52
1998	5.92	91-Day T Bill x 105%	5.49	0.43
1997	5.73	91-Day T Bill x 105%	5.52	0.21
1996	5.82	91-Day T Bill x 105%	5.70	0.12
7 Year Annualized	5.48	91-Day T Bill x 105%	5.10	0.38

### INVESTMENT OBJECTIVE/CONSTRAINTS

- Diversified money market fund, producing a total rate of return 105 percent of the 91-Day US Treasury Bill.
- Highly liquid portfolio.
- Maximum security maturity of 397 days.
- Participants include state agencies, local governments and school districts.
- Risk tolerance is low.

## MTCP Performance History

Total Rates Of Return Versus S & P 500

(Annualized Percentage Increases)

**HISTORY** - The Montana Stock Pool (MTCP), created in 1981 by the transfer of all common stocks held by PERS and TRS into the pool, permits eligible funds to invest in common stock. Cash dividends are distributed monthly to pool participants, while all capital gains and losses are retained in the pool.

The graph at left depicts the MTCP total rate of return since the pensions first purchased common stock. The table below shows yearly MTCP performance relative to the benchmark S & P 500 Index against which its performance is measured.

### MTCP Ten Largest Holdings as of June 30, 2002

<u>Company</u>	<u>Shares Held</u>	<u>Fair \$ Value</u>	<u>% of MTCP</u>

5 Year Rolling Average	<u>1.55</u>	S & P 500	<u>3.66</u>	<u>(2.11)</u>

### INVESTMENT OBJECTIVES/CONSTRAINTS

- Diversified common stock portfolio, producing a total rate of return exceeding the S & P 500 index over a rolling five-year period.
- Average to below average risk tolerance.
- Securities held limited to issues ratified by the Board
- Minimum S & P 500 Index futures balance of \$3.0 million for investment liquidity.

## MONTANA INTERNATIONAL STOCK POOL (MTIP)

**HISTORY** - The Montana International Equity Pool (MTIP) was created during 1997 when the nine pension funds purchased pool shares to fund investments in international stock. Cash dividends, interest and related income currency gains/losses are distributed monthly. There are four fund managers within the pool:

- Internally managed
- Pyrford International
- Schroder Investment Management
- SG Pacific Asset Management

**HISTORY** – The Montana Private Equity Pool was created on May 1, 2002 when all private equity investments held by the nine retirement funds were transferred to the pool. Each pension fund received shares in the pool equal to the fair value of their private equity investments. Each fund also transferred cash to the pool to provide for capital calls by the private equity managers.

Private equity investments are participations in non-publicly traded equity ownership of a fund or operating company either directly or more commonly through a partnership. Montana uses a fund of funds manager, Adams Street Partners, to offer multiple-manager vehicles with investments in more than one partnership and supplements the fund of funds investments with direct investments in selective direct private equity partnerships. As of June 30, 2002, five private equity managers had been contracted to manage the pool's assets

**Adams Street Partners** – A fund-of-fund investment manager, formerly, Brinson Partners that offers a wide range of private equity capital investment alternatives.

**Kolberg, Kravis & Roberts** - A global leveraged-buyout firm organized in 1975 that seeks investment opportunities in a wide-range of industries.

**Madison-Dearborn Partners** - A private equity investment firm founded in 1992 by the Principals of First Chicago Venture capital. The firm seeks growth equity transactions and management buyout opportunities in a wide range of industries.

**Welsh Carson Anderson Stowe** - A leveraged-buyout firm founded in 1979 focused on information services, communications and healthcare industries.

**Lexington Partners** - A global private equity firm founded in 1994 that specializes in secondary investments, which provide liquidity to owners of interests in domestic and international private equity limited partnerships. The firm also makes equity co-investments alongside private equity sponsors and invests in newly-formed private equity partnerships.

The types of investments made by private equity managers generally fall into the following categories:

**Private Equity** – Private equity investments in funds or operating companies in an asset class other than cash, stocks, or fixed income securities and real estate.

**Venture Capital** – Equity or equity-like investments in companies that have undeveloped or developing products or revenue.

**Leveraged Buy-Outs** – Equity investments in public or private companies that purchase a significant portion or majority control of the company.

**Mezzanine** – Investments in the subordinated debt and/or equity of privately owned companies. The debt holder participates in equity appreciation through conversion features, such as rights, warrants, and/or options.

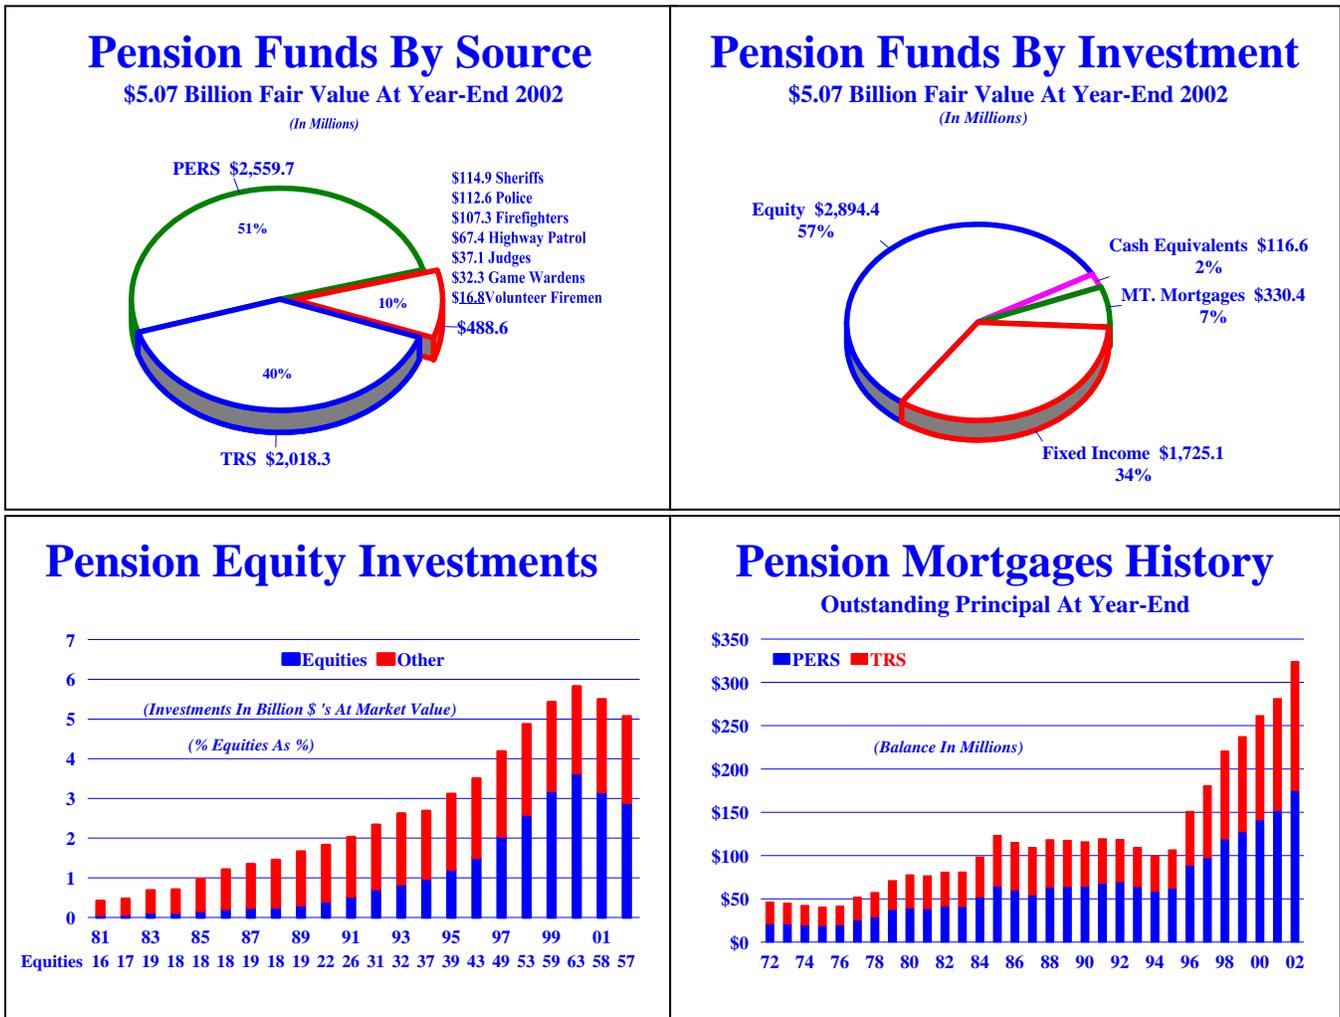

**Special Situations** – Includes: 1) investments in the exploration for oil and/or gas reserves or in the development of proven reserves; 2) investments in land to harvest timber; and 3) investments that have a special component usually related to geographical, economic, or social issues sometimes referred to as Economically Targeted Investments.

**Secondary Investments** – Investments in a previously-owned limited partnership or investment in previously owned limited partnership via a secondary fund.

**Distressed Debt** – Public and private debt of companies that appear unlikely to meet their financial obligations but are attractive to investors, not for repayment of interest and principal which are unlikely to be paid, but for the claim placed on the firm's value by unpaid creditors.

The MPEP portfolio is listed on Page B-54 in Appendix B

# PENSION FUNDS

The Board has increased pension investments in equities in recent years. The current target is 65 percent, which was nearly achieved in 2000. The steep drop in equity prices reduced the equity allocation to 58 percent in 2001 and 57 percent in 2002. The stock market decline decreased the total market value of the pension funds from \$5.82 billion in 2000 to \$5.07 billion in 2002 as shown in the graph above. The Board has also significantly increased pension investments in Montana mortgages. Mortgage investments increased from \$106.7 million in 1995 to \$324.0 million in 2002 as shown in the graph above.

## PENSION INVESTMENT OBJECTIVES/CONSTRAINTS

- Each of the nine pension funds is managed separately.
- Long-term, tax-exempt accounts with a time horizon well beyond normal market cycles.
- Low liquidity requirements, except for investment purposes.
- Increasing equity exposure as market conditions permit.
- Broadly diversified portfolio of assets, producing a total rate of return exceeding the rate of inflation (Consumer Price Index) by 3 percent over any five-year rolling period, while outperforming market indices for each asset class over any five-year rolling period.

## OTHER RETIREMENT SYSTEMS

The seven other retirement funds are administered by the Public Employees Retirement Board, the same Board that administers the Public Employees Retirement System.

These smaller systems participate with the Public Employees Retirement Fund and the Teacher's Retirement Fund in all investment pools managed by the Board, but do not participate in the Montana Residential Mortgage Program.

**HISTORY** - Article IX, Section 5 of the state Constitution requires that 50 percent of all coal severance tax revenues be deposited in a permanent trust fund (Trust), in which the principal "shall forever remain inviolate unless appropriated by a three-fourths vote of each house" of the legislature. The Board is encouraged to invest up to 25 percent of the Trust in Montana businesses.

The legislature has partitioned the Trust into several sub-funds. The Permanent Fund was initially established when the Trust was created, while the Severance Tax and School Bond Funds, created later, provide debt service guarantees and are invested solely in STIP and TFBP, respectively. The Treasure State Endowment Fund was created July 1, 1993, with a \$10.0 million transfer from the Permanent Fund. From July 1, 1993 through June 30, 1999 one-half of the coal severance tax earmarked for the Trust was deposited in the Permanent Fund and the remaining 50 percent was deposited in the Treasure State Endowment Fund.

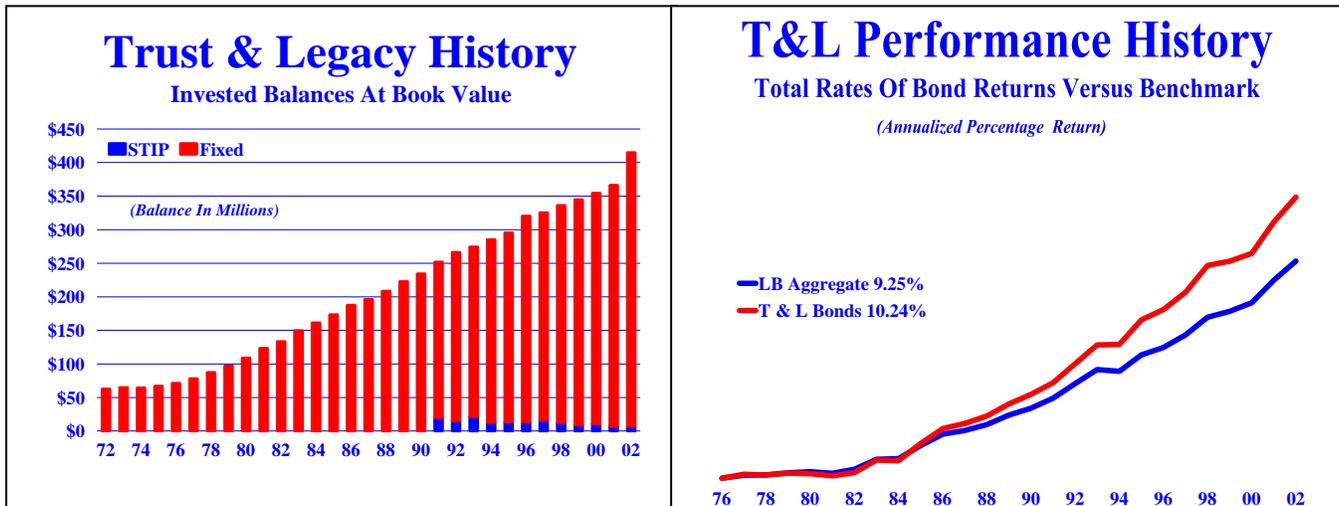

Effective July 1, 1999, a new "Treasure State Endowment Regional Water Fund" sub-fund was created and 25 percent of Trust revenues dedicated to that account. The remaining 75 percent of revenues is deposited in the Treasure State Endowment Fund. Under current law, the Permanent Fund no longer receives Trust revenues.

Income from the Permanent Fund and the two Bond Funds is deposited in the Permanent Fund Income Fund where it is swept periodically to the state General Fund. All sub-funds, except the income fund, are protected by the constitution and may be appropriated only by a three-fourths vote of each house of the legislature. Income from the Treasure State Endowment is appropriated by the Legislature for local government infrastructure projects. Treasure State Endowment Regional Water Fund income is appropriated by the Legislature for local government water projects.

### **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Long-term, tax-exempt account with a time horizon well beyond normal market cycles.
- Constitution does not permit equity investments.
- Low liquidity requirements, except for investment purposes and funding in-state loans.
- Current income is important because it is all appropriated by the Legislature.
- Broadly diversified portfolio of fixed-income securities, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.

(1) An Index Composite paralleling the Fund's asset allocation at market value

**HISTORY** - Article X, Sections 2 and 3 of the state Constitution requires that all royalties and other proceeds received from school lands granted to the state under federal enabling legislation be deposited in the Trust and Legacy Fund, where it shall forever remain inviolate and guaranteed by the state against loss or diversion.

### **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Long-term, tax-exempt account with a time horizon well beyond normal market cycles.
- Constitution does not permit equity investments.
- Low liquidity requirements, except for investment purposes.
- Current income is important because 95 percent is appropriated by the Legislature.
- Broadly diversified portfolio of fixed-income securities, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.

## RESOURCE INDEMNITY TRUST FUND

**HISTORY** - Article IX, Section 2 of the state Constitution requires that revenues from the Resource Indemnity Tax on minerals be deposited in the Resource Indemnity Trust Fund, the principal of which "shall forever remain inviolate" until the principal reaches \$100 million.

The fund's book value reached \$100.0 million in fiscal 2002.

## **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Long-term, tax-exempt account with a time horizon well beyond normal market cycles.
- Constitution does not permit equity investments.
- Liquidity requirements are low, except for investment purposes.
- Current income is important because it is all appropriated by the Legislature.
- Broadly diversified portfolio of fixed-income securities, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.

## COAL TAX PARKS/CULTURAL TRUST FUNDS

**HISTORY** - A portion of the coal severance tax is dedicated to a Parks Trust Fund and a Cultural Trust Fund (Trusts). Investment income generated by the Trusts is appropriated by the legislature to acquire/operate state parks and to fund cultural and aesthetics projects. The Trusts are statutorily created and may be eliminated by legislative action. Until 1992 coal severance taxes were deposited in one account with two-thirds of the investment income dedicated to state parks and one-third dedicated to cultural projects. Effective 1994, the Trusts' principal was split into two separate accounts - one specifically for parks and the other for cultural projects - with each

account generating its own investment income. The Trusts were invested in STIP exclusively through 1983, but since 1984 have been invested both in STIP and fixed-income securities. The 1997 Legislature appropriated \$3.9 million of Cultural Trust principal to Purchase Historical Properties.

## **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Intermediate to long-term tax-exempt accounts with time horizons well beyond normal market cycles.
- Constitution does not permit equity investments
- Low liquidity requirements, except for investment purposes.
- Current income is important because it is all appropriated by the Legislature

## OTHER TRUST FUNDS

**Fish, Wildlife, and Parks (FWP) Mitigation Trust** - expendable trust funds fish and wildlife mitigation/enhancements.

**Abandoned Mine Trust** - expendable trust funds abandoned mine reclamation.

**FWP Real Property Trust** - non-expendable trust funds operations, development, and maintenance of FWP real property.

**Weed Control Trust** - non-expendable \$2.5 million trust funds noxious weed control.

**Wildlife Habitat Trust** - funds acquisition/development/maintenance of wildlife habitat.

**Montana Post and Pole Trust** - funds environmental cleanup of the former Montana Pole and Treatment Plant in Butte.

**Guaranteed Student Loan** - the federal portion of student loan monies.

**The UCFRB Funds** represent proceeds from state settlements with the Atlantic Richfield Company for restoration of the Upper Clark Fork River Basin.

**Streamside Tailing Funds** are derived from a consent decree between the state and the Atlantic Richfield Company for remedial treatment of the Silver Bow Creek/Butte area.

**Tobacco Trust** – The nation’s largest tobacco companies are required to pay at least \$205.0 billion over the next 25 years to the states. Forty percent of Montana’s share is deposited in a trust fund.

**Zortman/Landusky Funds** were paid by the Pegasus mining company and its insurer to provide long-term water treatment at the closed Zortman and Landusky mines near Malta.

## **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Short, intermediate, and long-term, tax-exempt accounts.
- Limited by Constitution/law to fixed-income type securities and investments in STIP.
- Each fund has a separate investment policy statement setting forth investment objectives, time horizons, liquidity needs and client preferences.

## STATE COMPENSATION INSURANCE FUND

**HISTORY** - The State Compensation Insurance Fund (State Fund) provides workers' compensation and occupational disease insurance for claims arising from injuries occurring on or after July 1, 1990. Effective on that date, the state's workers' compensation fund was divided into two funds with separate liabilities. The "old" fund retained all financial obligations for claims for injuries occurring prior to July 1, 1990, while the "new" fund assumed claim obligations for injuries occurring after that date.

Annual	7.83	7.31	0.51

The historical returns on bonds held in the State Fund are shown at the left compared to the Lehman Government/Credit Intermediate Term Index.

**INVESTMENT OBJECTIVES/CONSTRAINTS**

- Short to intermediate-term, tax-exempt account with maximum securities maturity of approximately ten years.
- Maximize total rate of return through a broadly diversified portfolio of fixed-income and domestic common stock securities.
- The bond portfolio to exceed the Lehman Government/Credit Intermediate Term Index over a five-year moving average. However, client preference to take less credit risk than the Index by reducing exposure to corporate bonds rated less than A- by S&P and A3 by Moody's to 10.0 percent
- Domestic stock to track the S & P 500 Index on a yearly basis.
- Minimum of 4.0 percent of the fund in STIP to pay claims on a daily basis.

## OTHER INSURANCE FUNDS

**Old Workers - Compensation Fund** - pays claims for all injury claims occurring prior to July 1, 1990.  
**Group Benefits** - created in 1981, provides health and life insurance to non-university state employees.  
**Subsequent Injury** - provides benefits to workers who are vocationally handicapped and whose Workers' Compensation benefits have expired.  
**Agency Insurance** - established in 1978, provided state agencies with insurance against bodily injury and property damage claims. The account held in STIP in 2001 was closed during 2002..  
**Hail Insurance** - insures crop from hail damage. The entire account is currently held in STIP.  
 Other insurance programs whose investments are held solely in STIP include:

<b>University Group Benefits</b> .....	<b>\$7,705,400</b>

Other Insurance Portfolios are listed beginning on Page A-10 of Appendix A.

**INVESTMENT OBJECTIVES/CONSTRAINTS**

- Equity investments not permitted by the state Constitution.
- Group Benefits is a short to intermediate-term, tax-exempt fund with a maximum
- Securities maturity of five years, a low risk tolerance, and high liquidity requirement.
- Agency and Hail Insurance are short to intermediate-term, tax-exempt fund with a maximum securities maturity of two years, a low risk tolerance, and a very high liquidity requirement. They are currently invested entirely in STIP.
- Subsequent Injury is a short to intermediate-term, tax-exempt fund, a low risk tolerance, and a high liquidity requirement.
- Investment income is important to all these funds, because income may be used to pay claims.

## TREASURER'S FUND

**HISTORY** - The Treasurer's Fund (Fund) is comprised of surplus cash in all state accounts that do not retain their investment earnings. All earnings are deposited in the State General Fund. State law authorizes the Board to determine the amount of surplus cash in the Fund to be invested and the type of investments to be made. Invested balances at book value vary widely due to varying levels of excess cash in the state's General Fund and other accounts comprising the Fund. This fund has been a major investor in STIP since 1974 when STIP was created. The "Other" category depicted in the graph consists of US Government securities and Repurchase

Agreements.

### **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Maximize income, while satisfying cash flow requirements of the State Treasurer.
- Safety of principal and liquidity are important investment constraints.
- Low risk tolerance prevents investment in corporate securities.
- US Government securities restricted to a maximum maturity of three years.
- Due to safety of principal, liquidity, and short-term investment time horizon, a significant portion of its investments are usually held in STIP.

## MONTANA RESIDENTIAL MORTGAGES

**HISTORY** - The Board invests pension funds in Montana mortgages by purchasing all or a portion of mortgages from qualified financial institutions. Interest rates are set weekly, based on quotes from the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, the two major US secondary mortgage markets. Financial institutions charge a fee for servicing the loans. The number and location of mortgages purchased by the Board depend upon the mortgage lending activities of individual financial institutions and their interest in the Board's mortgage program.

**Loan Losses/Arrears** - Pension Mortgage loans in arrears 90 or more days increased from .35 percent of total mortgage holdings at year end 2001 to .41 percent of mortgage holdings at year-end 2002. These arrears ratios compare to .81 percent and .85 percent, respectively for Montana\* financial institutions during the period. The number of foreclosed properties remained at seven between year-end 2001 and year-end 2002. All mortgages are secured by single-family residential, multi-family residential, or commercial properties in Montana.

## COAL TAX TRUST IN-STATE LOANS

**HISTORY** - This Program, created in 1984 as part of the "Build Montana" program, invests Coal Tax Trust funds in Montana to stimulate the state's economy. State law authorizes the Board to invest the Trust to increase employment and business opportunities, while maintaining and improving the state's physical environment. The "other" portion of the graph is comprised of these loans:

- Department of Natural Resources----- \$46.4 Million
- Science & Technology ----- \$14.7 Million
- Department of Justice----- 1.8 Million
- Facilities Finance Authority ----- 1.6 Million

**Loan Types** – Five loans types are available in the In-State Investment Program, some of which offer a job credit interest rate reduction equal to 0.05 percent for each job created, up to a maximum reduction of 2.5 percent.

**The Federal Guaranteed Loan Program** purchases the guaranteed portion of loans, guaranteed by the Small Business Administration, the Bureau of Indian Affairs, the Rural Business and Cooperative Service, and the Economic Development Administration. Loan proceeds may be used for working capital, inventory, equipment, real property, or similar items. At year-end 2002, this Program had \$67.04 million in loan principal outstanding, or 44.4 percent of total outstanding Commercial Loan principal.

**The Business Loan Participation Program** purchases from originating financial institutions up to 80 percent of a participation loan. Unencumbered land, buildings, and equipment may be financed with the loan proceeds. The financial institutions charge a fee to service the loan and the Board's loan is collateralized proportionally to the Board's share of the loan. At year-end 2002, this Program had \$67.4 million in loan principal outstanding, or 44.7 percent of total outstanding Commercial Loan principal.

**The Economic Development Linked Deposit Program** offers businesses long-term, fixed-rate financing for working capital, inventory, or real property. The Board places a long-term deposit at a pre-established rate with the financial institution originating the loan. The lender assumes all loan risk and is assured a specific "spread" for the term of the loan. At year-end 2002, this Program had \$16.5 million in loan principal outstanding, or 10.9 percent of total outstanding Commercial Loan principal.

**The Infrastructure Loan Program** provides loans to eligible local governments for constructing infrastructure required by job creating businesses in their jurisdiction. At year-end 2002, this Program had \$10.3 million in loan principal outstanding. Total loans outstanding in this Program are limited by law to \$50.0 million.

**The Value-added Loan Program** provides low interest loans to value-added type businesses that create or retain jobs. At year-end 2002, this Program had \$6.6 million in loan principal outstanding. Total loans outstanding in this Program are limited by law to \$50.0 million.

**Loan Yield** - On June 30, 2002, the average weighted yield of all outstanding in-state investment loans, excluding Value-Added Loans whose interest rates are set by law, was 6.88 percent.

## BOND PROGRAMS

The Board administers several bond programs under the Montana Economic Development Bond and the Municipal Finance Consolidation Acts, created as part of the "Build Montana" program in 1984. The INTERCAP program lends funds to eligible governments for a variety of purposes. Since 1987, 348 eligible governments have received 806 loans, totaling \$142.43 million. At June 30, 2002, there was \$48.54 million in outstanding loan balances.

INTERCAP loans are funded with proceeds from bonds issued by the Board. Since the program's inception, the Board has issued \$75.5 million in bonds with \$57.29 million outstanding at June 30, 2002. Loan interest rates, which are reset each February 16 based on the interest on the bonds funding the loans, were set at 3.15 percent on February 16, 2002.

Other bond programs are:

- **School District Pooled Refunding Program**

In 1991 the Board purchased general obligation refunding bonds of participating school districts, enabling the districts to refinance their outstanding bonds at a lower interest rate. The 16 school districts participating in this \$6.234 million bond issue saved a total of \$577,600 in interest over the life of the refunding bonds. Although this Program is inactive, it could be re-activated given sufficient demand.

- ***Pooled Irrigation Program***

Five irrigation districts participated in this Program that prepaid their outstanding loans to the federal bureau of reclamation. The Board issued bonds of \$4.976 million in 1988 to prepay \$15.6 million of non-interest bearing federal loans held by the districts. The Board lent the bond proceeds to the districts at an average 7.20 percent interest. Although the districts paid off non-interest federal loans with interest bearing loans, they saved a total of \$5.9 million, because the federal loans were prepaid at steep discounts, thereby significantly lowering the amount of principal owed by the districts.

## **Economic Development Bond Act**

- ***Stand Alone Economic Development Bond Program***

This Program provides qualifying businesses access to tax-exempt funds and the Board has issued bonds to finance several projects. The Board acts as a legal funding conduit only and is not pecuniarily liable for the repayment of the bonds. Bonds outstanding as of June 30 are listed below:

<b>Project</b>	<b>Issue Date</b>	<b>Issue Amount</b>	<b>6/30/02 Balance</b>
Farmer's Union	08/85	3,925,000	3,925,000
Colstrip	10/89	60,800,000	59,100,000
BGI	07/93	118,345,000	117,645,000
Stillwater Mining	07/00	30,000,000	30,000,000
<b>Total</b>		<b><u>213,070,000</u></b>	<b><u>210,670,000</u></b>

- ***Montana Conservation Reserve Payment (CRP) Enhancement Program***

This Program provides loans to Montana farmers to refinance outstanding loans and/or to purchase additional land and farm equipment. The borrowers assign their federal CRP contracts to the Board in exchange for a loan ranging from 60 percent to 75 percent of the remaining payments on the CRP contracts. When the Program began bonds were issued to provide funding for the loans. Recently, the loans have been funded from the Trust Fund Bond Pool as an investment. Loan interest rates are typically set at 0.50 higher than the interest set by the Trust Fund Bond Pool manager. A total of 224 loans, totaling \$29.60 million have been funded under this Program.

- ***Pooled Economic Development Bond Program***

This Program, inactive since 1986 due to federal tax law revisions, provided loans to small businesses to expand and improve their facilities. The Board funded the loans by issuing tax-exempt bonds. Except for a pledge of revenues and a guaranty fund, the Board has no pecuniary liability under this Program. Although there are three loans outstanding in this program, the bonds issued to fund the loans have been repaid.

The Bond Program financial statements begin on Page 66 of Appendix B.

# LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Retirement Funds Bond Pool, as of June 30, 2002, and 2001, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Retirement Funds Bond Pool, as of June 30, 2002, and 2001, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002

The accompanying notes are an integral part of these financial statements.

STATE OF MONTANA BOARD OF INVESTMENTS  
RETIREMENT FUNDS BOND POOL

NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2002 AND 2001

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Retirement Funds Bond Pool (RFBP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, to participate in a diversified pool. The RFBP was created on April 1, 1995, by the transfer of all fixed income and variable-rate securities owned by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

RFBP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The RFBP portfolio includes corporate asset-backed, other corporate, U.S. government mortgage-backed, government, Yankee securities and cash investments. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. U.S. government mortgage-backed securities reflect participation in a pool of residential mortgages. Government securities include direct and indirect obligations of the U.S. Treasury and state and local government bonds. Yankee bonds are U.S. dollar denominated bonds issued by foreign corporations and governments and U.S. companies issuing debt in foreign markets.

The RFBP portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Some RFBP REMICs are interest-only strips (IOs). Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. IOs receive cash flow from the interest payment component on underlying mortgage loans. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 5 for the Year End Portfolio.)

RFBP fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The variable-rate securities float with LIBOR (London Interbank Offered Rate) or the weighted average of the net mortgage interest rates for the mortgage loan group. The three variable-rate securities, with an amortized cost of \$700,000 as of June 30, 2002 and 2001, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 6 for the Year End Portfolio.)

The RFBP, as an internal investment pool, invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

Investments are presented in the Statement of Net Asset Value at fair value. Fair values are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

Participant Units

The Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all fixed income and variable-rate securities, at amortized cost, into the RFBP at the start-up date and were issued units according to the market value of each participant's portfolio. The initial unit value as of April 1, 1995, was \$100.00. Unit values thereafter are calculated weekly and at month end, based on portfolio pricing, to allow for participant transactions to occur as determined by the investment staff.

The June 30, 2002 unit value of \$103.56 increased from a June 30, 2001 unit value of \$102.04. Interest rates declined during the fiscal year, which has the effect of increasing bond prices and the pool unit value. A one percent (1%) change in interest rates is expected to have a five to seven percent (5%-7%) inverse change in the unit value. RFBP investments are considered long-term in nature.

The Value of Units Sold by Participants of \$169.2 million for fiscal year 2002, as compared to \$34.5 million for fiscal year 2001 reflects the pension funds' portfolio rebalancing as equity prices declined during fiscal year 2002. RFBP units were sold to adjust the pension funds' portfolio towards the stated equity/fixed income asset allocation.

#### Broker Receivable/Payable

RFBP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the RFBP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

#### Other

Accumulated income, recorded as Income Due Participants, is distributed monthly on the first calendar day of each month. Realized portfolio gains/losses are distributed at least annually to the participants.

Investment income reported in the Statement of Investment Income and Distribution includes interest accruals, realized gains/losses, amortization/accretion and miscellaneous income.

Administrative expenses incurred by the Board are charged daily to RFBP based on the Board's expenses applicable to RFBP.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2002 and 2001, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2002 and 2001 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2002 and 2001. Moreover, there were no losses during fiscal years 2002 and 2001 resulting from a default of the borrowers or State Street.

During fiscal years 2002 and 2001, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2002 and June 30, 2001, the Board had no credit risk exposure to borrowers.

As of June 30, 2002, the carrying and fair values of the underlying securities on loan for the RFBP were \$149,118,626 and \$165,121,529 respectively. Cash collateral provided for the securities on loan totaled \$171,445,667.

As of June 30, 2001, the carrying and fair values of the underlying securities on loan for the RFBP were \$161,307,079 and \$171,717,272 respectively. Cash collateral provided for the securities on loan totaled \$179,365,134.

#### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2002 and June 30, 2001. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2002

\*At June 30, 2001, these underlying securities with fair values of \$171,717,272 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the above instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires RFBP investments, at the time of purchase, to be rated investment grade as defined by Moody's or Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the government mortgage-backed category, the RFBP portfolio holds REMICs totaling \$2,503,357 and \$3,945,420 in amortized cost, respectively, as of June 30, 2002 and June 30, 2001. These securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. The IOs are more sensitive to prepayments by mortgagees resulting from interest rate changes than other REMIC securities. For example, if interest rates decline and homeowners refinance mortgages, the underlying mortgages are prepaid. When underlying mortgages are prepaid, the interest cash flows are reduced while principal cash flows are increased. If homeowners pay on mortgages longer than anticipated, the cash flow effect would be the opposite.

The IO REMIC securities purchased in August and September 1992 are being reduced periodically towards zero according to the expected average life of the underlying mortgages. The IO securities amortized cost is \$700,000 as of June 30, 2002 and 2001.

Corporate asset-backed securities are based on cash flows from principal and interest payments on underlying car and home loans. These securities, while sensitive to prepayments due to interest rate changes, have less credit risk than securities not backed by pledged assets. Market risk is also less because principal is paid back prior to the maturity date of the securities.

As of June 30, 2002, Enron Corp., WorldCom Inc. and Burlington Industries, Inc. presented legal and higher credit risks to the Board.

The RFBP holds a \$7 million par 6.40% Enron bond maturing July 15, 2006 and a \$7 million par 6.95% Enron bond maturing July 15, 2028. The combined book value of these securities was \$13,582,030 as of November 30, 2001. On December 12, 2001, the Enron Corp. filed for Chapter 11 bankruptcy protection. Accordingly, the November 2001 book value for the two issues was reduced to \$5.6 million as of June 30, 2002. In October 2002, the book value was reduced to \$2.8 million for both issues. The Board, currently, anticipates receiving up to \$2.8 million from bankruptcy claims.

The RFBP portfolio includes a \$6,000,000 par, 6.95% WorldCom Inc. bond maturing August 15, 2028. The book value of this bond, originally purchased at a discount, was \$5,477,400 on June 30, 2002. On July 21, 2002, WorldCom Inc. filed for Chapter 11 bankruptcy protection. As of July 31, 2002, the reduced book value is \$2,400,000. At this time, the Board expects bankruptcy recovery up to \$2,400,000. On November 7, 2002, the Attorney General for the State of Montana filed a lawsuit against certain WorldCom executives, directors and financial institutions associated with WorldCom such as Arthur Andersen and CitiGroup. The lawsuit, filed in Lewis and Clark County, Montana, alleges that the defendants filed "false and misleading registration statements" relating to the purchase of the bonds by the Montana Board of Investments.

Burlington Industries, Inc. also presented a higher credit risk as of June 30, 2001. The Board owns a Burlington Industries, Inc., \$6 million par, 7.25% bond maturing September 15, 2005. In September 2000, the company announced a reduction of stockholders equity. Due to an increasing senior bank line and declining credit trend, the bond ratings for this issue were downgraded, in May 2001, by the Moody's and Standard & Poor's rating agencies. During fiscal year 2001, the book value of Burlington Industries Inc. was reduced from the August 31, 2000 book value of \$5,609,640 to \$2,400,000. Due to the company's filing for Chapter 11 bankruptcy protection on November 11, 2001, the book value was reduced to \$1,200,000. The company is expected to emerge from bankruptcy in 2003.

As of June 30, 2001, Asarco Inc., Rite Aid and Service Corp. presented a higher credit risk to the Board.

The RFBP held a \$7 million par, 7.875% Asarco bond maturing April 15, 2013. Due to bond rating downgrades, high leverage and increased production costs, the book value of this security was reduced from the May 31, 2001 book value of \$6,847,634 to \$5,600,000 as of June 30, 2001. In February 2002, the book value of this security was further reduced to \$4,200,000. In May 2002, this bond was sold, on the market, for \$3,474,250 including interest.

The RFBP owns a Rite Aid \$7,000,000 par, 7.13% bond maturing January 15, 2007. In May 2000, the Board was subordinated to a secured bank line of credit on this issue and the bond ratings were downgraded by the Moody's and Standard & Poor's bond ratings agencies. Based on this subordination and ratings downgrade, the book value was reduced to \$5,600,000 as of June 30, 2000. During fiscal year 2001, the book value was further reduced to \$5,220,172. Due to an improving credit trend, amortization was resumed in June 2001. The book value of this security at June 30, 2002 is \$5,541,139. As of June 30, 2002, Rite Aid does not represent a credit risk.

The RFBP portfolio lists a Service Corp. \$5 million par, 6.875% bond maturing October 1, 2007 and a Service Corp. \$5 million par, 6% bond maturing December 15, 2005. These bonds, originally purchased at a discount, carried a combined book value of \$9,914,480 as of December 31, 2000. By February 2001, both the Moody's and S&P bond rating agencies downgraded the bond ratings for this issue below investment grade. The book value of these two issues is \$4,000,000 each as of June 30, 2002 and 2001. Due to an improved credit outlook, Service Corp is not considered a credit risk as of June 30, 2002.

## 5. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$5 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a “breach of contract” for the March 25, 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$538,632 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$5,683,075 in principal and interest plus \$150,000 as a consent fee.

## 6. YEAR END PORTFOLIO

The June 30, 2002 RFBP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Coupon</u>	<u>Maturity</u>	<u>Par</u>	<u>Book Value</u>	<u>Fair Value</u>	<u>% of Total</u>

# LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Trust Funds Bond Pool, as of June 30, 2002, and 2001, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Trust Funds Bond Pool, as of June 30, 2002, and 2001, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002

STATE OF MONTANA BOARD OF INVESTMENTS  
TRUST FUNDS BOND POOL

NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2002 AND 2001

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Trust Funds Bond Pool (TFBP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, to participate in a diversified pool. The TFBP was created on October 1, 1995, by the transfer of all fixed income and variable-rate securities owned by the Coal Severance Tax Permanent Trust, Resource Indemnity Trust, Coal Tax Park Trust, Trust and Legacy, Coal Tax Cultural Trust and Treasure State Endowment Trust funds. Since the pool's creation in 1995, the funds listed below became participants in the TFBP:

University of Montana Endowment Fund*	January 1996
Coal Severance Tax School Bond Contingency Fund	March 1996
Montana Pole Superfund	September 1996
State of Montana Section 457 Deferred Compensation Plan **	April 1997
Upper Clark Fork River Basin (UCFRB) Restoration	July 1999
Upper Clark Fork River Basin (UCFRB) Cost Recovery	July 1999
Streamside Tailings Operable Unit	July 1999
Treasure State Regional Water Systems	July 2000
Tobacco Trust Fund	January 2001

\*In July 2002, the University of Montana requested two additional funds to be invested in the TFBP.

\*\*In January 2002, the State of Montana Section 457 Deferred Compensation Plan withdrew from the TFBP.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

TFBP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The TFBP portfolio includes corporate asset-backed, other corporate, U.S. government mortgage-backed, government, Yankee securities and cash investments. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. U.S. government mortgage-backed securities reflect participation in a pool of residential mortgages. Government securities include direct and indirect obligations of the U.S. Treasury and state and local government bonds. Yankee bonds are U.S. dollar denominated securities issued by foreign corporations and governments and U.S. companies issuing debt in foreign markets.

The TFBP portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 7 for the Year End Portfolio.)

TFBP fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The TFBP did not hold any variable rate securities as of June 30, 2002 and June 30, 2001.

Investments are presented in the Statement of Net Asset Value at fair value. Fair values for securities are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

The TFBP, as an internal investment pool, invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and

invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

### Participant Units

The Coal Severance Tax Permanent Trust, Resource Indemnity Trust, Coal Tax Park Trust, Trust and Legacy, Coal Tax Cultural Trust, and Treasure State Endowment Trust funds transferred all fixed income and variable-rate securities, at amortized cost, into the TFBP at the start-up date and were issued units according to the fair value of each participant's portfolio. The initial unit value as of October 1, 1995, was \$100.00. Unit values are calculated weekly and at month end, based on portfolio pricing, to allow for participant transactions to occur as determined by the investment staff.

The June 30, 2002 unit value of \$98.61 increased from a June 30, 2001 unit value of \$97.18. Interest rates declined during the fiscal year, which has the effect of increasing bond prices and the pool unit value. A one percent (1%) change in interest rates is expected to have a five to seven percent (5%-7%) inverse change in the unit value. TFBP investments are considered long-term in nature and participants are not expected to sell units for liquidity for short-to-intermediate term needs.

### Broker Receivable/Payable

TFBP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the TFBP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

### Other

Accumulated income, recorded as Income Due Participants, is distributed monthly on the first calendar day of each month. Realized portfolio gains/losses are distributed at least annually to the participants.

Investment income reported in the Statement of Investment Income and Distribution includes interest accruals, realized gains/losses, amortization/accretion and miscellaneous income.

Administrative expenses incurred by the Board are charged daily to TFBP based on the Board's expenses applicable to TFBP.

## 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2002 and 2001, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2002 and 2001 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2002 and 2001. Moreover, there were no losses during fiscal years 2002 and 2001 resulting from a default of the borrowers or State Street.

During fiscal years 2002 and 2001, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2002 and June 30, 2001, the Board had no credit risk exposure to borrowers.

As of June 30, 2002, the carrying and fair value of the underlying securities on loan for the Trust Funds Bond Pool was \$106,007,425 and \$116,106,702, respectively. The collateral provided for the securities on loan totaled \$123,373,283 representing \$102,391,378 in cash and \$20,981,905 in securities collateral.

As of June 30, 2001, the carrying and fair value of the underlying securities on loan for the Trust Funds Bond Pool was \$107,370,234 and \$116,552,333, respectively. The cash collateral provided for the securities on loan totaled \$121,911,727.

#### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2002 and June 30, 2001. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2002

##### Category 1

Securities Lending Collateral Investment Pool			\$ <u>121,911,727</u>	\$ <u>121,911,727</u>	\$ <u>121,911,727</u>

\*At June 30, 2001, these underlying securities, with a fair value of \$116,552,333 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the above instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires TFBP investments, at the time of purchase, to be rated investment grade as defined by Moody's or Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the U.S. government mortgage-backed category, the TFBP portfolio holds REMICs totaling \$1,265,484 and \$2,411,436, respectively, at amortized cost, as of June 30, 2002 and June 30, 2001. These securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. When underlying mortgages are prepaid, the interest cash flows are reduced while principal cash flows are increased. If homeowners pay on mortgages longer than anticipated, the cash flow effect would be the opposite.

Corporate asset-backed securities are based on cash flows from principal and interest payments on underlying car and home loans. These securities, while sensitive to prepayments due to interest rate changes, have less credit risk than securities not backed by pledged assets. Market risk is also less because principal is, generally, paid back prior to the maturity date of the securities.

As of June 30, 2002, Enron Corp., WorldCom Inc. and Burlington Industries, Inc. presented legal and higher credit risks to the Board.

The TFBP holds a \$2 million par, 6.75% Enron bond maturing August 1, 2009, a \$3 million par 6.40% Enron bond maturing July 15, 2006 and a \$3 million par 6.95% Enron bond maturing July 15, 2028. The combined book value of these securities, was \$7,560,870 as of November 30, 2001. On December 12, 2001, the Enron Corp. filed for Chapter 11 bankruptcy protection. Accordingly, the November 2001 book value for the three issues was reduced to \$3.2 million as of June 30, 2002. In October 2002, the book value was reduced to \$1.6 million for the three issues. The Board, currently, anticipates receiving up to \$1.6 million from bankruptcy claims.

The TFBP portfolio includes a \$9,000,000 par, 6.95% WorldCom Inc. bond maturing August 15, 2028. The book value of this bond, originally purchased at a discount, was \$8,216,100 on June 30, 2002. On July 21, 2002, WorldCom Inc. filed for Chapter 11 bankruptcy protection. As of July 31, 2002, the reduced book value is \$3,600,000. At this time, the Board expects bankruptcy recovery up to \$3,600,000. On November 7, 2002, the Attorney General for the State of Montana filed a lawsuit against certain WorldCom executives, directors and financial institutions associated with WorldCom such as Arthur Andersen and CitiGroup. The lawsuit, filed in Lewis and Clark County, Montana, alleges that the defendants filed "false and misleading registration statements" relating to the purchase of the bonds by the Montana Board of Investments.

Burlington Industries, Inc. also presented a higher credit risk as of June 30, 2001. The Board owns a Burlington Industries, Inc., \$4 million par, 7.25% bond maturing September 15, 2005. In September 2000, the company announced a reduction of stockholders equity. Due to an increasing senior bank line and declining credit trend, the bond ratings for this issue were downgraded, in May 2001, by the Moody's and Standard & Poor's rating agencies. During fiscal year 2001, the book value of Burlington Industries Inc. was reduced from the August 31, 2000 book value of \$3,739,760 to \$1,600,000. Due to the company's filing for Chapter 11 bankruptcy protection on November 11, 2001, the book value was reduced to \$800,000. The company is expected to emerge from bankruptcy in 2003.

As of June 30, 2001, Asarco Inc., Rite Aid and Service Corp. presented a higher credit risk to the Board.

The TFBP held a \$5 million par, 7.875% Asarco bond maturing April 15, 2013. Due to bond rating downgrades, high leverage and increased production costs, the book value of this security was reduced from the May 31, 2001 book value of \$4,987,966 to \$4,000,000 as of June 30, 2001. In February 2002, the book value of this security was further reduced to \$3,000,000. In May 2002, this bond was sold, on the market, for \$2,478,719 including interest.

The TFBP owns a Rite Aid \$3,000,000 par, 7.13% bond maturing January 15, 2007. In May 2000, the Board was subordinated to a secured bank line of credit on this issue and the bond ratings were downgraded by the Moody's and Standard & Poor's bond ratings agencies. Based on this subordination and ratings downgrade, the book value was reduced to \$2,400,000 as of June 30, 2000. During fiscal year 2001, the book value was further reduced to \$1,800,000. Due to an improving credit trend, amortization was resumed in June 2001. The book value of this security at June 30, 2002 is \$2,374,356. As of June 30, 2002, Rite Aid does not represent a credit risk.

The TFBP portfolio lists a Service Corp. \$5 million par, 6% bond maturing December 15, 2005. This bond, originally purchased at a discount, carried a book value of \$4,914,480 as of December 31, 2000. By February 2001, both the Moody's and S&P bond rating agencies downgraded the bond ratings for this issue below investment grade. The book value is \$4,000,000 as of June 30, 2002 and 2001. Due to an improved credit outlook, Service Corp is not considered a credit risk as

of June 30, 2002.

## 5. PARTICIPANT LOAN

In accordance with Senate Bill 495 enacted by the 2001 Legislature, the Coal Severance Tax Permanent Trust loaned 483,604 TFBP shares, with a book value of \$46,366,904, to the Trust and Legacy fund on July 2, 2001. The loan proceeds were deposited in the Trust and Legacy Fund. A loan receivable was recorded in the Coal Severance Tax Permanent Trust and a corresponding liability was recorded in the Guarantee Fund, a General Fund sub-fund. The August 2002 Special Legislative Session approved the request to record this activity in a state special revenue fund of the Office of Public Instruction rather than in the Guarantee Fund.

## 6. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$8 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$861,811 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$9,092,920 in principal and interest plus \$240,000 as a consent fee.

## 7. YEAR END PORTFOLIO

The June 30, 2002 TFBP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Coupon</u>	<u>Maturity</u>	<u>Par</u>	<u>Book Value</u>	<u>Fair Value</u>	<u>% of Total</u>

# LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Short Term Investment Pool, as of June 30, 2002, and 2001, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Short Term Investment Pool, as of June 30, 2002, and 2001, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002

STATE OF MONTANA BOARD OF INVESTMENTS  
SHORT TERM INVESTMENT POOL - NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2002 AND 2001

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Short Term Investment Pool (STIP) was created by the Board to allow qualifying funds, per sections 17-6-201, 202 and 204, MCA, to participate in a diversified pool. Although state agencies are legally required to invest in STIP, local governments may voluntarily participate in STIP.

The purpose of STIP is to obtain the highest possible return, yet maintain a highly liquid position whereby funds may be invested for relatively short periods, one day or more, depending upon the participant's anticipated use of the funds. The investments and the income from STIP are owned by the participants, as they purchase units, and are managed on their behalf by the Board.

Although STIP is not registered with the Securities and Exchange Commission (SEC) as an investment company, the Board has as policy that STIP will, and does, operate in a manner consistent with the SEC's rule 2a7 of the Investment Company Act of 1940. In meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

STIP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The STIP portfolio may include asset-backed securities, commercial paper, corporate and government securities, repurchase agreements, and variable-rate (floating-rate) instruments. These securities are purchased to provide shareholders with a diversified portfolio earning a competitive total rate of return.

Asset-backed securities represent debt securities collateralized by a pool of mortgage and non-mortgage assets such as trade and loan receivables, equipment leases, credit cards, etc. Commercial paper is unsecured short-term debt with maturities ranging from 1 to 270 days. Commercial paper issued at a discount, direct or by brokers, is backed by bank credit lines. Repurchase agreements (REPOs) represent an agreement between a seller and a buyer, usually of US government securities, whereby the seller agrees to repurchase the securities at an agreed upon price and stated time. Variable-rate (floating-rate) securities pay a variable rate of interest until maturity. The variable-rate securities float with LIBOR (London Interbank Offered Rate).

Investments held are reported at fair value, annually, based on market prices supplied to the Board by various pricing services. The difference between amortized cost and fair value is reflected as an unrealized gain or loss in the investments managed. The STIP investment portfolio consists of securities with a maximum maturity of 397 days or less with the exception of securities having rate reset dates. The portfolio is carried at amortized cost or book value.

**Participant Units**

The STIP unit value is fixed at \$1 for both participant buys and sells. A purchased unit earns income on the purchase date and ceases to earn income on the day before the unit is sold. Participants may buy or sell fractional shares. For fiscal years 2002 and 2001, income was distributed on the first calendar day of each month. Participants may automatically reinvest their income in additional units.

During fiscal years 2002 and 2001, the Board did not provide or obtain any legally binding guarantees to support the value of the participant units.

**Broker Receivable/Payable**

STIP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the STIP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

## Other

Administrative expenses incurred by the Board are charged daily to STIP based on the Board's expenses applicable to STIP.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2002 and 2001, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2002 and 2001 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2002 and 2001. Moreover, there were no losses during fiscal years 2002 and 2001 resulting from a default of the borrowers or State Street.

During fiscal years 2002 and 2001, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2002 and June 30, 2001, the Board had no credit risk exposure to borrowers.

As of June 30, 2002 and June 30, 2001, there were no securities on loan.

### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below and on the following page to give an indication of the level of risk assumed at June 30, 2002 and June 30, 2001. Category 1 includes investments that are insured or registered or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

STIP investments' credit risk is measured by investment grade ratings given individual securities. Board of Investment's policy requires that STIP investments have the highest rating in the short term category by one and/or any Nationally Recognized Statistical Rating Organizations (NRSRO). The six NRSRO's include Standard and Poors, Moody's, Duff and Phelps, Fitch, IBCA and Thompson's Bank Watch.

Asset-backed securities have less credit risk than do securities not backed by pledged assets, while market risk for asset-backed securities is the same as market risk for similar non asset-backed securities.

While variable-rate securities have credit risk identical to similar fixed-rate securities, their market risk (income) is more sensitive to interest rate changes. However, their market risk (value/price) may be less volatile than fixed-rate securities because their value will usually remain at or near par as a result of their interest rates being periodically reset to maintain a current market yield.

There are no legal risks that the Board is aware of regarding any STIP investments.

5. YEAR END PORTFOLIO

The June 30, 2002 STIP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana Stock Pool, as of June 30, 2002, and 2001, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana Stock Pool, as of June 30, 2002, and 2001, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002

STATE OF MONTANA BOARD OF INVESTMENTS  
MONTANA STOCK POOL - NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2002 AND 2001

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Common Stock Pool (Montcomp) was created by the Board to allow retirement and endowment funds, per section 17-6-201, MCA, the opportunity to participate in the equity market via a diversified pool. Montcomp was created as of July 1, 1980, by the transfer of all common stock owned by the Public Employees' Retirement System, Teachers' Retirement System, and other funds into Montcomp.

In March 1996, the Board approved the Investment Policy Statement to reflect the name change from the Montana Common Stock Pool to the Montana Stock Pool. The Montana Stock Pool is referred to as "Montcomp" or MTCP. This policy statement provided for the investment in common or preferred stock. The Investment Policy Statement was revised and approved in September 1996 to allow the investment in securities convertible into common or preferred stocks. In June 2000, the Board revised and approved the Investment Policy Statement to allow the investment in equity derivatives.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

Montcomp investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The Montcomp portfolio may include common stock, preferred stock, convertible equity securities and equity derivatives. Common stock represents ownership units (shares) of a public corporation. Common stock owners are entitled to vote on director selection and other important matters as well as receive dividends on their holdings. Preferred stock, as a class of stock, pays dividends at a specified rate and has preference in the payment of dividends and liquidation of assets. Preferred stock holders, ordinarily, do not have voting rights. Convertible securities are securities carrying the right to exchange, or "convert" the instrument for other securities of the issuer or of another issuer. This definition most often applies to preferred stocks or corporate bonds carrying the right to exchange for a fixed number of shares of the issuer's common stock. Equity derivatives "derive" their value from other equity instruments such as futures and options.

In June 2000, the Board approved a staff recommendation to securitize cash by investing in an equity derivative, the State Street Stock Performance Index Futures Fund (SPIFF). Portfolio cash is swept daily into SPIFF maintaining 100% equity exposure through holdings of stock index futures.

Investments are presented in the statement of Net Asset Value at fair value. Equity investments, on valuation date, are stated at the closing price of the security's primary exchange. Carrying value, parenthetically disclosed, represents the equity security purchase price plus a fixed commission where applicable.

Participant Units

The Public Employees' Retirement System and the Teachers' Retirement System transferred all stock owned into Montcomp at the start-up date and were issued units according to the fair value of their contribution, retaining their original total cost basis. The initial unit value as of July 1, 1980, was \$1,000. Unit values thereafter and until March 31, 2000 were calculated weekly and at the close of the last business day of the month, based on the fair value of Montcomp equity holdings and other assets. Effective April 1, 2000, the unit values are calculated daily. Depending on stock market conditions and the investment officer's decision, participants may then buy or sell units on the first calendar day of each month or any business day using the previous day's unit value calculation.

On July 1, 1994, the initial unit value changed from \$1,000 to \$100. This change was required for the Board's new accounting system. On August 17, 2000, shareholders, on record, received one MTCP share for each MTCP share held as the result of a 2:1 split. The unit value on August 31, 2000, prior to the split, was \$1,014 while the unit value, after the split, was \$507.

As reported in the Statement of Changes in Net Asset Value, the value of units purchased by participants increased \$7.2 million in fiscal year 2002. The \$82 million in participant purchases in fiscal year 2002 reflect investment opportunities given the market conditions. The fiscal year 2001 participant purchases of \$75 million is attributed, primarily, to the

investment of cash proceeds from the participants' sale of Montana Real Estate Pool (MTRP) units. The value of units sold by participants in fiscal year 2001 increased from fiscal year 2000 by \$19.7 million to allow the participants' investment in a S&P 500 Equity Index Fund. The fiscal year 2002 and 2001 changes are the result of an asset allocation decision and do not reflect a change from the stated investment policy to increase retirement fund exposure to equity investments.

#### **Broker Receivable/Payable**

Montcomp security transactions are recorded as of trade date rather than settlement date. Because of this generally accepted practice, the Montcomp portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

#### **Other**

Investment income reported in the Statement of Investment Income and Distribution includes dividend accruals, tax reclaim accruals, SPIFF gain/losses and miscellaneous income. Montcomp dividends are recorded on the ex-dividend date.

The MTCP Income Available for Distribution is distributed as of the first calendar day of each month.

Administrative expenses incurred by the Board are charged daily to MTCP based on the Board's expenses applicable to MTCP.

### **3. SECURITIES LENDING**

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2002 and 2001, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2002 and 2001 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2002 and 2001. Moreover, there were no losses during fiscal years 2002 and 2001 resulting from a default of the borrowers or State Street.

During fiscal years 2002 and 2001, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2002 and June 30, 2001, the Board had no credit risk exposure to borrowers.

As of June 30, 2002, the carrying and fair values of the underlying securities on loan for the Montana Stock Pool were \$20,924,469 and \$15,748,477 respectively. The collateral provided for the securities on loan totaled \$16,128,704 in cash.

As of June 30, 2001, there were no securities on loan for the Montana Stock Pool.

#### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2002 and June 30, 2001. Category 1 includes investments that are insured or registered or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2002

##### Category 1

<u>Security Investment Type</u>	<u>Securities Not On Loan</u>	<u>On Loan for Securities Collateral*</u>	<u>Not Categorized*</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
Common Stocks	\$ 1,802,361,379	\$ 0	\$ 20,924,469	\$ 1,823,285,848	\$ 1,877,185,006

#### 5. OWENS-CORNING COMPLAINT

On October 11, 2002, the Board received a summons and complaint regarding the bankruptcy of Owens-Corning. The company seeks a determination that the dividend payments paid from October 1996 through July 2000 represent "fraudulent transfers under Chapter 11 Bankruptcy provisions and applicable state law, and are, therefore, voidable". The complaint states the Montana Board of Investments was the "recipient of dividends in the amount of \$357,099 for the relevant period". The Board is currently preparing a response to the complaint.

#### 6. YEAREND PORTFOLIO

The June 30, 2002 Montcomp portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Shares</u>	<u>Carrying Value</u>	<u>Fair Value</u>	<u>% of Total</u>

James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana International Equity Pool, as of June 30, 2002, and 2001, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana International Equity Pool, as of June 30, 2002, and 2001, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

**STATE OF MONTANA BOARD OF INVESTMENTS  
MONTANA INTERNATIONAL EQUITY POOL**

**NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2002 and 2001**

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana International Equity Pool (MTIP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, the opportunity to participate in the international equity market via a diversified pool. MTIP, approved by the Board in June 1996, consists of one pool investing in one or more separate funds. Currently, MTIP has investments with an internally managed fund, BOI Internal International, and three externally managed funds, Pyrford International, Schroder Investment Management NA, and SG Pacific Asset Management Inc. On January 3, 1997, the MTIP was funded by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

In fiscal year 2002, the Board funded \$15 million to BOI Internal International, \$12.5 million to SG Pacific Asset Management, Inc., \$20 million to Pyrford International, and \$25 million to Schroder Investment Management NA for a total funding of \$72.5 million.

In fiscal year 2001, the Board funded \$35 million to BOI Internal International and \$10 million each to Schroder Investment Management NA, SG Pacific Asset Management, Inc. and Pyrford International for a total funding of \$65 million.

Schroder Investment Management NA, and SG Pacific Asset Management, selected by the Board in October 1996, are authorized to invest in 11 Pacific Basin countries. These countries are Australia, China/Hong Kong, Indonesia, Japan, Korea, Malaysia, New Zealand, Philippines, Singapore, Taiwan and Thailand.

As approved by the Board, the BOI Internal International fund may invest in 21 European, North and South American countries. These countries are listed as follows:

Argentina	Denmark	Ireland	Portugal
Austria	Finland	Italy	Spain
Belgium	France	Mexico	Sweden
Brazil	Germany	Netherlands	Switzerland
Canada	Greece	Norway	United Kingdom
Chile			

In October 2001, the Board added Greece to the list of approved countries.

In August 1998, the Board selected Pyrford International, as an external investment manager for Europe. With the exception of the North and South American countries of Canada, Argentina, Chile, Brazil and Mexico, Pyrford International, as approved by the Board, may invest in the European countries listed above.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

MTIP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The MTIP portfolio includes equity investments in four funds - BOI Internal International, Pyrford International, Schroder Investment Management NA, and SG Pacific Asset Management. The four funds may invest in securities of foreign-based corporations listed on legal and recognized foreign exchanges as well as domestic exchanges. Security types may include ordinary common shares, preferred shares, convertible securities, American Depositary Receipts (ADR's), Global Depositary Receipts (GDR's), and other global securities, as appropriate.

Common stock represents ownership units (shares) of a public corporation. Common stock owners are entitled to vote on director selection and other important matters as well as receive dividends on their holdings. Preferred stock pays a stipulated dividend and has a claim prior to that of common stock upon the earnings of a corporation. Convertible securities are securities carrying the right to exchange, or “convert” the instrument for other securities of the issuer or of another issuer. ADR’s are receipts issued by a US depository bank representing shares of a foreign stock or bonds held abroad by the foreign sub-custodian of the American depository bank. GDR’s are receipts issued by non-US bank depositories, which represent shares of a foreign stock or bonds.

#### Broker Receivable/Payable

MTIP security transactions are recorded as of the trade date rather than settlement date. Because of this generally accepted practice, the MTIP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

#### Valuation and Foreign Currency

Investments are presented in the statement of Net Asset Value at current US dollar value. The MTIP’s fair value is derived from the Net Asset Value Per Share, as separately calculated, for the four funds - BOI Internal International, Pyrford International, Schroder Investment Management NA, and SG Pacific Asset Management. Each fund’s Net Asset Value Per Share represents the per unit ownership of the fund’s Net Assets. The Net Assets are the excess of the valued securities, cash, receivables and other assets over the fund’s liabilities. Each fund’s Net Assets are reported at current US dollar value after conversion, by the custodial bank, State Street Bank and Trust, from the foreign currency amounts.

State Street Bank, as custodian, is responsible for reporting the foreign currency transactions in both the local and base or functional (US dollar) currency. The four funds’ cash, receivables, fair value of investment securities, other assets and liabilities are translated into US dollars at the Interactive Data Control (IDC) 11:00 a.m. Eastern Standard Time (EST) exchange rate as of the balance sheet date. Purchases and sales of investment securities, income and expenses are converted into US dollars using the Reuters noon EST exchange rate on the transaction date.

Currency exposures may be hedged, partially or fully, at the discretion of the manager to preserve the US dollar value of investments made. Currency speculation, such as over-hedging, reverse hedging or other trading activity not specifically aimed at preserving the US dollar value of investments, is not authorized.

Fair values for the funds holding the publicly traded securities are determined by reference to market prices supplied to the Board by the Board’s custodial bank, State Street Bank and their primary pricing service, IDC. Equity investments, traded on a national security exchange, are stated at the last reported sales price on valuation day, while equity securities traded in the over-the-counter market are stated at the last quoted bid price.

#### Participant Units

The Public Employees’, Municipal Police Officers’, Game Wardens’, Sheriffs’, Judges’, Highway Patrol Officers’, Teachers’, Volunteer Firefighters’ and Firefighters’ Unified retirement funds sold units in the Short Term Investment Pool at the start up date and were issued units in MTIP at an initial unit value of \$100. Unit values thereafter are calculated weekly and once a month at the close of the last business day of the month, based upon the fair value of the MTIP equity holdings, other assets and liabilities. Based on the investment officers’ decision, participants may then buy or sell units on the first business day of each month. All participant buys or sells occur after distribution of accumulated income.

#### Investment Income and Distribution

Investment Income represents the monthly income distributions to the MTIP from the investment manager funds. The funds’ income distributions include dividends accrued as of the ex-dividend date, interest, tax refunds and securities lending income, and related income currency gains/losses. Income currency gains/losses result from the difference between the amount of dividend, interest and foreign withholding taxes accrued for the fund in US dollars and the amount received or paid in equivalent US dollars.

Realized gains/losses from the sale of securities and related foreign exchange transactions are retained by each fund. Realized foreign exchange gains/losses arise from sales and maturities of portfolio securities, sales of foreign currencies, and currency gains/losses realized between the trade and settlement dates.

The fiscal year 2002 administrative expense of \$1,774,996 represents \$1,322,540 in quarterly fees accrued and paid to the external managers per their contracts and \$452,456 in monthly charges accrued and paid to the Board of Investments. Administrative expenses incurred by the Board are charged daily to MTIP based on the Board's expenses applicable to MTIP.

The fiscal year 2001 administrative expense of \$1,653,626 represents \$1,239,158 in quarterly fees accrued and paid to the external managers per their contracts, \$406,194 in monthly charges accrued and paid to the Board of Investments and \$8,274 paid to State Street Bank for one month of international transaction charges per the custodial bank contract.

The MTIP Income Available for Distribution is distributed at least quarterly to the retirement fund participants, net of external manager fees and administrative expenses, on the first business day of the following month.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 105 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2002 and 2001, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar and foreign currency cash, US government securities, sovereign debt of foreign countries, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2002 and 2001 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2002 and 2001. Moreover, there were no losses during fiscal years 2002 and 2001 resulting from a default of the borrowers or State Street.

During fiscal years 2002 and 2001, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2002 and June 30, 2001, the Board had no credit risk exposure to borrowers.

As of June 30, 2002, the carrying and fair values of the underlying securities on loan for MTIP were \$63,227,006 and \$65,695,692, respectively. The collateral provided for the securities on loan totaled \$67,264,338 representing \$67,179,838 in cash and \$84,500 in securities collateral.

As of June 30, 2001, the carrying and fair values of the underlying securities on loan for MTIP were \$52,892,284 and \$48,892,190, respectively. The collateral provided for the securities on loan totaled \$50,823,887 representing \$49,907,791 in cash and \$916,096 in securities collateral.

### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized on the following page to give an indication of the level of risk assumed at June 30, 2002 and June 30, 2001. Category 1 includes investments that are insured or registered, or

securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2002

\* At June 30, 2001, the underlying securities with fair values of \$886,804 and \$48,005,386, respectively, were loaned for securities and cash collateral under a securities lending agreement with the state's agent.

The MTIP, through the above funds, has significant investments in 23 foreign countries. Future economic and political developments in these countries could adversely affect the liquidity or value, or both, of the securities held by the above funds in which MTIP is invested.

As of June 30, 2002 and June 30, 2001, the Board was unaware of any legal, market or credit risks regarding the MTIP investments.

5. YEAR END PORTFOLIO

# LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana Private Equity Pool, as of June 30, 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal year then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana Private Equity Pool, as of June 30, 2002, and its changes in net asset value and investment income and distribution for the fiscal year then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002

STATE OF MONTANA BOARD OF INVESTMENTS  
MONTANA PRIVATE EQUITY POOL

NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Private Equity Pool (MPEP) was established by the Board to allow retirement funds, per section 17-6-201, MCA, the opportunity to participate in the venture capital and leveraged buyout markets and other private equity investments via a diversified pool. The Board approved creation of the MPEP in April 2002. Effective May 1, 2002, the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all their venture capital and leveraged buyout investments, at cost, totaling \$159,799,310, and cash of \$15,000,000 to the new pool. These investments were previously recorded in the All Other Funds financial statements for fiscal year 2001.

Given the complexity and specialization of private equity investment, the Board contracts with five private equity managers to invest in venture capital, leveraged buyout and other private equity investments. The retained private equity managers include Adams Street Partners, formerly Brinson Partners, Kohlberg, Kravis, Roberts and Company, (KKR), Welsh Carson Anderson and Stowe, Madison Dearborn Partners and Lexington Partners. According to Board policy, the external managers may not invest more than 20% of private equity invested capital total in non-US company partnerships unless the fund is a designated non-US fund.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

Montana Private Equity Pool investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The MPEP portfolio includes venture capital, leveraged buyout, mezzanine, special situation and secondary investments. Venture capital represents private equity investments in early stage financing of rapidly growing companies with an innovative product or service. Leveraged buyouts (LBO's) permit an investment group to acquire a company by leveraging debt, as a financing technique, to establish a significant ownership position on behalf of the company's current management team. Mezzanine investments are the subordinated debt and/or equity of privately owned companies. The debt holder participates in equity appreciation through conversion features, such as rights, warrants, and/or options. Special situation investments include the investment in the exploration for oil and/or gas reserves or in the development of proven reserves, investment in land to harvest timber, and investments that have a special component usually related to geographical, economic, or social issues. Secondary investments are the investment in a previously owned limited partnership. These investments may be direct or via a general partner specializing in secondary investments. Private equity investments are long-term, by design, and extremely illiquid.

In creating the pool, the Board chose to securitize MPEP cash by investing in an equity derivative, the State Street Stock Performance Index Futures Fund (SPIFF). Portfolio cash is swept daily into SPIFF maintaining 100% equity exposure through holdings of stock index futures.

Investments are presented in the Statement of Net Asset Value at fair value. Because no recognized market exists for private equity investment, the MPEP investments, on valuation date, are stated at the fair value reported in the most recent external managers' valuation reports. Carrying value, parenthetically disclosed, represents the private equity security purchase price.

Broker Receivable/Payable

MPEP security transactions are recorded as of trade date rather than settlement date. Because of this generally accepted practice, the MPEP portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

Participant Units

The pension funds transferred all their venture capital and leveraged buyout investments, at cost, into the MPEP at the start-up date and were issued units according to the fair value of each participant's portfolio and cash

contribution. The initial unit value as of May 1, 2002 was \$100. Although unit values are calculated at month end, the pool portfolio will be priced at least quarterly at the fair value reported in the external managers' valuation reports. Given the quarterly portfolio valuations, pool participant transactions will most likely occur on a quarterly basis. Based on the investment officer's decision, participants may buy, reinvest or sell units on the first business day of each month. All participant buys, reinvestments or sells occur after distribution of accumulated income.

### Investment Income and Distribution

Investment Income reported in the Statement of Investment Income and Distribution includes cash dividends, interest, realized gains and losses, and miscellaneous income received from May 1 through June 30, 2002. MPEP dividends are recorded on the ex-dividend date.

The MPEP Income Available for Distribution is distributed or reinvested, on behalf of the nine retirement fund participants, at least quarterly or as determined by the Investment Officer. Any cash distributions or reinvestments will occur on the first business day of the following month. The Income Available for Distribution is net of MPEP external manager fees and administrative expenses.

The fiscal year 2002 administrative expense of \$49,378 represents fees paid to the external managers of \$15,384 per their contracts and \$33,994 paid to the Board of Investments for May and June 2002. Administrative expenses incurred by the Board are charged daily to MPEP based on the Board's expenses applicable to MPEP.

### Security Lending

Because there is no active security lending market for this asset class, MPEP does not participate in security lending.

## 3. COMMITMENTS

Private equity investments, typically, represent a seven to ten year commitment characterized by capital calls occurring during the first five years with distributions to the investor over the remaining term of the investment.

The original and remaining commitments and their respective carrying and fair values, as of June 30, 2002, are listed in the table below.

Commitments as of June 30, 2002

<u>Security Investment</u>	<u>Original Commitment Date</u>	<u>Original Commitment</u>	<u>Commitment Remaining</u>	<u>Carrying Value</u>	<u>Fair Value</u>
Separate Account Partnerships	Jan 1988/Apr 1990	\$ 14,000,000	\$ 438,015	\$ 3,071,519	\$ 2,173,446
Venture Partnership Acquisition Fund II	April 1990	4,000,000	0	294,479	292,942
Brinson Venture Capital Fund III	March 1992	10,000,000	0	8,101,502	6,907,167
Brinson Venture Capital Fund IV	May 1999	15,000,000	3,291,667	11,708,333	7,294,315
Brinson Non-US Partnership Trust	January 1999	10,000,000	7,751,868	2,171,272	1,952,966
Brinson Partnership Trust 1996-2001	March 1996	105,000,000	70,042,409	32,016,327	28,701,773
Adams Street Partnership Trust 2002	August 2001	40,000,000	39,242,000	758,000	722,224
Adams Street Partners Fund V	August 2001	40,000,000	40,000,000	0	0
KKR 1986, 1987 Fund	August 1987	25,300,000	0	16,171,794	15,454,138
KKR 1993 Fund	December 1990	25,000,000	0	9,295,565	6,475,523
KKR 1996 Fund	July 1996	100,000,000	12,194,790	60,953,250	90,211,663
KKR European Fund	August 1999	25,000,000	20,458,346	4,541,654	3,663,907
Lexington Capital Partners V	May 2001	50,000,000	44,350,438	4,896,324	4,896,324
Madison Dearborn Partners IV	January 2001	25,000,000	23,414,446	858,233	858,233
Welsh Carson Anderson & Stowe IX	September 2000	<u>25,000,000</u>	<u>17,250,000</u>	<u>5,810,293</u>	<u>5,900,905</u>
Total Private Equity Commitments		\$ <u>513,300,000</u>	\$ <u>278,433,979</u>	\$ <u>160,648,545</u>	\$ <u>175,505,526</u>

## 4. INVESTMENT RISK

Private equity investments are recognized as investments with a higher degree of risk with a higher return potential than traditional equity investments. Portfolio diversification of risk is to be achieved through multiple partnership relationships and investments diversified by time, financing stage, industry sector, investment size and geographical region. Private equity investments typically have a low correlation relative to other investment asset classes and should contribute to the reduction of portfolio risk and the enhancement of expected returns on a total investment portfolio basis.

## 5. PRIVATE EQUITY COMMITMENT

In September 2002, the Board approved a staff recommendation to commit \$75 million to OCM Opportunity Fund IVb LP (Oaktree). This fund will invest, primarily, in distressed debt securities and other obligations valued at a substantial discount to par. Without undue principal risk, the fund seeks capital appreciation through the sale of restructured debt obligations or newly issued securities. On September 25, 2002, the Board invested \$45 million in this fund.

## 6. YEAR END PORTFOLIO

The June 30, 2002 MPEP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Shares</u>	<u>Carrying Value</u>	<u>Fair Value</u>	<u>% of Total</u>

Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying Statement of Net Investments Managed for the state of Montana Board of Investments, All Other Funds, as of June 30, 2002 and 2001, and the related Statement of Net Investment Income and Statement of Changes in Net Investments Managed for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net investments managed by the Montana Board of Investments, All Other Funds, as of June 30, 2002, and 2001, and its net investment income and changes in its net investments managed for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002

NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2002 AND 2001

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis per section 17-6-201, MCA. The All Other Funds (AOF) investments and income are owned by various State of Montana agencies and managed on their behalf by the Board.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

The AOF investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle" and applicable investment restrictions of the participants. The AOF portfolio includes securities classified as corporate asset-backed, other corporate, US government mortgage-backed, US government, Yankee bonds, equity index, venture capital, leveraged buy-outs, real estate, mortgages and loans. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. US government mortgage-backed securities reflect participation in a pool of residential mortgages. US government securities include direct obligations of the US Treasury and indirect obligations of the US

government. Yankee bonds are US dollar denominated bonds issued by foreign corporations and governments and US companies issuing debt in foreign markets. Equity index investments are investments in selected mutual funds whose equity portfolios match a broad based index or composite. In May 2000, the Board made its initial equity index investment in the S&P 500 Equity Index Fund A followed by the subsequent investment in Fund B in January 2001. Venture capital represents private equity investments in early stage financing of rapidly growing companies with an innovative product or service. Leveraged buy-outs (LBO's) permit an investment group to acquire a company by leveraging debt, as a financing technique, to establish a significant ownership position on behalf of the company's current management team.

Effective May 1, 2002, all the venture capital and leveraged buyout investments totaling \$159,799,310, at cost, were transferred to the new Montana Private Equity Pool (MPEP). These investments were held by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

Investments are presented in the Statement of Net Investments Managed at fair value. Fair values for publicly traded securities are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank and Trust. The real estate investments and residential and multi-family mortgages are valued based on a discounted cash flow. The commercial in-state coal tax loans and the nonparticipating repurchase agreements are reported at amortized cost. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

#### Broker Receivable/Payable

All Other Funds security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the AOF portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

#### Montana Mortgages and Loans Receivable

The Montana mortgages and loans receivable, included in the Net Investments Managed at Fair Value, represent residential mortgages and multifamily commercial loans funded by the Public Employees' and Teachers' pension funds and other loans funded by the Coal Severance Tax Trust fund. The Coal Severance Tax Trust loan portfolio includes loans made by the Montana Science and Technology Alliance (MSTA) Board. The MSTA Board was abolished on July 1, 1999 and by law, the MSTA portfolio was assigned to the Board of Investments (BOI). (See Note 7 for the Montana mortgages and loans portfolio.)

As of June 30, 2002 and 2001, there were no uncollectible account balances for Montana mortgages and loans receivable.

However, during fiscal year 2002, the Board of Investments staff wrote off loan principal balances detailed as follows:

<u>Borrower</u>	<u>Funding Source</u>	<u>Funding Date</u>	<u>Funding Amount</u>	<u>Charge-off Date</u>	<u>Charge-off Amount</u>
Pasta Montana, L.L.C.	BOI	February 1999	\$ 5,468,337	September 2001	\$ 206,599
Pasta Montana, L.L.C.	MSTA	January 1997	350,000	September 2001	12,551
Pasta Montana, L.L.C.	MSTA	January 1997	500,000	September 2001	19,803
Nuture, Inc.	MSTA	July 1989-June 1995	1,100,000	June 2002	505,213
Optima Industries, Inc.	MSTA	Dec 1991-Jan 1994	700,000	June 2002	560,500
Ultrafem, Inc.	MSTA	Dec 1991-Oct 1992	<u>700,000</u>	June 2002	<u>490,302</u>
<b>Total</b>			\$ <u>8,818,337</u>		\$ <u>1,794,968</u>

### Investment Income

Investment income reported in the Statement of Net Investment Income includes fixed income and mortgage interest earnings, real estate income, private equity income through April 30, 2002, commercial loan interest earnings and commitment fees.

### Realized Gain on Sales

Realized gain on sales reported in the Statement of Net Investment Income represents the net gain/loss resulting from the sale of fixed income, private equity and pool investments. In fiscal year 2002, the sale of pool units from the Montana Stock Pool (MTCP), Trust Funds Bond Pool (TFBP), and the Retirement Funds Bond Pool (RFBP) generated a net gain to participants of \$14,001,245. The sale of pool units in fiscal year 2001 from the Montana Stock Pool, Montana Real Estate Investment Pool (MTRP), Retirement Funds Bond Pool and Trust Funds Bond Pool resulted in a net gain to participants of \$127,877,821. Of this gain, \$66.1 million is attributed to the sale of MTRP participant units resulting from the MTRP pool closure and \$60.1 million relates to an asset allocation investment decision to sell MTCP units.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2002 and 2001, State Street Bank lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2002 and 2001 on the amount of the loans that State Street Bank made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2002 and 2001. Moreover, there were no losses during fiscal years 2002 and 2001 resulting from a default of the borrowers or State Street Bank.

During fiscal years 2002 and 2001, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2002 and June 30, 2001, the Board had no credit risk exposure to borrowers.

As of June 30, 2002, the carrying and fair value of the underlying securities on loan for the All Other Funds was \$101,344,163 and \$106,533,000, respectively. The collateral provided for the securities on loan totaled \$109,960,231 in cash collateral.

As of June 30, 2001, the carrying and fair value of the underlying securities on loan for the All Other Funds was \$106,324,791 and \$111,818,481, respectively. The collateral provided for the securities on loan totaled \$116,327,019 in cash collateral.

### 4. COAL TAX LOAN AND MORTGAGE COMMITMENTS

The Board makes firm commitments to fund loans from the Coal Severance Tax Trust fund. These commitments have expiration dates and may be extended according to the Board's policies. As of June 30, 2002 and 2001, the Board committed to purchase loans from Montana lenders totaling \$81,172,614 and \$40,512,725, respectively. Forward reservations for June 30, 2002 and 2001 amounted to \$89,331,230 and \$84,382,216, respectively.

The Board makes firm commitments to fund mortgages from the Public Employees' and Teachers' retirement funds. As of June 30, 2002 and 2001, respectively, the Board committed to purchase mortgages from Montana lenders totaling \$10,634,477 and \$36,233,710. Forward reservations totaled \$11,622,197 and \$20,643,231 as of June 30, 2002 and 2001, respectively.

5. PENSION FUND REAL ESTATE INVESTMENTS

**100 North Park Building**

In January 1996, the Board, on behalf of the Public Employees' and Teachers' Retirement funds, purchased the 100 North Park Avenue Building in Helena, Montana as a real estate investment. Acquired for a cost of \$4,864,326, the building carries a fair value of \$5,344,000 as of June 30, 2002 and 2001. Building improvements and elevator renovations totaling \$612,127 were added to the cost of the building in fiscal year 2002. During fiscal year 2001, building improvements and leasing fees totaling \$37,341 were added to the cost of the building. The three-story building provides office space for approximately eight to ten tenants.

**2401 Colonial Drive Building**

In August 1997, the Board authorized the construction of an office building, as a real estate investment owned equally by the Public Employees' and Teachers' Retirement funds. Construction costs, including interest capitalization, totaled \$6,481,741 as of June 30, 2000. In fiscal year 2002, landscaping and leasing fees of \$153,452 were added to the building cost. For fiscal year 2001, an additional \$196,245 was expended on building landscaping, lighting and construction. The three-story building, providing office space for three tenants, was occupied in November 1999. As of June 30, 2002, the building carries a cost and fair value of \$6,831,438 and \$7,581,770, respectively.

The schedule below details the minimum future rentals for both buildings on the non-cancelable operating leases as of June 30, 2002 and 2001:

**Minimum future rentals for the year ending June 30, 2002:**

<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008+</u>	<u>Total</u>
\$945,147	\$194,572	\$134,601	\$134,601	\$134,601	\$44,867	\$1,588,389

**Minimum future rentals for the year ending June 30, 2001:**

<u>2002</u>	<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007+</u>	<u>Total</u>
\$1,041,840	\$945,147	\$194,572	\$134,601	\$134,601	\$179,468	\$2,630,229

**California Street Property**

In December 1998, the Board acquired a parcel of land adjacent to the Colonial Drive building to provide for additional parking. This land was purchased for \$204,835.

**Bozeman Office Building**

In August 1999, the Board authorized the purchase of a new office building in Bozeman, Montana. When construction is complete, this building will be a real estate investment owned equally by the Public Employees' and Teachers' Retirement funds. The building will be occupied by four state agencies and is located on state school trust land. Construction is scheduled to begin in April 2003.

**Ninth Avenue Building**

In November 2000, the Board reviewed the transfer of the Public Employees' Retirement Administration (PERA) office building, located at 1712 Ninth Avenue, Helena, to the Board of Investments. By issuance of a corrective deed, the Board of Investments was named owner and building manager for the use and benefit of the PERA. During fiscal year 2002, architect fees, remodeling construction and interest capitalization totaling \$220,097 were added to the building cost for a yearend book value of \$328,708. As of June 30, 2002, the building carries an appraised value of \$470,000.

6. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below and on the next page to give an indication of the level of risk assumed at June 30, 2002 and June 30, 2001. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral. Long-term investments are carried at amortized cost and short-term investments are carried at original cost.

Risk as of June 30, 2002

\*At June 30, 2001, these underlying securities, with fair values of \$111,818,481 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the fixed income instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires AOF fixed income investments, at the time of purchase, to be rated an investment grade as defined by Moody's and Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

Corporate asset-backed securities are based on cash flows from principal and interest payments on underlying auto loan receivables, credit card receivables, and other assets. These securities, while sensitive to prepayments due to interest rate changes, have less credit risk than securities not backed by pledged assets. Market risk is also less because principal is paid back prior to the maturity date of the securities.

As of June 30, 2001, Service Corp. presented a credit risk to the Board. The AOF portfolio held a \$5 million par, 6% Service Corp. bond maturing December 15, 2005. By February 2001, both the Moody's and S&P bond rating agencies downgraded the bond ratings for this issue below investment grade. The December 31, 2000 book value of \$4,807,240 was reduced to \$4,000,000 as of June 30, 2001. In April 2002, this bond was sold, on the market, for \$4,752,500 including interest.

As of June 30, 2002, Enron Corp. presented a legal and higher credit risk to the Board. The AOF portfolio holds a \$3 million par 6.75% Enron bond maturing August 1, 2009. The Enron Corp. filed for Chapter 11 bankruptcy protection on December 12, 2001. Accordingly, the November 2001 book value was reduced from \$2,610,000 to \$600,000 as of June 30, 2002. The Board, currently, anticipates receiving up to \$600,000 from bankruptcy claims.

## 7. MONTANA MORTGAGES AND LOANS

The Montana mortgages and loans portfolio is shown below.

<u>Montana Morgtages and Loans</u>	<u>2002 Book Value</u>	<u>2001 Book Value</u>
<b>Multifamily Commercial Loans</b>	\$ 14,555,217	\$ 14,803,164
<b>Residential Mortgages</b>	<b>309,482,740</b>	<b>266,403,735</b>
Science and Technology Alliance*	14,733,670	17,187,636
Department of Natural Resources**	46,366,904	0
Department of Justice	1,827,000	1,517,000
Montana Facility Finance	1,636,510	1,010,249
Local Government Infrastructure	10,289,391	7,466,404
Value-added Loans	6,627,953	2,894,117
Commercial Loans	<u>150,993,503</u>	<u>134,549,801</u>
<b>Permanent Coal Trust Loans</b>	<b>232,474,931</b>	<b>164,625,207</b>
<b>Total Montana Mortgages and Loans</b>	<b>\$ 556,512,888</b>	<b>\$ 445,832,106</b>

\* The Montana Science and Technology Alliance (MSTA) loans include funding for research and development, mezzanine and seed capital loans.

\*\*In accordance with Senate Bill 495 enacted by the 2001 Legislature, the Coal Severance Tax Permanent Trust loaned 483,604 TFBP shares, with a book value of \$46,366,904, to the Department of Natural Resources, Trust and Legacy fund on July 2, 2001. The loan proceeds were deposited in the Trust and Legacy Fund. A loan receivable was recorded in the Coal Severance Tax Permanent Trust and a corresponding liability was recorded in the Guarantee Fund, a General Fund sub-fund. The August 2002 Special Legislative Session approved the request to record this activity in a state special revenue fund of the Office of Public Instruction rather than in the Guarantee Fund.

## 8. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$2 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25, 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$215,453 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$2,273,230 in principal and interest plus \$60,000 as a consent fee.

## 9. LOAN GUARANTEES

As of June 30, 2002, loan guarantees provided by the Coal Severance Tax Permanent Trust to the Enterprise Fund and the Facility Finance Authority, formerly known as the Montana Health Facility Authority, total \$97,218,949. Board of Investment exposure to bond issues of the Enterprise Fund is \$60,335,799 while exposure to bond issues and surety bonds of the Facility Finance Authority is \$36,883,150.

As of June 30, 2001, loan guarantees provided by the Coal Severance Tax Permanent Trust to the Enterprise Fund and the Facility Finance Authority, formerly known as the Montana Health Facility Authority, totaled \$94,605,355. Board of Investment exposure to bond issues of the Enterprise Fund was \$61,447,205 while exposure to bond issues and surety bonds of the Facility Finance Authority was \$33,158,150.

# LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

## INDEPENDENT AUDITOR'S REPORT

To the Members of the Montana  
Board of Investments:

We have audited the accompanying State of Net Assets of the Enterprise Fund of the state of Montana Board of Investments as of June 30, 2002, and 2001, and the related Statement of Revenues, Expenses, and Changes in Fund Net Assets and Statement of Cash Flows for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in note 1, the financial statements present only the Enterprise Fund of the Montana Board of Investments and are not intended to present fairly the financial position, results of operations and cash flows of the state of Montana in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the state of Montana Board of Investments' Enterprise Fund as of June 30, 2002, and 2001, and the results of its operations and cash flows of its Enterprise Fund for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

(Signature on File)

James Gillett, CPA  
Deputy Legislative Auditor

November 12, 2002
