INTRODUCTION

The Montana Board of Investments (Board) is honored to submit its Annual Report for the fiscal year ended June 30, 2003. This report, required by law, discloses investment performance for the past fiscal year, summarizes the in-state investment activities of the Board, and provides public access to audited financial statements. Unless otherwise noted, all references to years in this report are state fiscal years beginning July 1 and ending June 30.

General Board Responsibilities

Unified Investment Program - Article VIII, Section 13 of the Montana Constitution requires that the legislature provide for a unified investment program for public funds and that the program be audited annually. Section 17-6-201, MCA established the unified investment program, created the Board, and gave the Board sole authority to invest state funds in accordance with state law and the state Constitution. State law requires that the Board operate under the "prudent expert principle," defined as: 1) discharging its duties with the care, skill, prudence, and diligence that a prudent person acting in a like capacity with the same resources and familiar with like matters exercises in the conduct of an enterprise of a like character with like aims; 2) diversifying the holdings of each fund to minimize the risk of loss and maximize the rate of return; and 3) discharging its duties solely in the interest of and for the benefit of the funds managed.

Prior to the Board's assumption of the state's investment program, state funds were invested by individual state agency staff, usually on a part-time basis. The creation of the Board in 1972 permitted a full-time professional investment staff to invest all state and (at the discretion of local governments) local government funds. At its first meeting in August 1971 the Board established four major goals:

- to centralize the state's investments;
- to invest the state's idle cash;
- to increase earnings on the state's investments; and
- to establish a sound system of control over the investment process, including provisions for systematic financial reporting, measurement of investment results, and a regular independent audit.

The unified investment program has grown from a book value of \$321 million at year-end 1972 to a book value of \$8.5 billion at year-end 2003 - an annual average increase of 11.2 percent. During the same period, the number of accounts invested by the Board increased from 40 accounts to 544 accounts.

In-State Investments - In addition to the Board's primary role of managing the state's unified investment program, the legislature has encouraged the Board to assist in Montana's economic development. Montana law (17-6-304, MCA) states that the "objectives for investment of the Permanent Coal Tax Trust Fund are to diversify, strengthen, and stabilize the Montana economy, and to increase Montana employment and business opportunities while maintaining and improving a clean and healthful environment. " Section 17-6-305, MCA, states that "the Board shall endeavor to invest up to 25 percent of the Permanent Coal Tax Trust Fund . . . in the Montana economy, with special emphasis on investments in new or expanding locally owned enterprises." In recent years the Legislature has created two new loan programs - the "Infrastructure and Value-Added Loan Programs – and set aside \$50.0 million of the Trust for each program.

Commercial/Infrastructure/Value-Added Loans - The Board manages these programs in conformance with the "prudent expert principle" and does not invest solely to improve Montana's economy. Operating the in-state investment program under the "prudent expert principle" has not prevented the Board from investing millions of the Trust to spur Montana's economy. Since the program's inception in 1984 through 2003, the Board has funded 1,107 loans totaling \$398.1 million in 43 of Montana's 56 counties. Loans funded by county are shown on Page 54.

Mortgages - The Board also purchases Montana mortgages with pension funds as a part of the in-state investment program. At year-end 2003 the Board held 3,053 mortgages with total book values of \$205.9 million in 55 of Montana's 56 counties - a decrease from the 4,360 mortgages valued at \$324.0 million held at year-end 2002. The Board serves as a secondary market to qualified financial institutions in the in-state investment programs and does not lend directly to borrowers. Outstanding mortgages by county are shown on Page 52.

Bond Program - As a part of the Board's in-state investment activities, it also sells bonds and lends the proceeds to eligible governments for a variety of projects. Loan terms range from one to ten years, and short-term loans to finance cash flow deficits or bridge financing are also available. Both the bond program and the in-state investment program, funded from the Permanent Coal Tax Trust, were created in fiscal year 1984 as part of the "Build Montana" program. Since the program's inception, \$166.0 million has been loaned to eligible governments. Additional information on the Bond Program is shown on Page 56.

Securities Lending - Section 17-1-113, MCA, authorizes the Board to lend securities held by the state. Investment firms borrow securities to cover short positions, failed deliveries, arbitrage trades, and other brokerage activities. In recent years the Board has lent securities to qualified borrowers who pass rigorous tests and meet high standards for credit quality. Although state law requires that securities on loan be collateralized at least 100 percent, the Board requires borrowers to maintain collateral at 102 percent for domestic securities and 105 percent for international securities. To ensure that the collateral ratio is maintained, securities on loan are marked to market daily and the borrower must provide additional collateral if the value of the securities on loan increases. In addition to the strict collateral requirements imposed by the Board, the credit quality of approved borrowers is monitored continuously.

State Street Bank and Trust, the state's custodial bank, manages the state's securities lending program and retains 25 percent of the income generated as compensation for managing the program. The state earned \$934,933 of securities lending income in 2003, compared to \$1.8 million in 2002. Because this program is demand driven by the markets, earnings are volatile.

Board Operations

Board Staff - The Board, comprised of nine members appointed by the Governor to staggered four-year terms, employs a Chief Investment Officer and an Executive Director who hire staff as authorized by the legislature. The current authorized staffing level of 34 full-time equivalents consists of two positions hired by the Board, plus 17 investment staff, six accounting staff, three bond program staff, and six support staff. Board staff also provides administrative support to the Montana Facility Finance Authority. Except for private equity, some international stock, and equity index investments, the unified investment program is managed entirely by Board staff.

Board Administrative Costs - The investment portion of Board operations is funded by administrative charges against the funds it invests, while the bond program is primarily funded by the "spread" between the interest paid on bonds issued and interest received on loans made. Effective in 1998, the Legislature sets the maximum fees the Board may charge in the investment program. Board management fees in 2003 were 3.7 basis points of the average fair market value of internally managed portfolios. Custodial bank fees were less than 1 basis point of the Total Fund's average fair market value.

Board Policies and Procedures

Investment Policies - The Board adopts an investment policy for each individual fund it invests, except for funds investing in STIP only. The policies are tailored to the specific needs of the fund and are implemented only after consultation with the administrators of the funds. Asset allocations and investment time horizons are established by policy, as are the benchmarks against which investment performance is measured.

Benchmarks - The Board establishes appropriate benchmarks for each asset class and the Custodial Bank develops a composite benchmark for each fund that parallels the fund's asset allocation at market value.

Board Meetings - Board meetings are held at approximate six-week intervals. Meeting dates, agenda, and minutes are posted on the Board's web page at www.investmentmt.com. All Board decisions are discussed and voted on in meetings open to the public.

Report Content

This report contains historical data from 1972 (the first fiscal year the Board managed the unified investment program) through 2003. All historical data were extracted from the Board's annual published reports. Statistical data are provided on the Board's investment activity in 2003 and changes in investments from 2002. Appendix A includes income generated by account and securities portfolios for all accounts managed by the Board. Appendix B contains the Board's audited financial statements with accompanying portfolios. The financial statements provide detailed information on the investment pools, the "all other funds" account, and the Bond Program.

Report Terminology

Book Values of fixed-income investments represent the securities' par values, plus or minus amortized premiums or discounts. Book value of equity securities is the average cost of the securities at the time of purchase.

Fair Market Values reflect the value of securities on June 30 as priced by the Custodial Bank, or other sources.

Net Asset Value (NAV) as it relates to Investment Pools reflects the fair value of the pool securities, adjusted for payables, receivables, and cash on hand at year end. The aggregate fair value of the pool units held by pool participants equals the NAV of the pool.

Income Return utilizes actual invested balances and investment income as recorded in the state accounting system. The calculation divides the annual net income by one-half the sum of the beginning and ending invested balances. The income includes interest, dividends, amortization of premiums/discounts, securities lending income, and distributed realized gain/loss. The calculation is performed by Board staff. Income return does not consider any change in the fair market value of the portfolio during the period.

Total Rates of Return, calculated by the Custodial Bank, include all investment income and the unrealized gains/losses resulting from annual changes in the market value of investments, after cash flows are netted. For periods longer than one year the returns are compounded and annualized. The total rate of return is used by the Board to compare investment staff performance to various stock/bond indices selected by the Board.

Acronyms used in the annual report include those listed below:

- **STIP** Short Term Investment Pool
- **MDEP** Montana Domestic Equity Pool
- **MTIP** Montana International Stock Pool
- **MPEP** Montana Private Equity Pool
- **RFBP** Retirement Funds Bond Pool
- **TFBP** Trust Funds Bond Pool
- **NAV** Investment Pool Net Asset Value
- **PERS** Public Employees' Retirement System
- **TRS** Teachers' Retirement System
- **T&L** Trust and Legacy Account (School Trust)
- **RIT** Resource Indemnity Trust
- **FWP** Department of Fish, Wildlife, and Parks
- **DNRC** Department of Natural Resources & Conservation

ECONOMIC AND INVESTMENT OVERVIEW

Fiscal Year 2003 Review – A strong fourth quarter performance for the equity markets highlighted a rare year when investment returns for equities and fixed income instruments thrived. Record low interest rates propelled bond prices higher and optimism about future economic activity thrust the domestic stock market higher by about 20% in the fourth quarter of the year. Index highlights for the year included the following:

- The S&P 500 Index gained 0.3 percent due to a fourth quarter rally
- NASDAQ advanced 10.9 percent for the year
- MSCI Europe Index dropped 4.8 percent
- MSCI Custom Pacific Index dropped 6.0 percent
- The Lehman Aggregate Bond Index gained 10.4 percent

Portfolio performance was highlighted by bond investment returns in excess of 15 percent for the year versus the 10.4 percent return as measured by the Lehman Aggregate Index. The three-year investment return for long bonds exceeded 12 percent. Fixed income market returns were supported by an accommodative Federal Reserve Board (Fed) that continued to move short-term interest rates lower. Short-term treasury yields plunged further during the year as the target “fed funds” rate dropped another 75 basis points to 1.00 percent.

Inclusion of a blend of smaller company stocks managed externally from a newly initiated small-cap enhanced index portfolio and a two plus percent outperformance of the internally managed large cap portfolio resulted in a 2.1 percent return for domestic stocks, comfortably beating the 0.3 percent return of the S& P 500 or the 0.8 percent return of the Russell 3000.

Economic Conditions – Economic conditions were deteriorating early in the fiscal year as consumer confidence dropped from 106 in June to 79 in October of 2002 and industrial production was declining. The Fed moved decisively in October lowering interest rates by 50 basis points to stem the erosion of confidence. Industrial production and capacity utilization remained flat to down for the remainder of 2002. Monetary stimulus was supplemented by fiscal stimulus as another large tax cut was enacted by Congress in the spring of 2003. Despite modest advances in gross domestic product (GDP) numbers in the first two quarters of 2003, the economy was not advancing enough to register an increase in employment. Thus, the Fed in June 2003 dropped rates another 25 basis points to the lowest levels in nearly 50 years.

Investment Policy Considerations – Total assets managed by the Board of Investments under the Montana Unified Investment Program increased to a market value of \$9.0 billion during fiscal 2003. Pension fund assets grew to \$5.3 billion. At year end, equity securities in pension fund portfolios comprised 63 percent versus a target allocation of 65 percent. The Board continues to increase pension fund investments in equities and increased its equity diversification and risk reduction efforts by adding a passive element and in the most recent year, by investing in an enhanced small cap index fund.

The investment plan approved for the pension funds targets an increase in international equity investments from the current 9.2 percent allocation to 12.0 percent of the pension assets and an increase in private equity investments from the current 5.7 percent to 7.0 percent over the next two years with a corresponding reduction in the fixed income allocation. The domestic equity S&P 500 index portfolio, started in fiscal 2000, has grown in market value to \$662 million at fiscal year end representing 12.4 percent of pension assets or alternatively, about 26% of the total domestic equity assets. This portfolio is targeted to reach a maximum of 33 percent of the domestic equity assets in the next two years. The total domestic equity asset allocation is capped at 45.0 percent of the total pension fund portfolio, subject to rebalancing with a 5.0 percent buffer. Finally, the initial target for the small-cap enhanced index portfolio is about 5.0 percent of the total portfolio or 10.0 percent of total domestic equity assets.

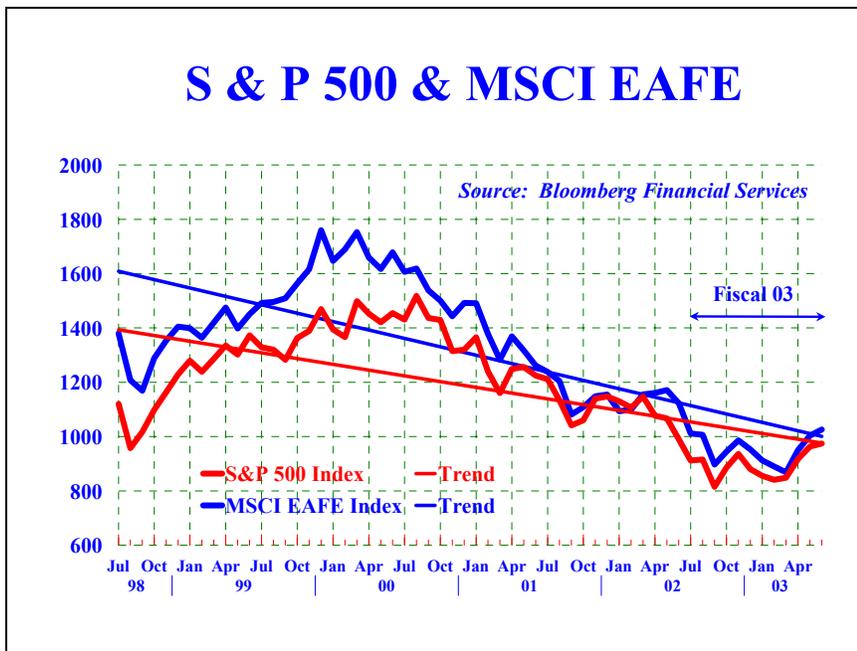

The State Fund received constitutional and legal authority by referendum in the fall of 2000 to invest up to 25.0 percent of its investment portfolio in equities at book value. A dollar cost averaging program in an S&P 500 Index Fund product was completed in June 2002 capping the portfolio at 12 percent. Additional equity investments may be added to the State Fund portfolio as the total portfolio grows to maintain a minimum 8 percent allocation to equities.

Over the last 75 years, long-term corporate bonds have returned *5.9 percent annually, long-term government bonds yielded *5.5 percent annually, and US treasury bills returned *3.8 percent annually. However, during the same 75-year period, equity investments in large company stocks returned 10.2 percent annually and equity investments in small company stocks have returned 12.1% annually. The average inflation rate for this same period was 3.0 percent. The state Constitution prohibits equity investments in non-pension funds such as the Permanent Coal Tax Trust Fund and the Trust and Legacy Fund.

*Source: Roger G. Ibbotson and Rex A. Sinquefeld, Stocks, Bills, and Inflation: The Past and the Future For Period Ending 12/31/2002.

EQUITIES

After two years of negative returns, domestic equity markets advanced ranging from a minuscule 0.3 percent return for the S&P 500 to a 10.9 percent advance for NASDAQ. The MSCI EAFE index declined 4.8 percent. A fourth quarter rally in the domestic stock market offset a dismal first half of the year. Investors took heart that the stimulus being provided by the Federal Reserve and the federal government would

ultimately be sufficient to bolster the economy and lead to restoration of corporate profit growth. The graph at left depicts the S&P 500 Index and MSCI EAFE (global equity index) values during the past five years.

Domestic Equities – Montana pension funds’ domestic equity allocation has grown from approximately \$219 million at the end of fiscal 1986 to \$2.6 billion today and represents 48.6 percent of the total pension fund portfolios. Despite generally declining market valuations over the last three years, the strategy to substantially increase the allocation to domestic equities

has helped the Montana pension funds improve their funding status by capturing the investment returns afforded equity market investors in the last ten years.

International Equities – The market value of International common stock investments increased by 5.8 percent to \$446.6 million at year-end excluding a nominal amount of American Depository Receipts in the Montana Common Stock Pool. International equity investments comprised 8.4 percent of the total pension fund portfolio at year-end and are targeted to grow to 12.0 percent of pension fund portfolios over the next two years. The Board’s composite international investment portfolio outperformed the MSCI EAFE benchmark by 408 basis points for the 5-year period returning a positive 0.4 percent versus a negative 3.7 percent for the benchmark index.

In March of 2003, the Board voted to divest French company stocks in the internally managed MSCI Europe fund and to change the benchmark for evaluating investment performance of the portfolio to a custom index of MSCI Europe – Ex France. (That decision was reversed in on October 30, 2003.)

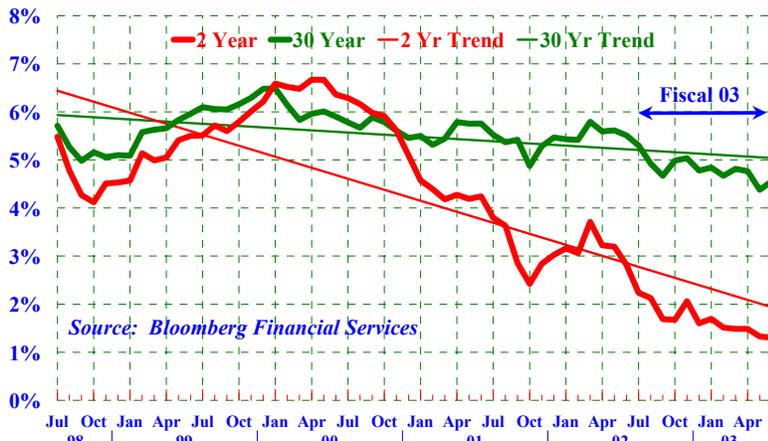

External money managers hired by the Board include SG Asset Management and Schroder Capital Management International for a Pacific Basin mandate (Asia plus Australia and New Zealand) and London based Pymford International for a MSCI Europe mandate. At year end Pacific Basin assets totaled \$186 million and externally managed MSCI Europe assets totaled \$151 million, including an initial \$41 million investment in a MSCI Europe passive portfolio. The remaining \$132 million of European assets were managed internally. The Board's custodian, State Street Bank & Trust of Boston, holds all international and domestic securities in custody.

Private Equities – On May 1, 2002 the individual private equities were transferred into the Montana Private Equity Pool (MPEP). The benchmark for MPEP is an annual return of 15 percent. Investment returns have exceeded the benchmark since inception despite only returning 4.7 percent for fiscal year 2003. Pension fund investments in private equity, currently 5.7 percent of pension fund portfolios, are targeted to grow to 7.0 percent in the next couple of years.

MPEP is invested in a fund of funds private equity portfolio managed by Adams Street Partners and a number of individual direct partnerships. The fund of funds portfolio is diversified by geographical area, by time, and by private equity type (LBO, venture capital, secondaries, distressed debt, etc.) in over 100 different partnerships with each partnership having a minimum of 8 to 12 separate investments. Individual partnership investments have been made with Welsh Carson Anderson Stowe (LBO), Madison Dearborn (LBO), Lexington (Secondaries), and Oaktree (Distressed Debt). The Oaktree investment was made in fiscal 2003 and early investment returns have been highly favorable.

Treasury Securities Yields

2 Year Note 10 Year Note 30 Year Bond

Source: Bloomberg Financial Services

FIXED INCOME

The U.S. bond market recorded one of its best years ever as bond yields reached levels not attained in over forty years. The 10-year treasury note traded at a low yield of 3.11% late in the fiscal year as the Fed maintained a highly accommodative monetary stance. The graph at left depicts the yields for the 2-year treasury and the 30-year treasury during the last five years. Short-term interest rates also reached 40-year lows during the year as the Fed moved aggressively to provide liquidity to the capital markets and prevent a deepening recession.

Domestic Fixed Income – The benefits of diversification were evident with the Trust Funds Bond Pool and Retirement Funds Bond Pool registering total rates of return of 15.9 percent and 14.5 percent respectively, surpassing the benchmark return of 10.4 for the Lehman Aggregate in a year that equity portfolios had difficulty generating a positive investment return. An accommodative Fed and prospects for an improved economy caused yields to fall and corporate spreads to treasury’s to tighten sharply from historical wide margins. These factors favored Montana’s traditional overweighting in corporate bonds resulting in extraordinary investment returns for the fixed income portfolios. Both pools are highly diversified with a core position in agency securities and an A- average credit rating.

Treasurer’s Fund & STIP (Cash Pool) – The Treasurer’s Fund is invested primarily in the Short Term Investment Pool (STIP). A small amount of the Treasurer’s Fund is invested in 1-3 year treasury or agency securities. STIP is Montana’s cash pool and is managed using the 2A-7 rules established for money market funds with a maximum maturity of 395 days. Both funds have investment criteria emphasizing safety and liquidity at all times.

In the most recent year the Treasurer’s fund government bond portfolio registered a total rate of return of 6.1 percent, significantly better than the 4.7 percent return of the Merrill Lynch U.S. Treasury 1-3 year index. The \$1.4 billion STIP fund had an investment return of 1.56 percent for the year, beating its benchmark, 105% of the 91-day treasury bill yield, of 1.48 percent. STIP provides liquidity for all state funds managed by the Board and for local governments.

IN-STATE INVESTMENTS

Residential Mortgages – Purchases of Montana residential mortgages in fiscal 2003 plummeted to just over \$19 million reflecting a portfolio strategy not to purchase residential mortgages yielding less than 6 percent.

The Residential Mortgage Loan portfolio peaked at \$328.2 million in April 2003 and has been declining rapidly as continued low interest rates have sustained a high level of refinancing activity. The Residential Mortgage Program will become more active when interest rates move closer to the pension funds current actuarial rate of 8 percent.

Commercial Loans – In-state investment activity during fiscal 2003 was highlighted by another near record year in commercial loan funding for the Coal Tax Trust. Purchases in fiscal 2003 totaled \$57.2 million, just

missing record volume for the fifth consecutive year by \$0.2 million. Commitments approved during the year totaled \$43.7 million. Outstanding commitments assure a strong year of funding new loans in fiscal 2004.

The total in-state investment portfolio peaked at \$197 million in January 2003 before refinancing activity reduced the loan portfolio to its year-end valuation of \$172.7 million. The refinancing activity remains high, a benefit to Montana businesses, but will slow the growth of the loan portfolio going forward.

Staff is actively engaged in marketing the State's economic development programs logging hundreds of miles across the State to assist approved lenders. Training continues to assure that qualified staff is available to meet business demands. Loan volume is dependent on the willingness of Montana's financial institutions to share their loan portfolio with the Board of Investments.

Value-Added Loans – The value-added loan program was created by the Legislature in 2000 to provide low cost financing to Montana businesses that add value to products and create or retain jobs.

The value-added loan portfolio has five outstanding loans totaling \$6.9 million and has committed to funding an additional four loans with a value of \$8.3 million for a total funded and committed of \$15.2 million of the \$50 million allocated to the program by the Legislature.

Infrastructure Loans – The infrastructure loan program was created by the Legislature in 1995 to enhance economic development and create jobs in the basic sector of the economy. The loan proceeds must be used to build infrastructure that will allow the location or creation of a business in Montana. The loan must be made to a local government that will create the necessary infrastructure. The local government receiving the loan may charge fees to the users of the infrastructure.

The infrastructure loan portfolio has five outstanding loans totaling \$9.0 million of the \$50 million allocated to the program by the Legislature.

Bond Guarantees – The Coal Tax Trust also provides guarantees of \$74.4 million for INTERCAP bonds, guarantees \$34.1 million of Montana Facility Finance Authority MFFA (formerly Montana Health Facility Authority) bonds, provides surety bonds for pre-release facilities, and provides a \$1 million letter of credit for the Rimrock Foundation, for a total of \$110.5 million in guarantees and surety bonds. Over \$297 million of previous INTERCAP and MHFA issues have matured since the guarantee program was initiated. These programs benefit local governments, health facilities, and pre-release facilities in Montana respectively by providing economical financing.

The table on the next page shows In-State investments for 2002 and 2003.

(In Millions)

TOTAL FUND

The Total Fund is comprised of all funds invested by the Board.

Fund types invested include pensions, trusts, insurance, debt service, state agency and higher education operating accounts, and local government funds.

Unless otherwise provided by law, the Board must invest all state funds. Local governments may invest funds with the Board at their discretion.

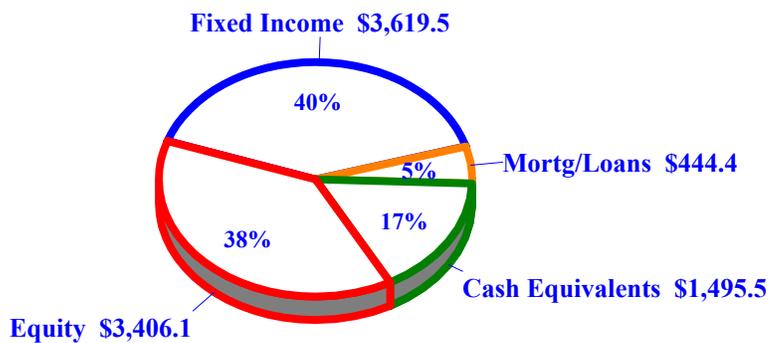

At June 30, 2003 the fair value of the Total Fund was \$8.97 billion compared to \$8.64 billion a year earlier. The increase was primarily attributable to increases in the fair value of investments held in the various portfolios. Fair values reflect the value of securities on June 30 as priced by the custodial bank, or other sources.

During the year the Board invested 544 individual accounts, consisting of 352 state agency accounts and 192 local government

(In Millions)

RETIREMENT FUNDS BOND POOL (RFBP)

On April 1, 1995, all fixed-income investments held by the nine pension funds were transferred to the newly-created Retirement Funds Bond Pool (RFBP). Each pension fund received shares in the pool equal in value to the fair value of its fixed-income portfolio on the date of the transfer.

The upper graph depicts the net asset value of the pool at June 30. The lower graph represents the fair value of the securities held by the pool. The difference in the net asset value and the securities held is the interest receivables included in the net asset value of the pool.

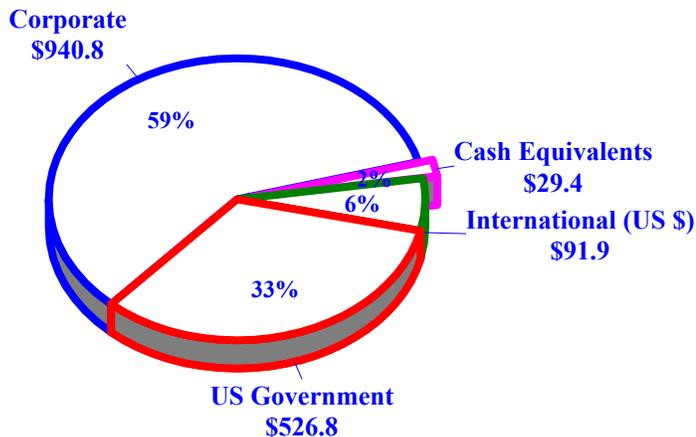

The RFBP distributed \$132.1 million in income to participants in 2003, compared to \$128.9 million in 2002. Income distributed includes, interest, discount/premium, and realized gains/losses.

The RFBP financial statements, which lists the

2003 TFBP By Investment

Fair Value Of Investments \$1.25 Billion

TRUST FUNDS BOND POOL (TFBP)

On October 1, 1995, all fixed-income investments held by the state's major trust funds were transferred to the newly-created Trust Funds Bond Pool (TFBP). Each trust fund received shares in the pool equal in value to the fair value of their fixed-income portfolio on the date of the transfer.

The upper graph depicts the net asset value of the pool at June 30. The lower graph represents the fair value of the securities held by the pool. The difference in the net asset value and the securities held is due to interest receivables and cash included in the net asset value.

The TFBP distributed \$81.3 million in income to participants in 2003, compared to \$83.5 million in 2002. Income distributed includes interest, discount/premium, and realized gains/losses.

The TFBP financial statement, which lists the

individual securities in the portfolio, is shown Page B-11 in Appendix B.

- Current income is important since it is distributed to participants.

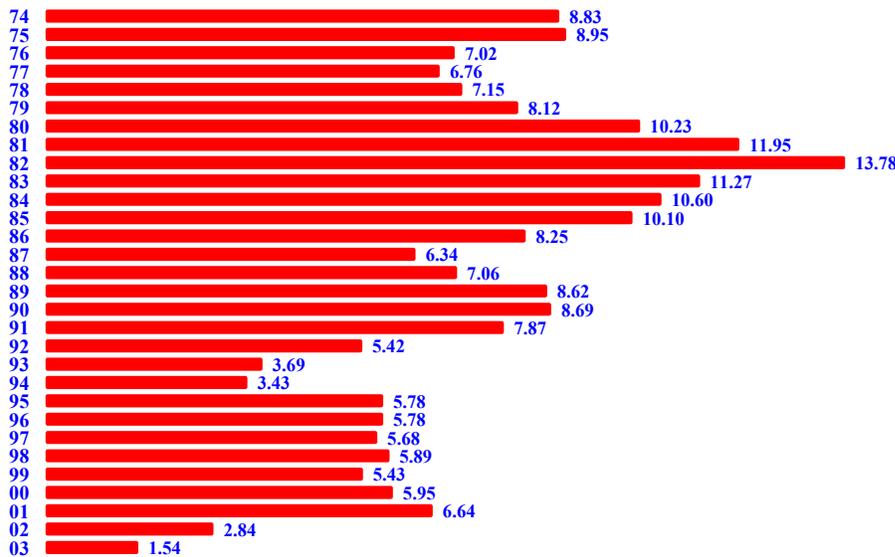

2003 STIP Participants

Net Asset Value Of Participant Units \$1.42 Billion

Annual STIP Yields

(In % Net of Management Fees)

SHORT TERM INVESTMENT POOL (STIP)

The Short Term Investment Pool (STIP), created in 1974, provides participants access to a short-term money market fund. Shares are fixed at \$1.00, fractional shares may be purchased, and participants may buy or sell shares with one business day's notice. Income is distributed on the first day of the month.

The upper graph depicts the net asset value of the pool at June. The lower graph shows the historical yield to participants based on distributed income after management and custody fees are deducted.

There were 544 accounts invested in STIP during the year, consisting of 352 state accounts and 192 local government accounts. The STIP distributed \$21.3 million to participants in 2003, compared to \$47.3 million in 2002.

The STIP financial statement, which lists the individual securities in the

portfolio, is shown on Page portfolio is listed on Page B-21 in Appendix B.

The tables on the next page show:

- The changes in Net Asset Value by major participant type,
- The book and fair value of the securities portfolio by major asset type, and
- The securities portfolio's total rate of return.

MONTANA DOMESTIC EQUITY POOL (MDEP)

The Montana Domestic Equity Pool (MDEP) was created in May 1, 2003, when all investments held in the Montana Common Stock Pool, the Standard and Poor's 500 Index Fund A and the Dimensional Fund Advisors US Small Cap Index were combined to create the pool.

The upper graph shows the net asset of the pool at June 30. The lower graph shows the fair value of investments held by active and passive management.

The MDEP distributed \$28.9 million to participants in 2003, compared to \$27.5 million in 2002. Income distributed includes only dividends. All realized capital gains and losses are retained in the pool.

The MDEP financial statement, which lists the individual securities in the portfolio, is shown on Page B – 27 in Appendix B.

The tables on the following pages show:

- The 10-largest holdings in the actively-managed portfolio,
- Changes in the fair value of the securities portfolio by sector,
- The book value and fair value of the securities portfolio, and
- The active-managed securities portfolio's total rate of return.

(In Millions)

MONTANA INTERNATIONAL STOCK POOL (MTIP)

The Montana International Equity Pool (MTIP) was created during 1997 when the nine pension funds purchased pool shares to fund investments in international stock. Cash dividends, interest and related income currency gains/losses are distributed monthly.

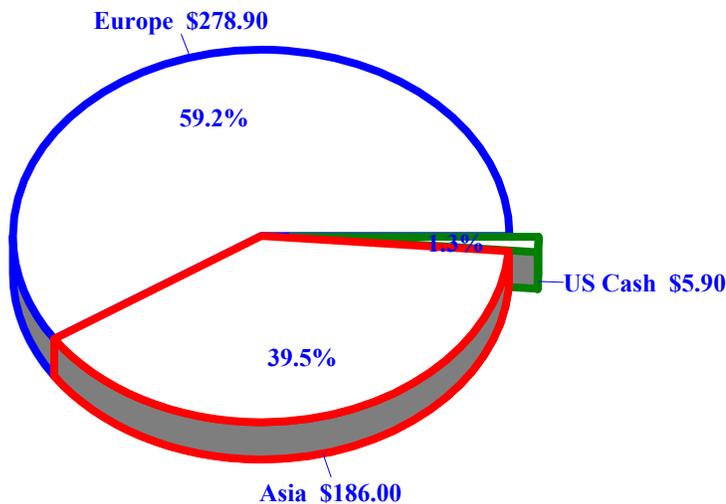

The upper graph depicts the net asset value of the pool at June 30. The lower graph shows the fair value of the securities held by the pool by region.

The difference between the net asset value of the pool and the fair value of investments held is due to investments purchased but not yet paid for. Net asset value is reduced by the payable due for the purchase.

The MTIP distributed \$8.5 million to participants in 2003, compared to \$6.5 million in 2002. The MTIP financial statement, which

2003 MTIP By Investment

Fair Value of Investments \$470.7 Million

lists the individual securities in the portfolio, is shown on Page B-36 in Appendix B.

The tables on the following pages show:

- The investment managers and the fair value of their securities portfolios,
- The changes in securities fair value by country,
- The book and fair values of securities portfolios by country, and
- The total rates of return by actively-managed securities portfolio.

MONTANA PRIVATE EQUITY POOL (MPEP) The Montana Private Equity Pool was created on May 1, 2002 when all private equity investments held by the nine pension funds were transferred to the pool. Each pension fund received shares in the pool equal to the fair value of their private equity investments and also transferred cash to the pool to provide for investment purposes. The MPEP financial statement, which lists the portfolio, is shown on Page B-49 in Appendix B.

Private equity investments are participations in non-publicly traded equity ownership of a fund or operating company either directly or more commonly through a partnership. As of June 30, 2003, six private equity managers invested the pool's assets.

Adams Street Partners – A fund-of-fund investment manager, formerly, Brinson Partners offers a wide range of private equity capital investment alternatives.

Kolberg, Kravis & Roberts - A global leveraged-buyout firm organized in 1975 that seeks investment opportunities in a wide-range of industries.

Madison-Dearborn Partners - A private equity investment firm, founded in 1992 by the Principals of First Chicago Venture capital, that seeks growth equity transactions and management buyout opportunities in a wide range of industries.

Welsh Carson Anderson Stowe - A leveraged-buyout firm founded in 1979 focused on information services, communications and healthcare industries.

Lexington Partners - A global private equity firm, founded in 1994, specializing in secondary investments that provide liquidity to owners of domestic and international private equity limited partnerships. The firm also co-investments with other private equity sponsors and invests in newly-formed private equity partnerships.

Oaktree Capital Management – One of the oldest, largest, and most respected firms investing in distressed debt, high yield, and convertible securities markets. The Board invested \$75.0 million with the firm in September 2002.

The types of investments made by private equity managers generally fall into the following categories:

Private Equity – Private equity investments in funds or operating companies in an asset class other than cash, stocks, or fixed income securities and real estate.

Venture Capital – Equity or equity-like investments in companies that have undeveloped or developing products or revenue.

Leveraged Buy-Outs – Equity investments in public or private companies that purchase a significant portion or majority control of the company.

Mezzanine – Investments in the subordinated debt and/or equity of privately owned companies. The debt holder participates in equity appreciation through conversion features, such as rights, warrants, and/or options.

Special Situations – Includes: 1) investments in the exploration for oil and/or gas reserves or in the development of proven reserves; 2) investments in land to harvest timber; and 3) investments that have a special component usually related to geographical, economic, or social issues sometimes referred to as Economically Targeted Investments.

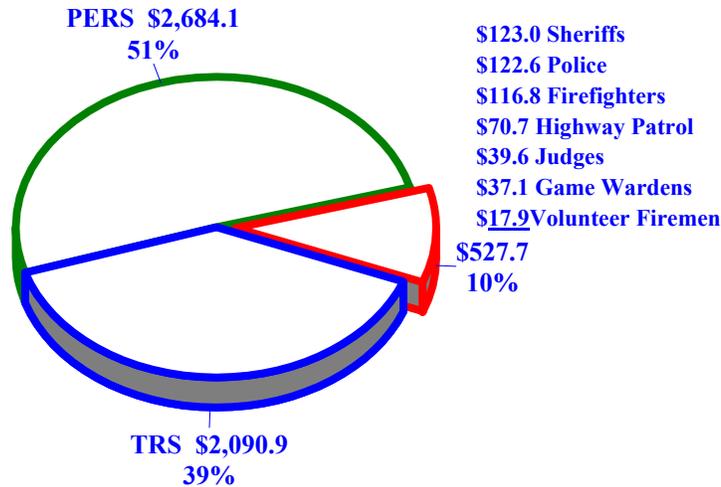

Secondary Investments – Investments in a previously-owned limited partnership or investment in previously owned limited partnership via a secondary fund.

Distressed Debt – Public and private debt of companies that appear unlikely to meet their financial obligations but are attractive to investors, not for repayment of interest and principal which are unlikely to be paid, but for the claim placed on the firm's value by unpaid creditors.

PENSION FUNDS

The upper Graph depicts the state's nine pension fund investment portfolios at fair value as of June 30.

The lower graph depicts total pension fund investments by major investment type.

By law, all public pension funds in the state, including local governments and school districts, are managed by the state. The Board of Investments manages all pension fund investments. Pension fund operations are administered by two boards appointed by the Governor.

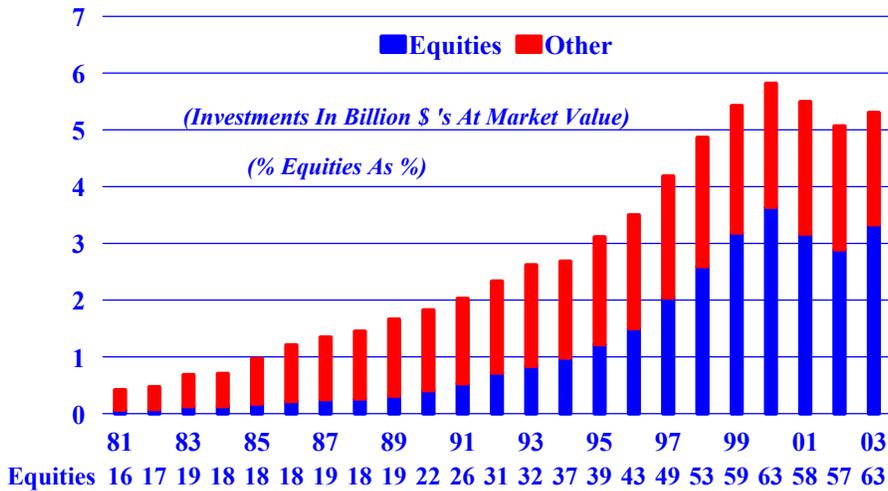

The Teachers' Retirement Board manages the Teachers' Retirement System, while the Public Employee Retirement Board manages the other eight systems.

As of June 30 approximately 96 percent of pension fund investments at fair value were managed in various investment pools created by the Board. These pools,

which operate similar to mutual funds, simplify investing and accounting, and provide broader diversification for the smaller funds. Income is distributed monthly to pool participants.

The pension funds earned \$232.2 million on their investments in 2003, compared to \$221.6 million in 2002. The total rate of return of each fund is shown in the individual pensions that follow.

Pension Equity Investments

The Board has increased pension investments in equities in recent years to increase the total rate of return. The current target is 65 percent of the fair value of pension investments.

The equity component of pension fund investments reached 63 percent at the end of fiscal 2002 prior to the decline in equity markets. The steep drop in equity prices reduced the equity allocation 57 percent in 2002.

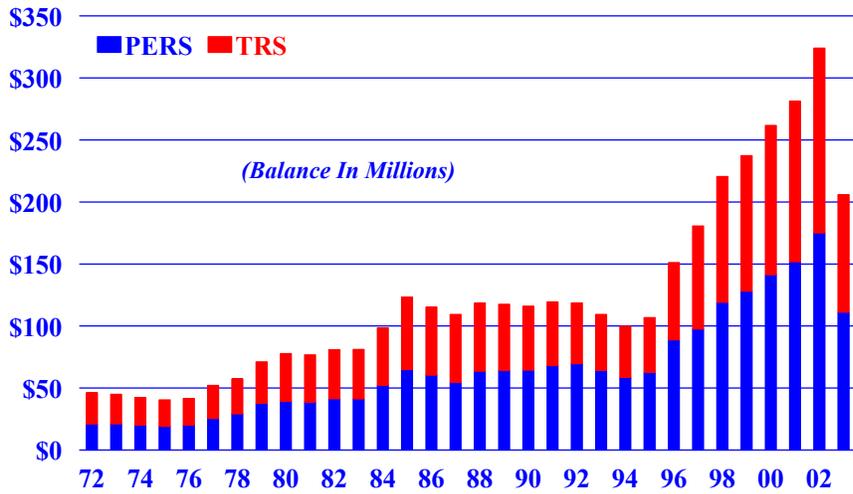

Declining equity prices reduced fair value of total pension fund investments from \$5.82 billion in 2000 to \$5.07 billion in 2002 as shown in the graph above.

During this period the Board actively sold fixed-income investments and invested the sale proceeds in the equity markets.

As a result of this rebalancing and a slight upward movement of the domestic equity markets pension fund equity investments once again reached 63 percent of total pension fund investments.

Pension Mortgages History

Outstanding Principal At Year-End

The Board has also significantly increased pension investments in Montana mortgages. Mortgage investments increased from \$106.7 million in 1995 to \$324.0 million in 2002 as shown in the lower graph. However, mortgage rates on the secondary market declined to less than 6 percent during 2003 and the Board declined to purchase mortgages for the pension funds at these rates. This policy, combined with heavy mortgage refinancings of mortgages in the portfolio caused a significant drop in the pension mortgage portfolio to \$205.9 million at year-end 2003.

TRUST FUNDS

The Board invests several trust funds, some of which are created and protected by the state constitution.

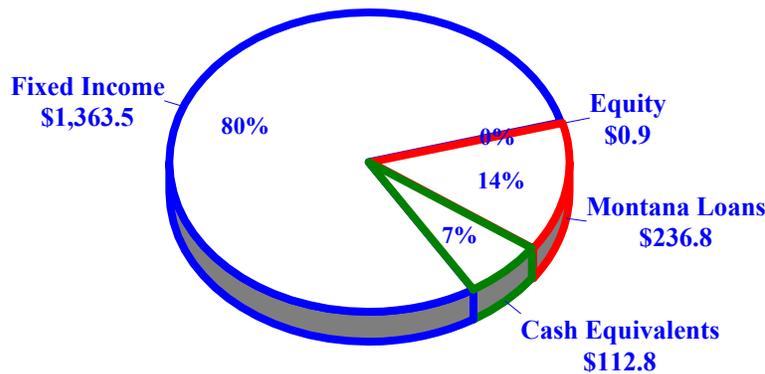

Other trusts have been created statutorily by the legislature or involve federal funds.

Several trust funds were established as a part of settlements between the state and private corporations to ensure environmental clean up of polluted sites.

(1) Includes Treasure State Endowment, Treasure State Water, CST Bond, and Permanent Income Accounts

A complete listing of individual trust fund investment portfolios is shown beginning on Page A – 6 in Appendix A. The investment income earned by each trust is shown beginning on Page A-1 in Appendix A.

COAL TAX TRUST FUND

Article IX, Section 5 of the state Constitution requires that 50 percent of all coal severance tax revenues be deposited in a permanent trust fund (Trust), in which the principal "shall forever remain inviolate unless appropriated by a three-fourths vote of each house" of the legislature. The Board is encouraged to invest up to 25 percent of the Trust in Montana businesses.

The legislature has partitioned the Trust into several sub-funds. The Permanent Fund was initially established when the Trust was created, while the Severance Tax Bond Fund, created later, provides debt service guarantees and is invested solely in STIP. The Treasure State Endowment Fund was created July 1, 1993, with a \$10.0 million transfer from the Permanent Fund. From July 1, 1993 through June 30, 1999 one-half of the coal severance tax earmarked for the Trust was deposited in the Permanent Fund and the remaining 50 percent was deposited in the Treasure State Endowment Fund.

Effective July 1, 1999, a new "Treasure State Endowment Regional Water Fund" sub-fund was created and 25 percent of Trust revenues dedicated to that account.

Income from the Permanent Fund and the two Bond Funds is deposited in the Permanent Fund Income Fund where it is swept periodically to the state General Fund. All sub-funds, except the income fund, are protected by the constitution and may be appropriated only by a three-fourths vote of each house of the legislature. Income from the Treasure State Endowment is appropriated by the Legislature for local government infrastructure projects. Treasure State Endowment Regional Water Fund income is appropriated by the Legislature for local government water projects.

The book values of the Coal Tax Trust sub-funds are shown below:

Coal Tax Trust Subfunds at June 30						
Subfund	2003 \$ Book Value	% of Total	2002 \$ Book Value	% of Total	\$ Change	% Change

The Resource Indemnity Trust Fund earned \$7.2 million in investment income in 2003, compared to \$7.3 million in 2002. The Resource Indemnity Trust Fund invested balances and investment income history are shown on Page A-21 in Appendix A.

COAL TAX PARKS/CULTURAL TRUST FUNDS

A portion of the coal severance tax is dedicated to a statutorily created Parks Trust Fund and a Cultural Trust Fund (Trusts). Investment income generated by the Trusts is appropriated by the legislature to acquire/operate state parks and to fund cultural and aesthetics projects. The 1997 Legislature appropriated \$3.9 million of Cultural Trust principal to Purchase Historical Properties.

The trusts earned \$1.4 million in investment income in 2003 and 2002. The invested balances and investment income history of these trusts are shown on Page A-22 in Appendix A.

OTHER TRUST FUNDS

Fish, Wildlife, and Parks (FWP) Mitigation Trust - expendable trust funds fish and wildlife mitigation/enhancements.

Abandoned Mine Trust - expendable trust funds abandoned mine reclamation.

FWP Real Property Trust - non-expendable trust funds operations, development, and maintenance of FWP real property.

Weed Control Trust - non-expendable \$2.5 million trust funds noxious weed control.

Wildlife Habitat Trust - funds acquisition/development/maintenance of wildlife habitat.

Montana Post and Pole Trust - funds environmental cleanup of the former Montana Pole and Treatment Plant in Butte.

Guaranteed Student Loan - the federal portion of student loan monies.

The UCFRB Funds represent proceeds from state settlements with the Atlantic Richfield Company for restoration of the Upper Clark Fork River Basin.

Streamside Tailing Funds are derived from a consent decree between the state and the Atlantic Richfield Company for remedial treatment of the Silver Bow Creek/Butte area.

Tobacco Trust – The nation’s largest tobacco companies are required to pay at least \$205.0 billion over the next 25 years to the states. Forty percent of Montana’s share is deposited in a trust fund.

Zortman/Landusky Funds were paid by the Pegasus mining company and its insurer to provide long-term water treatment at the closed Zortman and Landusky mines near Malta.

STATE FUND INSURANCE

The State Compensation Insurance Fund (State Fund) provides workers' compensation and occupational disease insurance for claims arising from injuries occurring on or after July 1, 1990. Effective on that date, the state's workers' compensation fund was divided into two funds with separate liabilities. The "old" fund retained all financial obligations for claims for injuries occurring prior to July 1, 1990, while the "new" fund assumed claim obligations for injuries occurring after that date.

OTHER INSURANCE FUNDS

Old Workers - Compensation Fund - pays claims for all injury claims occurring prior to July 1, 1990.
Group Insurance - created in 1981, provides health and life insurance to non-university state employees.

Subsequent Injury - provides benefits to workers who are vocationally handicapped and whose Workers' Compensation benefits have expired.

Hail Insurance - insures crops from hail damage. The entire account is currently held in STIP.

Other insurance programs whose investments are held solely in STIP include:

University Group Benefits.....	\$10,105,400
Uninsured Employers	506,675
Unemployment Insurance Benefits	2,153,090
<hr/>

TREASURER'S FUND

The Treasurer's Fund (Fund) is comprised of surplus cash in all state accounts that do not retain their investment earnings. All earnings are deposited in the State General Fund. State law authorizes the Board to determine the amount of surplus cash in the Fund to be invested and the type of investments to be made. Invested balances at book value vary widely due to varying levels of excess cash in the state's General Fund and other accounts comprising the Fund. This fund has been a major investor in STIP since 1974 when STIP was created. The "Other" category depicted in the graph consists of US Government securities and Repurchase Agreements.

The Treasurer's Fund earned \$6.4 million in investment income in 2003, compared to \$12.4 million in 2002. The Treasurer's Fund Portfolio is listed beginning on Page A-6 of Appendix A. The Treasurer's Fund invested balance and income history are shown on Page A-23 of Appendix A.

MONTANA RESIDENTIAL MORTGAGES

Pension Mortgages History

Outstanding Principal At Year-End

The Board invests pension funds in Montana mortgages by purchasing all or a portion of mortgages from qualified financial institutions. Interest rates are set weekly, based on quotes from the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, the two major US secondary mortgage markets. Financial institutions charge a fee for servicing the loans. The number and location of mortgages purchased by the Board depend upon the mortgage lending activities of individual financial institutions and their interest in the Board's mortgage program.

Montana Mortgages By Type Annual Change At June 30

Mortgage Type	2003	% Of	2002	% Of	\$	%
	Book Value	Total	Book Value	Total	Change	Change
Residential Conventional	145,672,381	70.8	243,057,286	75.0	(97,384,905)	(40.1)
Residential FHA	44,621,235	21.7	58,070,687	17.9	(13,449,452)	(23.2)
Residential VA	5,151,065	2.5	7,672,944	2.4	(2,521,879)	(32.9)
Multi-Family Conventional	1,986,337	1.0	4,217,356	1.3	(2,231,019)	(52.9)
Commercial	8,430,191	4.1	11,019,684	3.4	(2,589,493)	(23.5)
Total Mortgages	205,861,209	100.0	324,037,957	100.0	(118,176,748)	(36.5)

Mortgage rates on the secondary market declined to less than 6 percent during 2003 and the Board declined to purchase mortgages for the pension funds at these rates. This policy, combined with heavy mortgage refinancings of mortgages in the portfolio caused a significant drop in the pension mortgage portfolio during the year.

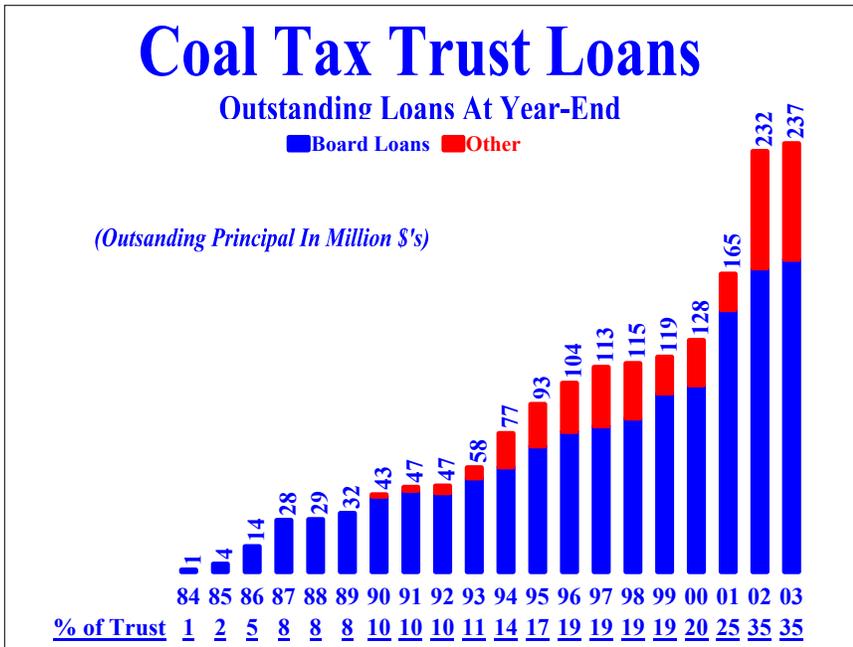

Loan Losses/Arrears - Pension Mortgage loans in arrears 90 or more days increased from .41 percent of total mortgage holdings at year end 2002 to .61 percent of mortgage holdings at year-end 2003. These arrears ratios compare to .85 percent and .79 percent, respectively for Montana* financial institutions during the period. The number of foreclosed properties remained at seven between year-end 2002 and year-end 2003. All mortgages are secured by single-family residential, multi-family residential, or commercial properties in Montana.

COAL TAX TRUST LOANS

Created in 1984 as part of the "Build Montana" program, this program invests Coal Tax Trust funds in Montana to stimulate the state's economy. State law authorizes the Board to invest the Trust to increase employment and business opportunities, while maintaining and improving the state's physical environment. The "other" portion of the graph is comprised of these loans:

- DNRC - \$46.4 Million
- Science & Tech - \$14.4 Million
- Dep. of Justice - 1.9 Million
- Facilities Finance - 1.5 Million

Loan Types – Five loans types are available in the In-State Investment Program, some of which offer a job credit interest rate reduction equal to 0.05 percent for each job created, up to a maximum reduction of 2.5 percent.

The Federal Guaranteed Loan Program purchases the guaranteed portion of loans, guaranteed by the Small Business Administration, the Bureau of Indian Affairs, the Rural Business and Cooperative Service, and the Economic Development Administration. Loan proceeds may be used for working capital, inventory, equipment, real property, or similar items. At year-end 2003, this Program had \$63.58 million in loan principal outstanding, or 36.8 percent of total outstanding Commercial Loan principal.

The Business Loan Participation Program purchases from originating financial institutions up to 80 percent of a participation loan. Unencumbered land, buildings, and equipment may be financed with the loan proceeds. The financial institutions charge a fee to service the loan and the Board's loan is collateralized proportionally to the Board's share of the loan. At year-end 2003, this Program had \$80.46 million in loan principal outstanding, or 46.6 percent of total outstanding Commercial Loan principal.

The Economic Development Linked Deposit Program offers businesses long-term, fixed-rate financing for working capital, inventory, or real property. The Board places a long-term deposit at a pre-established rate with the financial institution originating the loan. The lender assumes all loan risk and is assured a specific "spread" for the term of the loan. At year-end 2003, this Program had \$12.77 million in loan principal outstanding, or 7.4 percent of total outstanding Commercial Loan principal.

The Infrastructure Loan Program provides loans to eligible local governments for constructing infrastructure required by job creating businesses in their jurisdiction. At year-end 2003, this Program had \$9.05 million in loan principal outstanding. Total loans outstanding in this Program are limited by law to \$50.0 million.

The Value-added Loan Program provides low interest loans to value-added type businesses that create or retain jobs. At year-end 2003, this Program had \$6.85 million in loan principal outstanding. Total loans outstanding in this Program are limited by law to \$50.0 million.

Loan Yield - On June 30, 2003, the average weighted yield of all outstanding in-state investment loans, excluding Value-Added Loans whose interest rates are set by law, was 6.85 percent.

Loan Losses/Arrears – The number of loans in this program in arrears 90 or more days decreased from .20 percent of total outstanding loans at year-end 2002 to .08 percent of outstanding loans at year-end 2003. These arrears ratios compare to 1.20 percent and .80 percent, respectively for Montana* financial institutions during the period. There were no loans losses in 2003. A loan principal balance of \$206,599 was written off in 2002.

BOND PROGRAMS

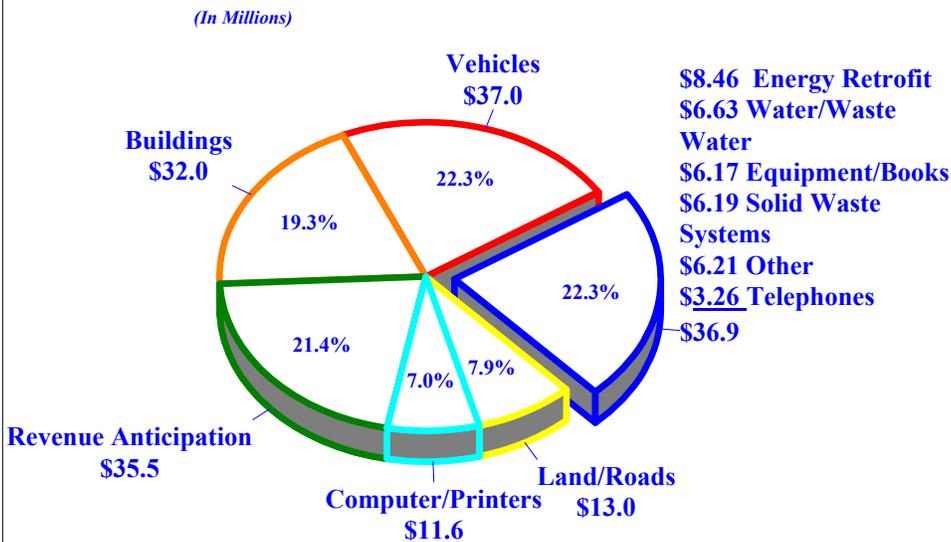

INTERCAP Loans From Inception By Borrower Type \$165.96 Million

INTERCAP - The Board administers several bond programs under the Montana Economic Development Bond and the Municipal Finance Consolidation Acts, created as part of the "Build Montana" program in 1984.

The INTERCAP program lends funds to eligible governments for a variety of purposes. The upper graph depicts the types of borrowers using the program since its inception. Since 1987, 370 eligible governments have received 888 loans, totaling \$165.96 million.

INTERCAP Loans From Inception By Project Type \$165.96 Million

The lower graph shows the types of projects for which loans were made since program inception. At June 30, 2003, there was \$52.77 million in outstanding loan balances.

INTERCAP loans are funded with proceeds from bonds issued by the Board. Since the program's inception, the Board has issued \$90.5 million in bonds with \$72.19 million outstanding at June 30, 2003.

Loan interest rates, which are reset each February 16 based on the interest on the bonds funding the loans, were set at 2.85 percent on February 16, 2003.

Other bond programs managed by the Board are:

- ***School District Pooled Refunding Program***

In 1991 the Board purchased general obligation refunding bonds of participating school districts, enabling the districts to refinance their outstanding bonds at a lower interest rate. The 16 school districts participating in this \$6.234 million bond issue saved a total of \$577,600 in interest over the life of the refunding bonds. Although this Program is inactive, it could be re-activated given sufficient demand.

- ***Pooled Irrigation Program***

Five irrigation districts participated in this Program that prepaid their outstanding loans to the federal Bureau of Reclamation. The Board issued bonds of \$4.976 million in 1988 to prepay \$15.6 million of non-interest bearing federal loans held by the districts. The Board lent the bond proceeds to the districts at an average 7.20 percent interest. Although the districts paid off non-interest federal loans with interest bearing loans, they saved a total of \$5.9 million, because the federal loans were prepaid at steep discounts, thereby significantly lowering the amount of principal owed by the districts.

- ***Qualified Zone Academy Bond Program (QZAB)***

This program allows qualifying school districts to borrow money at no or nominal interest rates by issuing qualified zone academy bonds. In December 2000 the Board issued \$750,000 for a school district to finance the costs of remodeling its existing school facilities. At June 30, 2003, there was \$750,000 in bonds outstanding.

Economic Development Bond Act

- ***Stand Alone Economic Development Bond Program***

This Program provides qualifying businesses access to tax-exempt funds and the Board has issued bonds to finance several projects. The Board acts as a legal funding conduit only and is not pecuniarily liable for the repayment of the bonds. Bonds outstanding as of June 30 are listed below:

<u>Project</u>	<u>Issue Date</u>	<u>Issue Amount</u>	<u>6/30/03 Balance</u>
Farmer's Union	08/85	3,925,000	3,925,000
Colstrip	10/89	60,800,000	57,300,000
BGI	07/93	118,345,000	117,345,000
Stillwater Mining	07/00	30,000,000	30,000,000
Gainey Foundation	10/02	6,000,000	6,000,000
Total		<u>219,070,000</u>	<u>214,570,000</u>

- ***Montana Conservation Reserve Payment (CRP) Enhancement Program***

This Program provides loans to Montana farmers to refinance outstanding loans and/or to purchase additional land and farm equipment. The borrowers assign their federal CRP contracts to the Board in exchange for a loan ranging from 60 percent to 75 percent of the remaining payments on the CRP contracts. When the Program began bonds were issued to provide funding for the loans. Recently, the loans have been funded from the Trust Fund Bond Pool as an investment. Loan interest rates are typically set at 0.50 higher than the interest set by the Trust Fund Bond Pool manager. A total of 229 loans, totaling \$30.03 million have been funded under this Program.

- ***Pooled Economic Development Bond Program***

This Program, inactive since 1986 due to federal tax law revisions, provided loans to small businesses to expand and improve their facilities. The Board funded the loans by issuing tax-exempt bonds. Except

for a pledge of revenues and a guaranty fund, the Board has no pecuniary liability under this Program. Although there are two loans outstanding in this program, the bonds issued to fund the loans have been repaid.

The Bond Program financial statements begin on Page 68 of Appendix B.

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Retirement Funds Bond Pool, as of June 30, 2003 and 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Retirement Funds Bond Pool, as of June 30, 2003 and 2002, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

November 4, 2003

STATE OF MONTANA BOARD OF INVESTMENTS
RETIREMENT FUNDS BOND POOL

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2003 AND 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Retirement Funds Bond Pool (RFBP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, to participate in a diversified pool. The RFBP was created on April 1, 1995, by the transfer of all fixed income and variable-rate securities owned by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

RFBP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The RFBP portfolio includes corporate asset-backed, other corporate, U.S. government mortgage-backed, government, Yankee securities and cash investments. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. U.S. government mortgage-backed securities reflect participation in a pool of residential mortgages. Government securities include direct and indirect obligations of the U.S. Treasury and state and local government bonds. Yankee bonds are U.S. dollar denominated bonds issued by foreign corporations and governments and U.S. companies issuing debt in foreign markets.

The RFBP portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Some RFBP REMICs are interest-only strips (IOs). Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. IOs receive cash flow from the interest payment component on underlying mortgage loans. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 6 for the Year End Portfolio.)

RFBP fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The variable-rate securities float with LIBOR (London Interbank Offered Rate) or the weighted average of the net mortgage interest rates for the mortgage loan group. The three variable-rate securities, with a total amortized cost of \$450,000 and \$700,000, respectively, as of June 30, 2003 and 2002, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 6 for the Year End Portfolio.)

The RFBP, as an internal investment pool, invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

Investments are presented in the Statement of Net Asset Value at fair value. Fair values are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

Participant Units

The Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all fixed income and variable-rate securities, at amortized cost, into the RFBP at the start-up date and were issued units according to the market value of each participant's portfolio. The initial unit value as of April 1, 1995, was \$100.00. Unit values thereafter are calculated weekly and at month end, based on portfolio pricing, to allow for participant transactions to occur as determined by the investment staff.

The June 30, 2003 unit value of \$110.84 increased from a June 30, 2002 unit value of \$103.56. Interest rates declined during the fiscal year by over one percent, which has the effect of increasing bond prices and the pool unit value. A one percent (1%) change in interest rates is expected to have a five to seven percent (5%-7%) inverse change in the unit value. RFBP investments are considered long-term in nature.

The Value of Units Sold by Participants of \$213.5 million for fiscal year 2003, as compared to \$169.2 million for fiscal year 2002 reflects the pension funds' portfolio rebalancing. RFBP units were sold to adjust the pension funds' portfolio towards the stated equity/fixed income asset allocation.

Broker Receivable/Payable

RFBP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the RFBP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

Other

Accumulated income, recorded as Income Due Participants, is distributed monthly on the first calendar day of each month. Realized portfolio gains/losses are distributed at least annually to the participants.

Investment income reported in the Statement of Investment Income and Distribution includes interest accruals, realized gains/losses, amortization/accretion and miscellaneous income.

Administrative expenses incurred by the Board are charged daily to RFBP based on the Board's expenses applicable to RFBP. These expenses include costs for the custodial bank contract.

3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

As of June 30, 2003, the carrying and fair values of the underlying securities on loan for the RFBP were \$63,891,788 and \$79,703,155 respectively. Cash collateral provided for the securities on loan totaled \$82,134,484.

As of June 30, 2002, the carrying and fair values of the underlying securities on loan for the RFBP were \$149,118,626 and \$165,121,529 respectively. Cash collateral provided for the securities on loan totaled \$171,445,667.

4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2003 and June 30, 2002. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2003

*At June 30, 2002, these underlying securities with fair values of \$165,121,529 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the above instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires RFBP investments, at the time of purchase, to be rated investment grade as defined by Moody's or Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the government mortgage-backed category, the RFBP portfolio holds REMICs totaling \$1,703,480 and \$2,503,357 in amortized cost, respectively, as of June 30, 2003 and June 30, 2002. These securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. The IOs are more sensitive to prepayments by mortgagees resulting from interest rate changes than other REMIC securities.

The IO REMIC securities purchased in August and September 1992 are being reduced periodically towards zero according to the expected average life of the underlying mortgages. The IO securities amortized cost is \$450,000 as of June 30, 2003 and \$700,000 as of June 30, 2002.

Corporate asset-backed securities represent debt securities collateralized by a pool of assets. The RFBP corporate asset-backed security is secured by lease payments and real estate. Credit risk for corporate asset backed securities is generally less than other corporate securities because assets are held by a third party.

As of June 30, 2003 and June 30, 2002, Enron Corp., and Burlington Industries, Inc. presented legal and higher credit risks to the Board.

The RFBP holds a \$7 million par 6.40% Enron bond maturing July 15, 2006 and a \$7 million par 6.95% Enron bond maturing July 15, 2028. The combined book value of these securities was \$13,582,030 as of November 30, 2001. On December 12, 2001, the Enron Corp. filed for Chapter 11 bankruptcy protection. Accordingly, the November 2001 book value for the two issues was reduced to \$5.6 million as of June 30, 2002. In October 2002, the book value was reduced to \$2.8 million for both issues. In July 2003, both issues were sold, on the market, for a total of \$2.36 million.

The Board owns a Burlington Industries, Inc., \$6 million par, 7.25% bond maturing September 15, 2005. In September 2000, the company announced a reduction of stockholders equity. Due to an increasing senior bank line and declining credit trend, the bond ratings for this issue were downgraded, in May 2001, by the Moody's and Standard & Poor's rating agencies. During fiscal year 2001, the book value of Burlington Industries Inc. was reduced from the August 31, 2000 book value of \$5,609,640 to \$2,400,000. Due to the company's filing for Chapter 11 bankruptcy protection on November 11, 2001, the book value was reduced to \$1,200,000. In October 2003, Burlington Industries, Inc. received court approval to sell its assets. This sale is expected to close in November 2003. Under the company's recovery plan, the Board will receive cash for its unsecured claim.

As of June 30, 2002, Rite Aid and WorldCom Inc. presented a higher credit risk to the Board.

The RFBP owned a Rite Aid \$7,000,000 par, 7.13% bond maturing January 15, 2007. In May 2000, the Board was subordinated to a secured bank line of credit on this issue and the bond ratings were downgraded by the Moody's and Standard & Poor's bond ratings agencies. Based on this subordination and ratings downgrade, the book value was reduced to \$5,600,000 as of June 30, 2000. During fiscal year 2001, the book value was further reduced to \$5,220,172. Due to an improving credit trend, amortization was resumed in June 2001. The book value of this security at June 30, 2002 was \$5,541,139. As of June 30, 2002, Rite Aid did not represent a credit risk. In December 2002, this bond was sold, on the market, for \$5,057,500 principal plus interest of \$206,427.

The RFBP portfolio included a \$6,000,000 par, 6.95% WorldCom Inc. bond maturing August 15, 2028. The book value of this bond, originally purchased at a discount, was \$5,477,400 on June 30, 2002. On July 21, 2002, WorldCom Inc. filed for Chapter 11 bankruptcy protection. As of July 31, 2002, the reduced book value was \$2,400,000. On November 7, 2002, the Attorney General for the State of Montana filed a lawsuit against certain WorldCom executives, directors and financial institutions associated with WorldCom such as Arthur Andersen and CitiGroup. The lawsuit, filed in Lewis and Clark County, Montana, alleges that the defendants filed "false and misleading registration statements" relating to the purchase of the bonds by the Montana Board of Investments. In December 2002, this bond was sold, on the market, for \$1.5 million.

5. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$5 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25, 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$538,632 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$5,683,075 in principal and interest plus \$150,000 as a consent fee.

6. YEAR END PORTFOLIO

The June 30, 2003 RFBP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Trust Funds Bond Pool, as of June 30, 2003 and 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Trust Funds Bond Pool, as of June 30, 2003 and 2002, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

The accompanying notes are an integral part of these financial statements.

STATE OF MONTANA BOARD OF INVESTMENTS
TRUST FUNDS BOND POOL

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2003 AND 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Trust Funds Bond Pool (TFBP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, to participate in a diversified pool. The TFBP was created on October 1, 1995, by the transfer of all fixed income and variable-rate securities owned by the Coal Severance Tax Permanent Trust, Resource Indemnity Trust, Coal Tax Park Trust, Trust and Legacy, Coal Tax Cultural Trust and Treasure State Endowment Trust funds. Since the pool's creation in 1995, the funds listed below became participants in the TFBP:

University of Montana Endowment Fund	January 1996
Coal Severance Tax School Bond Contingency Fund	March 1996
Montana Pole Superfund	September 1996
State of Montana Section 457 Deferred Compensation Plan *	April 1997
Upper Clark Fork River Basin (UCFRB) Restoration	July 1999
Upper Clark Fork River Basin (UCFRB) Cost Recovery	July 1999
Streamside Tailings Operable Unit	July 1999
Treasure State Regional Water Systems	July 2000
Tobacco Trust Fund	January 2001
University of Montana Designated Fund	July 2002
University of Montana Other Fund	July 2002
Montana Tech of the U of M	March 2003

* In January 2002, the State of Montana Section 457 Deferred Compensation Plan withdrew from the TFBP.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

TFBP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The TFBP portfolio includes corporate asset-backed, other corporate, U.S. government mortgage-backed, government, Yankee securities and cash investments. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. U.S. government mortgage-backed securities reflect participation in a pool of residential mortgages. Government securities include direct and indirect obligations of the U.S. Treasury and state and local government bonds. Yankee bonds are U.S. dollar denominated securities issued by foreign corporations and governments and U.S. companies issuing debt in foreign markets.

The TFBP portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 7 for the Year End Portfolio.)

TFBP fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The TFBP did not hold any variable rate securities as of June 30, 2003 and June 30, 2002.

Investments are presented in the Statement of Net Asset Value at fair value. Fair values for securities are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

The TFBP, as an internal investment pool, invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

Participant Units

The Coal Severance Tax Permanent Trust, Resource Indemnity Trust, Coal Tax Park Trust, Trust and Legacy, Coal Tax Cultural Trust, and Treasure State Endowment Trust funds transferred all fixed income and variable-rate securities, at amortized cost, into the TFBP at the start-up date and were issued units according to the fair value of each participant's portfolio. The initial unit value as of October 1, 1995, was \$100.00. Unit values are calculated weekly and at month end, based on portfolio pricing, to allow for participant transactions to occur as determined by the investment staff.

The June 30, 2003 unit value of \$105.56 increased from a June 30, 2002 unit value of \$98.61. Interest rates declined during the fiscal year, which has the effect of increasing bond prices and the pool unit value. A one percent (1%) change in interest rates is expected to have a five to seven percent (5%-7%) inverse change in the unit value. TFBP investments are considered long-term in nature and participants are not expected to sell units for liquidity for short-to-intermediate term needs.

Broker Receivable/Payable

TFBP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the TFBP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

Other

Accumulated income, recorded as Income Due Participants, is distributed monthly on the first calendar day of each month. Realized portfolio gains/losses are distributed at least annually to the participants.

Investment income reported in the Statement of Investment Income and Distribution includes interest accruals, realized gains/losses, amortization/accretion and miscellaneous income.

Administrative expenses incurred by the Board are charged daily to TFBP based on the Board's expenses applicable to TFBP. These expenses include costs for the custodial bank contract.

3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

As of June 30, 2003, the carrying and fair value of the underlying securities on loan for the Trust Funds Bond Pool was \$57,555,310 and \$70,451,001, respectively. The cash collateral provided for the securities on loan totaled \$76,755,887.

As of June 30, 2002, the carrying and fair value of the underlying securities on loan for the Trust Funds Bond Pool was \$106,007,425 and \$116,106,702, respectively. The collateral provided for the securities on loan totaled \$123,373,283 representing \$102,391,378 in cash and \$20,981,905 in securities collateral.

4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2003 and June 30, 2002. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2003

Securities Lending Collateral Investment Pool			\$ <u>102,391,378</u>	\$ <u>102,391,378</u>	\$ <u>102,391,378</u>

*At June 30, 2002, these underlying securities, with fair values of \$18,736,483 and \$97,370,219 respectively, were loaned for securities and cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the above instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires TFBP investments, at the time of purchase, to be rated investment grade as defined by Moody's or Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the U.S. government mortgage-backed category, the TFBP portfolio holds REMICs totaling \$706,427 and \$1,265,484, respectively, at amortized cost, as of June 30, 2003 and June 30, 2002. These securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. When underlying mortgages are prepaid, the interest cash flows are reduced while principal cash flows are increased. If homeowners pay on mortgages longer than anticipated, the cash flow effect would be the opposite.

Corporate asset-backed securities represent debt securities collateralized by a pool of assets. The RFBP corporate asset-backed security is secured by lease payments and real estate. Credit risk for corporate asset backed securities is generally less than other corporate securities because assets are held by a third party.

As of June 30, 2003 and June 30, 2002, Enron Corp., and Burlington Industries, Inc. presented legal and higher credit risks to the Board.

The TFBP holds a \$2 million par, 6.75% Enron bond maturing August 1, 2009, a \$3 million par 6.40% Enron bond maturing July 15, 2006 and a \$3 million par 6.95% Enron bond maturing July 15, 2028. The combined book value of these securities, was \$7,560,870 as of November 30, 2001. On December 12, 2001, the Enron Corp. filed for Chapter 11 bankruptcy protection. Accordingly, the November 2001 book value for the three issues was reduced to \$3.2 million as of June 30, 2002. In October 2002, the book value was reduced to \$1.6 million for the three issues. In July 2003, the three issues were sold, on the market, for a total of \$1.35 million.

The Board owns a Burlington Industries, Inc., \$4 million par, 7.25% bond maturing September 15, 2005. In September 2000, the company announced a reduction of stockholders equity. Due to an increasing senior bank line and declining credit trend, the bond ratings for this issue were downgraded, in May 2001, by the Moody's and Standard & Poor's rating agencies. During fiscal year 2001, the book value of Burlington Industries Inc. was reduced from the August 31, 2000 book value of \$3,739,760 to \$1,600,000. Due to the company's filing for Chapter 11 bankruptcy protection on November 11, 2001, the book value was reduced to \$800,000. In October 2003, Burlington Industries, Inc. received court approval to sell its assets. This sale is expected to close in November 2003. Under the company's recovery plan, the Board will receive cash for its unsecured claim.

As of June 30, 2002, Rite Aid and WorldCom Inc. presented a higher credit risk to the Board.

The TFBP owns a Rite Aid \$3,000,000 par, 7.13% bond maturing January 15, 2007. In May 2000, the Board was subordinated to a secured bank line of credit on this issue and the bond ratings were downgraded by the Moody's and Standard & Poor's bond ratings agencies. Based on this subordination and ratings downgrade, the book value was reduced to \$2,400,000 as of June 30, 2000. During fiscal year 2001, the book value was further reduced to \$1,800,000. Due to an improving credit trend, amortization was resumed in June 2001. The book value of this security at June 30, 2002 is \$2,374,356. As of June 30, 2002, Rite Aid did not represent a credit risk. In December 2002, this bond was sold, on the market, for \$1.5 million in principal plus interest of \$45,719.

The TFBP portfolio includes a \$9,000,000 par, 6.95% WorldCom Inc. bond maturing August 15, 2028. The book value of this bond, originally purchased at a discount, was \$8,216,100 on June 30, 2002. On July 21, 2002, WorldCom Inc. filed for Chapter 11 bankruptcy protection. As of July 31, 2002, the reduced book value is \$3,600,000. On November 7, 2002, the Attorney General for the State of Montana filed a lawsuit against certain WorldCom executives, directors and financial institutions associated with WorldCom such as Arthur Andersen and CitiGroup. The lawsuit, filed in Lewis and Clark County, Montana, alleges that the defendants filed "false and misleading registration statements" relating to the purchase of the bonds by the Montana Board of Investments. In December 2002, this bond was sold, on the market, for \$2.7 million.

5. PARTICIPANT LOAN

In accordance with Senate Bill 495 enacted by the 2001 Legislature, the Coal Severance Tax Permanent Trust loaned 483,604 TFBP shares, with a book value of \$46,366,904, to the Trust and Legacy fund on July 2, 2001. The loan proceeds were deposited in the Trust and Legacy Fund. A loan receivable was recorded in the Coal Severance Tax Permanent Trust and a corresponding liability was recorded in the Guarantee Fund, a General Fund sub-fund. The August 2002 Special

Legislative Session approved the request to record this activity in a state special revenue fund of the Office of Public Instruction rather than in the Guarantee Fund.

6. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$8 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a “breach of contract” for the March 25 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$861,811 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$9,092,920 in principal and interest plus \$240,000 as a consent fee.

7. YEAR END PORTFOLIO

The June 30, 2003 TFBP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Coupon</u>	<u>Maturity</u>	<u>Par</u>	<u>Book Value</u>	<u>Fair Value</u>	<u>% of Total</u>

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Short Term Investment Pool, as of June 30, 2003 and 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Short Term Investment Pool, as of June 30, 2003 and 2002, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

November 4, 2003

STATE OF MONTANA BOARD OF INVESTMENTS
SHORT TERM INVESTMENT POOL - NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2003 AND 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Short Term Investment Pool (STIP) was created by the Board to allow qualifying funds, per sections 17-6-201, 202 and 204, MCA, to participate in a diversified pool. Although state agencies are legally required to invest in STIP, local governments may voluntarily participate in STIP.

The purpose of STIP is to obtain the highest possible return, yet maintain a highly liquid position whereby funds may be invested for relatively short periods, one day or more, depending upon the participant's anticipated use of the funds. The investments and the income from STIP are owned by the participants, as they purchase units, and are managed on their behalf by the Board.

Although STIP is not registered with the Securities and Exchange Commission (SEC) as an investment company, the Board has as policy that STIP will, and does, operate in a manner consistent with the SEC's rule 2a7 of the Investment Company Act of 1940. In meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

STIP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The STIP portfolio may include asset-backed securities, commercial paper, corporate and government securities, repurchase agreements, and variable-rate (floating-rate) instruments. These securities are purchased to provide shareholders with a diversified portfolio earning a competitive total rate of return.

Asset-backed securities represent debt securities collateralized by a pool of mortgage and non-mortgage assets such as trade and loan receivables, equipment leases, credit cards, etc. Commercial paper is unsecured short-term debt with maturities ranging from 1 to 270 days. Commercial paper issued at a discount, direct or by brokers, is backed by bank credit lines. Repurchase agreements (REPOs) represent an agreement between a seller and a buyer, usually of US government securities, whereby the seller agrees to repurchase the securities at an agreed upon price and stated time. Variable-rate (floating-rate) securities pay a variable rate of interest until maturity. The variable-rate securities float with LIBOR (London Interbank Offered Rate).

Investments held are reported at fair value, annually, based on market prices supplied to the Board by various pricing services. The difference between amortized cost and fair value is reflected as an unrealized gain or loss in the investments managed. The STIP investment portfolio consists of securities with a maximum maturity of 397 days or less with the exception of securities having rate reset dates. The portfolio is carried at amortized cost or book value.

Participant Units

The STIP unit value is fixed at \$1 for both participant buys and sells. A purchased unit earns income on the purchase date and ceases to earn income on the day before the unit is sold. Participants may buy or sell fractional shares. For fiscal years 2003 and 2002, income was distributed on the first calendar day of each month, with the exception of the June distribution. Income for June 2003 was distributed on the last calendar day of the month. Participants may automatically reinvest their income in additional units.

During fiscal years 2003 and 2002, the Board did not provide or obtain any legally binding guarantees to support the value of the participant units.

Broker Receivable/Payable

STIP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the STIP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

Other

Administrative expenses incurred by the Board are charged daily to STIP based on the Board's expenses applicable to STIP.

3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

As of June 30, 2003 and June 30, 2002, there were no securities on loan.

4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below and on the following page to give an indication of the level of risk assumed at June 30, 2003 and June 30, 2002. Category 1 includes investments that are insured or registered or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2003

<u>Security Investment Type</u>	<u>Category 1</u>				
	<u>Securities Not On Loan</u>	<u>On Loan for Securities Collateral</u>	<u>Not Categorized</u>	<u>Carrying Amount</u>	<u>Fair Value</u>

STIP investments' credit risk is measured by investment grade ratings given individual securities. Board of Investment's policy requires that STIP investments have the highest rating in the short term category by one and/or any Nationally Recognized Statistical Rating Organizations (NRSRO). The six NRSRO's include Standard and Poors, Moody's, Duff and Phelps, Fitch, IBCA and Thompson's Bank Watch.

Asset-backed securities have less credit risk than do securities not backed by pledged assets, while market risk for asset-backed securities is the same as market risk for similar non asset-backed securities.

While variable-rate securities have credit risk identical to similar fixed-rate securities, their market risk (income) is more sensitive to interest rate changes. However, their market risk (value/price) may be less volatile than fixed-rate securities because their value will usually remain at or near par as a result of their interest rates being periodically reset to maintain a current market yield.

There are no legal risks that the Board is aware of regarding any STIP investments.

5. YEAR END PORTFOLIO

The June 30, 2003 STIP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana Domestic Equity/Montana Stock Pool, as of June 30, 2003 and 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana Domestic Equity/Montana Stock Pool, as of June 30, 2003 and 2002, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

STATE OF MONTANA BOARD OF INVESTMENTS
MONTANA DOMESTIC EQUITY/MONTANA STOCK POOL - NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2003 AND 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Common Stock Pool (MTCP) was created by the Board to allow retirement and endowment funds, per section 17-6-201, MCA, the opportunity to participate in the equity market via a diversified pool. MTCP was created as of July 1, 1980, by the transfer of all common stock owned by the Public Employees' Retirement System, Teachers' Retirement System, and other funds into MTCP.

In March 1996, the Board approved the Investment Policy Statement to reflect the name change from the Montana Common Stock Pool to the Montana Stock Pool. The Montana Stock Pool is referred to as "Montcomp" or MTCP. This policy statement provided for the investment in common or preferred stock. The Investment Policy Statement was revised and approved in September 1996 to allow the investment in securities convertible into common or preferred stocks. In June 2000, the Board revised and approved the Investment Policy Statement to allow the investment in equity derivatives.

The board established creation of the Montana Domestic Equity Pool (MDEP) in April 2003. Effective May 1, 2003, the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all the Barclays Global Investors (BGI) S&P 500 Equity Index Fund A and the Dimensional Fund Advisors (DFA) US Small Cap Trust investments totaling \$740 million, at cost, from the All Other Funds portfolio to the new pool. The BGI investments were previously recorded in the All Other Funds financial statements for fiscal year 2002. The pension and endowment funds also exchanged their investment in the Montana Stock Pool (MTCP) for units in the new Montana Domestic Equity Pool (MDEP).

These financial statements present the Net Asset Value, Changes in Net Asset Value and Investment Income and Distribution of the Montana Domestic Equity Pool, as of June 30, 2003 and the fiscal year then ended, and the Net Asset Value, Changes in Net Asset Value and Investment Income and Distribution of the Montana Stock Pool as of June 30, 2002 and the fiscal year then ended.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

MDEP/MTCP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The MDEP/MTCP portfolio may include common stock, equity index, preferred stock, convertible equity securities and equity derivatives. Common stock represents ownership units (shares) of a public corporation. Common stock owners are entitled to vote on director selection and other important matters as well as receive dividends on their holdings. Equity index investments are investments in selected mutual funds whose equity portfolios match a broad based index or composite. Preferred stock, as a class of stock, pays dividends at a specified rate and has preference in the payment of dividends and liquidation of assets. Preferred stock holders, ordinarily, do not have voting rights. Convertible securities are securities carrying the right to exchange, or "convert" the instrument for other securities of the issuer or of another issuer. This definition most often applies to preferred stocks or corporate bonds carrying the right to exchange for a fixed number of shares of the issuer's common stock. Equity derivatives "derive" their value from other equity instruments such as futures and options.

In June 2000, the Board approved a staff recommendation to securitize MTCP cash by investing in an equity derivative, the State Street Stock Performance Index Futures Fund (SPIFF). Portfolio cash is swept daily into SPIFF maintaining 100% equity exposure through holdings of stock index futures.

The MDEP, as an internal investment pool, invested its excess cash, on creation, in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values. In July 2003, the STIP account was closed and a SPIFF account was opened to securitize MDEP cash by investing in an equity derivative.

In January 2003, the Board approved a staff recommendation to hire Dimensional Fund Advisors, as an external manager, to invest in domestic small market capitalization (small cap) companies. Market capitalization refers to the value of a corporation as determined by the market price of its issued and outstanding common stock. US Small Cap companies are those companies whose market capitalization comprises the smallest 8 percent of the total market universe. The total market universe is defined as the aggregate capitalization of the NYSE, AMEX and NASDAQ firms.

Investments are presented in the statement of Net Asset Value at fair value. Equity investments, on valuation date, are stated at the closing price of the security's primary exchange. Carrying value, parenthetically disclosed, represents the equity security purchase price plus a fixed commission where applicable.

The increase in the fair and carrying values of the MDEP portfolio as of June 30, 2003 as compared to fair and carrying values of the MTCP portfolio as of June 30, 2002 is attributed, primarily, to the \$740 million transfer, at cost, of the BGI and DFA investments to the MDEP on May 1, 2003.

Participant Units

The Public Employees' Retirement System and the Teachers' Retirement System transferred all stock owned into MTCP at the start-up date and were issued units according to the fair value of their contribution, retaining their original total cost basis. The initial unit value as of July 1, 1980, was \$1,000. Unit values thereafter and until March 31, 2000 were calculated weekly and at the close of the last business day of the month, based on the fair value of MTCP equity holdings and other assets. Effective April 1, 2000, the unit values are calculated daily. Daily unit value calculations were discontinued as of January 1, 2003. Since January 2003, MTCP unit values are calculated weekly and at the close of the last business day of the month. Depending on stock market conditions and the investment officer's decision, MDEP participants may then buy or sell units on the first calendar day of each month.

On July 1, 1994, the initial unit value changed from \$1,000 to \$100. This change was required for the Board's new accounting system. On August 17, 2000, shareholders, on record, received one MTCP share for each MTCP share held as the result of a 2:1 split. The unit value on August 31, 2000, prior to the split, was \$1,014 while the unit value, after the split, was \$507.

On May 1, 2003, the pension funds transferred all the Barclays Global Investors (BGI) S&P 500 Equity Index Fund A and the Dimensional Fund Advisors (DFA) US Small Cap Trust investments, at cost, to the MDEP. On the same date, the pension and endowment funds transferred their MTCP investments, at cost, to the MDEP. The pension and endowment funds were issued units according to the fair value of each participant's portfolio. The initial MDEP unit value on May 1, 2003 was \$100. On conversion date, MTCP participants exchanged approximately 5.8 million MTCP units, valued at \$302 per unit, for 24.1 million MDEP units, issued at \$100 per unit.

As reported in the Statement of Changes in Net Asset Value, the value of MTCP units purchased by participants decreased \$68 million in fiscal year 2003 while the value of MTCP units sold increased by \$23 million based on changes in the market. The \$82 million in participant purchases in fiscal year 2002 reflect investment opportunities given the market conditions. The fiscal year 2003 and 2002 changes are the result of an asset allocation decision and do not reflect a change from the stated investment policy to increase retirement fund exposure to equity investments. MTCP participant purchases and sales from July 2002 to March 2003 were based on a MTCP per unit value ranging from \$259 per unit to \$308 per unit. In June 2003, the MDEP participants purchased units at \$105 per unit to fund \$25 million for the DFA US Small Cap Trust. The increase of \$471 million in the Change in Fair Value of Investments Managed reflects the equity market appreciation since fiscal year 2002.

Broker Receivable/Payable

MDEP/MTCP security transactions are recorded as of trade date rather than settlement date. Because of this generally accepted practice, the MDEP/MTCP portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

Other

Investment income reported in the Statement of Investment Income and Distribution includes dividend accruals, tax reclaim accruals, SPIFF gain/losses and miscellaneous income. MDEP/MTCP dividends are recorded on the ex-dividend date.

The MDEP/MTCP Income Available for Distribution is distributed as of the first calendar day of each month.

Administrative expenses incurred by the Board are charged daily to MDEP/MTCP based on the Board's expenses applicable to MDEP/MTCP. For fiscal year 2003, these expenses include \$966,446 for the Board and the custodial bank contract and \$17,700 in accruals for external manager fees. The fiscal year 2002 administrative expenses of \$1,030,112 represent Board expense and custodial bank contract fees.

3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

As of June 30, 2003, the carrying and fair values of the underlying securities on loan for the Montana Stock Pool were \$19,578,118 and \$18,747,547 respectively. The collateral provided for the securities on loan totaled \$19,085,755 in cash.

As of June 30, 2002, the carrying and fair values of the underlying securities on loan for the Montana Stock Pool were \$20,924,469 and \$15,748,477 respectively. The collateral provided for the securities on loan totaled \$16,128,704 in cash.

4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized on the next page to give an indication of the level of risk assumed at June 30, 2003 and June 30, 2002. Category 1 includes investments that are insured or registered or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2003

5. OWENS-CORNING COMPLAINT

On October 11, 2002, the Board received a summons and complaint regarding the bankruptcy of Owens-Corning. The company seeks a determination that the dividend payments paid from October 1996 through July 2000 represent “fraudulent transfers under Chapter 11 Bankruptcy provisions and applicable state law, and are, therefore, voidable”. The complaint states the Montana Board of Investments was the “recipient of dividends in the amount of \$357,099 for the relevant period”. The Board has prepared a response to the complaint.

6. YEAREND PORTFOLIO

The June 30, 2003 MDEP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Shares</u>	<u>Carrying Value</u>	<u>Fair Value</u>	<u>% of Total</u>

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana International Equity Pool, as of June 30, 2003 and 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana International Equity Pool, as of June 30, 2003 and 2002, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

**STATE OF MONTANA BOARD OF INVESTMENTS
MONTANA INTERNATIONAL EQUITY POOL**

**NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2003 and 2002**

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana International Equity Pool (MTIP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, the opportunity to participate in the international equity market via a diversified pool. MTIP, approved by the Board in June 1996, consists of one pool investing in one or more separate funds. Currently, MTIP has investments with an internally managed fund, BOI Internal International, and four externally managed funds, Pyrford International, Schroder Investment Management NA, SG Yamaichi Asset Management Co., formerly SG Pacific Asset Management Inc. and Barclays Global Investors. On January 3, 1997, the MTIP was funded by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

In fiscal year 2003, the Board funded external managers, Pyrford International, \$27 million, and Schroder Investment Management NA, \$9 million, for a total active investment funding of \$36 million. In May 2003, the Board funded the Barclays Global Investors (BGI) – MSCI Europe Index Fund with an initial \$15 million investment.

In fiscal year 2002, the Board funded \$15 million to BOI Internal International, \$12.5 million to SG Yamaichi Asset Management Co., formerly SG Pacific Asset Management, Inc., \$20 million to Pyrford International, and \$25 million to Schroder Investment Management NA for a total funding of \$72.5 million. In December 2002, SG Yamaichi Asset Management Co., formerly SG Pacific Asset Management Inc. changed its name to SG Yamaichi Asset Management Co.

Schroder Investment Management NA, and SG Yamaichi Asset Management Co., formerly SG Pacific Asset Management Inc., selected by the Board in October 1996, are authorized to invest in 11 Pacific Basin countries. These countries are Australia, China/Hong Kong, Indonesia, Japan, Korea, Malaysia, New Zealand, Philippines, Singapore, Taiwan and Thailand.

As approved by the Board, the BOI Internal International fund may invest in 20 European, North and South American countries. These countries are listed as follows:

Argentina	Chile	Ireland	Portugal
Austria	Denmark	Italy	Spain
Belgium	Finland	Mexico	Sweden
Brazil	Germany	Netherlands	Switzerland
Canada	Greece	Norway	United Kingdom

In March 2003, the Board voted to liquidate all BOI Internal International holdings in France. On October 30, 2003, the Board voted to add France to list of approved countries for the BOI Internal International portfolio. In October 2001, the Board added Greece to the list of approved countries.

In August 1998, the Board selected Pyrford International, as an external investment manager for Europe. With the exception of the North and South American countries of Canada, Argentina, Brazil, Chile, and Mexico, Pyrford International, as approved by the Board, may invest in the European countries listed above including France.

In August 2003, the Board invested in the BGI All Country Pacific Index Strategy Fund with an initial funding of \$15 million.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

MTIP investments are purchased in accordance with the statutorily mandated “Prudent Expert Principle”. The MTIP portfolio includes equity investments in five funds - BOI Internal International, Pyrford International, Schroder Investment Management NA, SG Yamaichi Asset Management Co., formerly SG Pacific Asset Management Inc. and the BGI – MSCI Europe Index Fund. The five funds may invest in securities of foreign-based corporations listed on legal and recognized foreign exchanges as well as domestic exchanges. Security types may include ordinary common shares, preferred shares, convertible securities, American Depositary Receipts (ADR’s), Global Depositary Receipts (GDR’s), and other global securities, as appropriate.

Common stock represents ownership units (shares) of a public corporation. Common stock owners are entitled to vote on director selection and other important matters as well as receive dividends on their holdings. Preferred stock pays a stipulated dividend and has a claim prior to that of common stock upon the earnings of a corporation. Convertible securities are securities carrying the right to exchange, or “convert” the instrument for other securities of the issuer or of another issuer. ADR’s are receipts issued by a US depository bank representing shares of a foreign stock or bonds held abroad by the foreign sub-custodian of the American depository bank. GDR’s are receipts issued by non-US bank depositories, which represent shares of a foreign stock or bonds.

Broker Receivable/Payable

MTIP security transactions are recorded as of the trade date rather than settlement date. Because of this generally accepted practice, the MTIP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

Valuation and Foreign Currency

Investments are presented in the statement of Net Asset Value at current US dollar value. The MTIP’s fair value is derived from the Net Asset Value Per Share, as separately calculated, for the five funds - BOI Internal International, Pyrford International, Schroder Investment Management NA, SG Yamaichi Asset Management Co., formerly SG Pacific Asset Management Inc. and the BGI – MSCI Europe Index Fund. Each fund’s Net Asset Value Per Share represents the per unit ownership of the fund’s Net Assets. The Net Assets are the excess of the valued securities, cash, receivables and other assets over the fund’s liabilities. Each fund’s Net Assets are reported at current US dollar value after conversion, by the custodial bank, State Street Bank and Trust, from the foreign currency amounts.

State Street Bank, as custodian, is responsible for reporting the foreign currency transactions in both the local and base or functional (US dollar) currency. The five funds’ cash, receivables, fair value of investment securities, other assets and liabilities are translated into US dollars at the Interactive Data Control (IDC) 11:00 a.m. Eastern Standard Time (EST) exchange rate as of the balance sheet date. Purchases and sales of investment securities, income and expenses are converted into US dollars using the Reuters noon EST exchange rate on the transaction date.

Currency exposures may be hedged, partially or fully, at the discretion of the manager to preserve the US dollar value of investments made. Currency speculation, such as over-hedging, reverse hedging or other trading activity not specifically aimed at preserving the US dollar value of investments, is not authorized.

Fair values for the funds holding the publicly traded securities are determined by reference to market prices supplied to the Board by the Board’s custodial bank, State Street Bank and their primary pricing service, IDC. Equity investments, traded on a national security exchange, are stated at the last reported sales price on valuation day, while equity securities traded in the over-the-counter market are stated at the last quoted bid price.

Participant Units

The Public Employees’, Municipal Police Officers’, Game Wardens’, Sheriffs’, Judges’, Highway Patrol Officers’, Teachers’, Volunteer Firefighters’ and Firefighters’ Unified retirement funds sold units in the Short Term Investment Pool at the start up date and were issued units in MTIP at an initial unit value of \$100. Unit values

thereafter are calculated weekly and once a month at the close of the last business day of the month, based upon the fair value of the MTIP equity holdings, other assets and liabilities. Based on the investment officers' decision, participants may then buy or sell units on the first business day of each month. All participant buys or sells occur after distribution of accumulated income.

Investment Income and Distribution

Investment Income represents the monthly income distributions to the MTIP from the investment manager funds. The funds' income distributions include dividends accrued as of the ex-dividend date, interest, tax refunds and securities lending income, and related income currency gains/losses. Income currency gains/losses result from the difference between the amount of dividend, interest and foreign withholding taxes accrued for the fund in US dollars and the amount received or paid in equivalent US dollars.

Realized gains/losses from the sale of securities and related foreign exchange transactions are retained by each fund. Realized foreign exchange gains/losses arise from sales and maturities of portfolio securities, sales of foreign currencies, and currency gains/losses realized between the trade and settlement dates.

The fiscal year 2003 administrative expense of \$1,785,948 represents \$1,358,700 in quarterly fees accrued and paid to the external managers per their contracts, and \$427,248 in monthly charges accrued and paid to the Board of Investments. The Board of Investments fee includes costs for the custodial bank contract. Administrative expenses incurred by the Board are charged daily to MTIP based on the Board's expenses applicable to MTIP.

The fiscal year 2002 administrative expense of \$1,774,996 represents \$1,322,540 in quarterly fees accrued and paid to the external managers per their contracts and \$452,456 in monthly charges accrued and paid to the Board of Investments. The Board of Investments fee includes costs for the custodial bank contract

The MTIP Income Available for Distribution is distributed at least monthly to the retirement fund participants, net of external manager fees and administrative expenses, on the first business day of the following month.

3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 105 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar and foreign currency cash, US government securities, sovereign debt of foreign countries, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

As of June 30, 2003, the carrying and fair values of the underlying securities on loan for MTIP were \$75,267,314 and \$74,813,847, respectively. The collateral provided for the securities on loan totaled \$78,496,331 in cash collateral.

As of June 30, 2002, the carrying and fair values of the underlying securities on loan for MTIP were \$63,227,006 and \$65,695,692, respectively. The collateral provided for the securities on loan totaled \$67,264,338 representing \$67,179,838 in cash and \$84,500 in securities collateral.

4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2003 and June 30, 2002. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2003

<u>Security Investment Type</u>	<u>C a t e g o r y 1</u>				
	<u>Securities Not On Loan</u>	<u>On Loan for Securities Collateral*</u>	<u>Not Categorized*</u>	<u>Carrying Amount</u>	<u>Fair Value</u>

Securities Lending Collateral Investment Pool			<u>67,179,838</u>	<u>67,179,838</u>	<u>67,179,838</u>

* At June 30, 2002, the underlying securities with fair values of \$79,612 and \$65,616,079, respectively, were loaned for securities and cash collateral under a securities lending agreement with the state's agent.

The MTIP, through the above funds, has significant investments in 21 foreign countries. Future economic and political developments in these countries could adversely affect the liquidity or value, or both, of the securities held by the above funds in which MTIP is invested.

5. SUBSEQUENT EVENT

On July 1, 2003, the Board funded MTIP with a \$35 million purchase in the State Street Stock Performance Index Futures Fund (SPIFF). SPIFF shares were subsequently sold to fund \$25 million to the BGI-MSCI Europe Index Fund on July 3, 2003.

6. EXTERNAL MANAGERS

On October 30, 2003, the Board voted to retain Schroder Investment Management NA, hire Nomura Asset Management USA, Inc. and terminate SG Yamaichi Asset Management, Co. as active managers for the Board's Pacific Basin equity mandate. SG Yamaichi Asset Management, Co. ceased equity trading in the Pacific Basin on October 31, 2003. Upon transition, Nomura Asset Management USA, Inc. will begin equity trading in the Pacific Basin on December 1, 2003.

7. YEAR END PORTFOLIO

The combined investment portfolios for the five funds, as of June 30, 2003 are listed below by country. The percent is based on the total fair value of each security/country to the combined total portfolio fair value.

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana Private Equity Pool, as of June 30, 2003 and 2002, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana Private Equity Pool, as of June 30, 2003 and 2002, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

STATE OF MONTANA BOARD OF INVESTMENTS
MONTANA PRIVATE EQUITY POOL

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2003 AND 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Private Equity Pool (MPEP) was established by the Board to allow retirement funds, per section 17-6-201, MCA, the opportunity to participate in the venture capital and leveraged buyout markets and other private equity investments via a diversified pool. The Board approved creation of the MPEP in April 2002. Effective May 1, 2002, the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all their venture capital and leveraged buyout investments, at cost, totaling \$159,799,310, and cash of \$15,000,000 to the new pool. These investments were previously recorded in the All Other Funds financial statements for fiscal year 2001.

Given the complexity and specialization of private equity investment, the Board contracts with six private equity managers to invest in venture capital, leveraged buyout and other private equity investments. The retained private equity managers include Adams Street Partners, formerly Brinson Partners, Kohlberg, Kravis, Roberts and Company, (KKR), Welsh Carson Anderson and Stowe, Madison Dearborn Partners, Lexington Partners and Oaktree Capital Management. According to Board policy, the external managers may not invest more than 20% of total private equity invested capital in non-US company partnerships unless the fund is a designated non-US fund.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

Montana Private Equity Pool investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The MPEP portfolio includes venture capital, leveraged buyout, mezzanine, distressed debt, special situation and secondary investments. Venture capital represents private equity investments in early stage financing of rapidly growing companies with an innovative product or service. Leveraged buyouts (LBO's) permit an investment group to acquire a company by leveraging debt, as a financing technique, to establish a significant ownership position on behalf of the company's current management team. Mezzanine investments are the subordinated debt and/or equity of privately owned companies. The debt holder participates in equity appreciation through conversion features, such as rights, warrants, and/or options. Distressed debt represents the private and public debt of companies that appear unlikely to meet their financial obligations. This debt is attractive to investors, not for repayment of interest and principal, which are unlikely to be paid, but for the claim placed on the firm's value by unpaid creditors. Without undue principal risk, distressed debt investment managers seek capital appreciation through the sale of restructured debt obligations or newly issued securities. Special situation investments include the investment in the exploration for oil and/or gas reserves or in the development of proven reserves, investment in land to harvest timber, and investments that have a special component usually related to geographical, economic, or social issues. Secondary investments are investments in previously owned limited partnerships. These investments may be direct or via a general partner specializing in secondary investments. Private equity investments are long-term, by design, and extremely illiquid.

In creating the pool, the Board chose to securitize MPEP cash by investing in an equity derivative, the State Street Stock Performance Index Futures Fund (SPIFF). Portfolio cash is swept daily into SPIFF maintaining 100% equity exposure through holdings of stock index futures.

Investments are presented in the Statement of Net Asset Value at fair value. Because no recognized market exists for private equity investment, the MPEP investments, on valuation date, are stated at the fair value reported in the most recent external managers' valuation reports. Carrying value, parenthetically disclosed, represents the private equity security purchase price.

Broker Receivable/Payable

MPEP security transactions are recorded as of trade date rather than settlement date. Because of this generally accepted practice, the MPEP portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

Participant Units

The pension funds transferred all their venture capital and leveraged buyout investments, at cost, into the MPEP at the start-up date and were issued units according to the fair value of each participant's portfolio and cash contribution. The initial unit value as of May 1, 2002 was \$100. Although unit values are calculated at month end, the pool portfolio will be priced at least quarterly at the fair value reported in the external managers' valuation reports. Given the quarterly portfolio valuations, pool participant transactions will most likely occur on a quarterly basis. Based on the investment officer's decision, participants may buy, reinvest or sell units on the first business day of each month. All participant buys, reinvestments or sells occur after distribution of accumulated income.

Investment Income and Distribution

Investment Income reported in the Statement of Investment Income and Distribution includes cash dividends, interest, realized gains and losses, and miscellaneous income received from July 1, 2002 to June 30, 2003 for fiscal year 2003 and income received from May 1 through June 30, 2002 for fiscal year 2002. MPEP dividends are recorded on the ex-dividend date.

The MPEP Income Available for Distribution is distributed or reinvested, on behalf of the nine retirement fund participants, at least quarterly or as determined by the Investment Officer. Any cash distributions or reinvestments will occur on the first business day of the following month. The Income Available for Distribution is net of MPEP external manager fees and administrative expenses.

The fiscal year 2003 administrative expense of \$3,056,068 represents fees paid to the external managers of \$2,816,202 per their contracts and \$239,866 paid to the Board of Investments. The Board of Investments fee includes costs for the custodial bank contract. Administrative expenses incurred by the Board are charged daily to MPEP based on the Board's expenses applicable to MPEP.

The fiscal year 2002 administrative expense of \$49,378 represents fees paid to the external managers of \$15,384 per their contracts and \$33,994 paid to the Board of Investments for May and June 2002. The Board of Investments fee includes costs for the custodial bank contract. Administrative expenses incurred by the Board are charged daily to MPEP based on the Board's expenses applicable to MPEP.

Security Lending

Because there is no active security lending market for this asset class, MPEP does not participate in security lending.

3. COMMITMENTS

Private equity investments, typically, represent a seven to ten year commitment characterized by capital calls occurring during the first five years with distributions to the investor over the remaining term of the investment. The original and remaining commitments and their respective carrying and fair values, as of June 30, 2003, are listed on the next page.

Commitments as of June 30, 2003

<u>Security Investment</u>	<u>Original Commitment Date</u>	<u>Original Commitment</u>	<u>Commitment Remaining</u>	<u>Carrying Value</u>	<u>Fair Value</u>

Total Private Equity Commitments		\$ <u>608,300,000</u>	\$ <u>263,533,895</u>	\$ <u>254,001,576</u>	\$ <u>280,310,357</u>

4. INVESTMENT RISK

Private equity investments are recognized as investments with a higher degree of risk with a higher return potential than traditional equity investments. Portfolio diversification of risk is to be achieved through multiple partnership relationships and investments diversified by time, financing stage, industry sector, investment size and geographical region. Private equity investments typically have a low correlation relative to other investment asset classes and should contribute to the reduction of portfolio risk and the enhancement of expected returns on a total investment portfolio basis.

5. RESTATEMENT

On the Statement of Changes in Net Asset Value for the fiscal year ended June 30, 2002, the Value of Units Purchased by Participants has been restated as \$15,000,000 from \$174,799,310 to reflect the transfer of \$159,799,310 of the Private Equity venture capital and leveraged buyout investments to the Montana Private Equity Pool (MPEP).

6. NOTICE OF LIABILITY

The Montana Board of Investments is a limited partner in the private equity partnership of O'Donnell & Masur L.P. O'Donnell&Masur L.P. invested in Gardiner Communications, Inc. All partners of O'Donnell & Masur L.P. received a Notice of Liability from the Internal Revenue Service claiming unpaid federal corporate taxes for Gardiner Communications, Inc. As a recipient of the distributions on the sale and dissolution of Gardiner Communications, Inc., the Board faces potential liability. O'Donnell&Masur L.P. has retained legal counsel to represent all partners receiving a Notice of Liability. On September 5, 2003, legal counsel filed a petition on the Montana Board of Investment's behalf in U.S. Tax Court to perfect the Board's right to contest this matter.

7. YEAR END PORTFOLIO

The June 30, 2003 MPEP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Shares</u>	<u>Carrying Value</u>	<u>Fair Value</u>	<u>% of Total</u>

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Investments Managed for the state of Montana Board of Investments, All Other Funds, as of June 30, 2003 and 2002, and the related Statement of Net Investment Income and Statement of Changes in Net Investments Managed for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net investments managed by the Montana Board of Investments, All Other Funds, as of June 30, 2003 and 2002, and its net investment income and changes in its net investments managed for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2003 AND 2002

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis per section 17-6-201, MCA. The All Other Funds (AOF) investments and income are owned by various State of Montana agencies and managed on their behalf by the Board.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

The AOF investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle" and applicable investment restrictions of the participants. The AOF portfolio includes securities classified as corporate asset-backed, other corporate, US government mortgage-backed, US government, Yankee bonds, equity index, real estate, mortgages and loans. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. US government mortgage-backed securities reflect participation in a pool of residential mortgages. US government securities include direct obligations of the US Treasury and indirect obligations of the US government. Yankee bonds are US dollar denominated bonds issued by foreign corporations and governments and US companies issuing debt in foreign markets. Equity index investments are investments in selected mutual funds whose equity portfolios match a broad based index or composite.

The AOF portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 6 on Investment Risk Categories and Note 11 for the Year End Portfolio.)

AOF fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The variable-rate securities float with LIBOR (London Interbank Offered Rate) or the weighted average of the net mortgage interest rates for the mortgage loan group. The one variable-rate security, with an amortized cost of 17,889,456 as of June 30, 2003 is identified and reported as a government mortgage-backed security in the investment risk and portfolio disclosures. (See Note 6 on Investment Risk Categories and Note 11 for the Year End Portfolio.)

Effective May 1, 2002, all the venture capital and leveraged buyout investments totaling \$159,799,310, at cost, were transferred to the new Montana Private Equity Pool (MPEP). These investments were held by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

Effective May 1, 2003, all the Barclays Global Investors (BGI) S&P 500 Equity Index Fund A and the Dimensional Fund Advisors (DFA) US Small Cap Trust investments totaling \$740 million, at cost, were transferred from the All Other Funds portfolio to the new Montana Domestic Equity Pool (MDEP). These investments were held by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

Investments are presented in the Statement of Net Investments Managed at fair value. Fair values for publicly traded securities are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank and Trust. The real estate investments and residential and multi-family mortgages are valued based on a discounted cash flow. The commercial in-state coal tax loans and the nonparticipating repurchase agreements are reported at amortized cost. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

Broker Receivable/Payable

All Other Funds security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the AOF portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

Montana Mortgages and Loans Receivable

The Montana mortgages and loans receivable, included in the Net Investments Managed at Fair Value, represent residential mortgages and multifamily commercial loans funded by the Public Employees' and Teachers' pension funds and other loans funded by the Coal Severance Tax Trust fund. The Coal Severance Tax Trust loan portfolio includes loans made by the Montana Science and Technology Alliance (MSTA) Board. The MSTA Board was abolished on July 1, 1999 and by law, the MSTA portfolio was assigned to the Board of Investments (BOI). (See Note 7 for the Montana mortgages and loans portfolio.)

As of June 30, 2003 and 2002, there were no uncollectible account balances for Montana mortgages and loans receivable.

However, during fiscal year 2002, the Board of Investments staff wrote off loan principal balances detailed as follows:

<u>Borrower</u>	<u>Funding Source</u>	<u>Funding Date</u>	<u>Funding Amount</u>	<u>Charge-off Date</u>	<u>Charge-off Amount</u>
Pasta Montana, L.L.C.	BOI	February 1999	\$ 5,468,337	September 2001	\$ 206,599
Pasta Montana, L.L.C.	MSTA	January 1997	350,000	September 2001	12,551
Pasta Montana, L.L.C.	MSTA	January 1997	500,000	September 2001	19,803
Nature, Inc.	MSTA	July 1989-June 1995	1,100,000	June 2002	505,213
Optima Industries, Inc.	MSTA	Dec 1991-Jan 1994	700,000	June 2002	560,500
Ultrafem, Inc.	MSTA	Dec 1991-Oct 1992	<u>700,000</u>	June 2002	<u>490,302</u>
Total			\$ <u>8,818,337</u>		\$ <u>1,794,968</u>

Investment Income

Investment income reported in the Statement of Net Investment Income includes fixed income and mortgage interest earnings, real estate income, private equity income through April 30, 2002, commercial loan interest earnings and commitment fees.

Realized Gain on Sales

Realized gain on sales reported in the Statement of Net Investment Income represents the net gain/loss resulting from the sale of fixed income, private equity and pool investments. In fiscal year 2003, the sale of pool units from the Montana Private Equity Pool (MPEP), Trust Funds Bond Pool (TFBP), Retirement Funds Bond Pool (RFBP) and the Montana Stock Pool (MTCP) generated a net gain to participants of \$41,475,231. The sale of pool units in fiscal year 2002 from the Montana Stock Pool, Montana Real Estate Investment Pool (MTRP), Retirement Funds Bond Pool and Trust Funds Bond Pool resulted in a net gain to participants of \$14,001,245.

3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street Bank lent, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street Bank made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street Bank.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the

average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

As of June 30, 2003, the carrying and fair value of the underlying securities on loan for the All Other Funds was \$49,363,730 and \$55,128,809, respectively. The collateral provided for the securities on loan totaled \$56,643,400 in cash collateral.

As of June 30, 2002, the carrying and fair value of the underlying securities on loan for the All Other Funds was \$101,344,163 and \$106,533,000, respectively. The collateral provided for the securities on loan totaled \$109,960,231 in cash collateral.

4. COAL TAX LOAN AND MORTGAGE COMMITMENTS

The Board makes firm commitments to fund loans from the Coal Severance Tax Trust fund. These commitments have expiration dates and may be extended according to the Board's policies. As of June 30, 2003, the Board had committed but not yet purchased \$57,672,181 in loans from Montana lenders, compared to \$81,172,614 as of June 30, 2002. In addition to the above commitments, lenders had reserved \$41,421,046 for loans as of June 30, 2003, compared to \$89,331,230 on the same date in 2002.

The Board makes firm commitments to fund mortgages from the Public Employees' and Teachers' retirement funds. As of June 30, 2003 and 2002, the Board had committed but not yet purchased from Montana lenders mortgages totaling \$392,275 and \$10,634,477, respectively. Lenders had reserved no funding for mortgages as of June 30, 2003, compared to \$11,622,197 as of June 30, 2002.

5. PENSION FUND REAL ESTATE INVESTMENTS

100 North Park Building

In January 1996, the Board, on behalf of the Public Employees' and Teachers' Retirement funds, purchased the 100 North Park Avenue Building in Helena, Montana as a real estate investment. Acquired for a cost of \$4,864,326, the building carries a fair value of \$5,573,173 as of June 30, 2003. During fiscal year 2003, building improvements and leasing fees totaling \$129,465 were added to the cost of the building. Building improvements and elevator renovations totaling \$612,127 were added to the cost of the building in fiscal year 2002. The three-story building provides office space for approximately eight to ten tenants.

2401 Colonial Drive Building

In August 1997, the Board authorized the construction of an office building, as a real estate investment owned equally by the Public Employees' and Teachers' Retirement funds. Construction costs, including interest capitalization, totaled \$6,481,741 as of June 30, 2000. For fiscal year 2003, \$155,800 was expended on building landscaping, leasing fees, lighting and construction. In fiscal year 2002, landscaping and leasing fees of \$153,452 were added to the building cost. The three-story building, providing office space for three tenants, was occupied in November 1999. As of June 30, 2003, the building carries a cost and fair value of \$6,987,238 and \$7,581,770, respectively.

The schedule below details the minimum future rentals for both buildings on the non-cancelable operating leases as of June 30, 2003 and 2002:

Minimum future rentals for the year ending June 30, 2003:

<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009+</u>	<u>Total</u>
\$241,763	\$181,792	\$164,149	\$155,328	\$129,439	\$0	\$872,471

Minimum future rentals for the year ending June 30, 2002:

<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008+</u>	<u>Total</u>
\$945,147	\$194,572	\$134,601	\$134,601	\$134,601	\$44,867	\$1,588,389

California Street Property

In December 1998, the Board acquired a parcel of land adjacent to the Colonial Drive building to provide for additional parking. This land was purchased for \$204,835. As of June 30, 2003 the property carries a fair value of \$207,667.

Bozeman Office Building

In August 1999, the Board authorized the purchase of a new office building in Bozeman, Montana. When construction is complete, this building will be a real estate investment owned equally by the Public Employees' and Teachers' Retirement funds. The building will be occupied by four state agencies and is located on state school trust land. The Board anticipates completion of the building purchase in December 2003.

Ninth Avenue Building

In November 2000, the Board reviewed the transfer of the Public Employees' Retirement Administration (PERA) office building, located at 1712 Ninth Avenue, Helena, to the Board of Investments. By issuance of a corrective deed, the Board of Investments was named owner and building manager for the use and benefit of the PERA. During fiscal years 2003 and 2002, architect fees, remodeling construction and interest capitalization totaling \$129,465 and \$220,097, respectively, were added to the building cost for a yearend book value of \$489,187. As of June 30, 2003, the building is valued at \$565,413.

6. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below and on the next page to give an indication of the level of risk assumed at June 30, 2003 and June 30, 2002. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral. Long-term investments are carried at amortized cost and short-term investments are carried at original cost.

*At June 30, 2002, these underlying securities, with a fair value of \$106,533,000 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the fixed income instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires AOF fixed income investments, at the time of purchase, to be rated an investment grade as defined by Moody's and Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the U.S. government mortgage-backed category, the AOF portfolio holds a REMIC with an amortized cost of \$17,889,456 as of June 30, 2003. The REMIC securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. When underlying mortgages are prepaid, the interest cash flows are reduced while principal cash flows are increased. If homeowners pay on mortgages longer than anticipated, the cash flow effect would be the opposite.

Corporate asset-backed securities are based on cash flows from principal and interest payments on underlying auto loan receivables, credit card receivables, and other assets. These securities, while sensitive to prepayments due to interest rate changes, have less credit risk than securities not backed by pledged assets. Market risk is also less because principal is paid back prior to the maturity date of the securities.

As of June 30, 2001, Service Corp. presented a credit risk to the Board. The AOF portfolio held a \$5 million par, 6% Service Corp. bond maturing December 15, 2005. By February 2001, both the Moody's and S&P bond rating agencies downgraded the bond ratings for this issue below investment grade. The December 31, 2000 book value of \$4,807,240 was reduced to \$4,000,000 as of June 30, 2001. In April 2002, this bond was sold, on the market, for \$4,752,500 including interest.

As of June 30, 2002, Enron Corp. presented a legal and higher credit risk to the Board. The AOF portfolio holds a \$3 million par 6.75% Enron bond maturing August 1, 2009. The Enron Corp. filed for Chapter 11 bankruptcy protection on December 12, 2001. Accordingly, the November 2001 book value was reduced from \$2,610,000 to \$600,000 as of June 30, 2002. In March 2003, this issue was sold, on the market, for \$472,500.

7. MONTANA MORTGAGES AND LOANS

The Montana mortgages and loans portfolio is shown below.

<u>Montana Mortgages and Loans</u>	<u>2003 Book Value</u>	<u>2002 Book Value</u>
Multifamily Commercial Loans	\$ 10,173,421	\$ 14,555,217
Residential Mortgages	195,687,788	309,482,740
Science and Technology Alliance*	14,287,541	14,733,670
Department of Natural Resources**	46,366,904	46,366,904
Department of Justice	1,902,000	1,827,000
Montana Facility Finance	1,543,021	1,636,510
Local Government Infrastructure	9,050,975	10,289,391
Value-added Loans	6,854,640	6,627,953
Commercial Loans	<u>156,815,490</u>	<u>150,993,503</u>
Permanent Coal Trust Loans	236,820,571	232,474,931
Total Montana Mortgages and Loans	\$ 442,681,780	\$ 556,512,888

* The Montana Science and Technology Alliance (MSTA) loans include funding for research and development, mezzanine and seed capital loans.

**In accordance with Senate Bill 495 enacted by the 2001 Legislature, the Coal Severance Tax Permanent Trust loaned 483,604 TFBP shares, with a book value of \$46,366,904, to the Department of Natural Resources, Trust and Legacy fund on July 2, 2001. The loan proceeds were deposited in the Trust and Legacy Fund. A loan receivable was recorded in the Coal Severance Tax Permanent Trust and a corresponding liability was recorded in the Guarantee Fund, a General Fund sub-fund. The August 2002 Special Legislative Session approved the request to record this activity in a state special revenue fund of the Office of Public Instruction rather than in the Guarantee Fund.

8. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$2 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25, 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$215,453 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$2,273,230 in principal and interest plus \$60,000 as a consent fee.

9. LOAN GUARANTEES

As of June 30, 2003, loan guarantees provided by the Coal Severance Tax Permanent Trust to the Enterprise Fund and the Facility Finance Authority, formerly known as the Montana Health Facility Authority, totaled \$110,596,691. Board of Investment exposure to bond issues of the Enterprise Fund was \$74,478,374 while exposure to bond issues and surety bonds of the Facility Finance Authority was \$36,118,317.

As of June 30, 2002, loan guarantees provided by the Coal Severance Tax Permanent Trust to the Enterprise Fund and the Facility Finance Authority, formerly known as the Montana Health Facility Authority, total \$98,222,157. Board of

Investment exposure to bond issues of the Enterprise Fund is \$60,335,799 while exposure to bond issues and surety bonds of the Facility Finance Authority is \$37,886,358. Due to the correction of an error, loan guarantees as of June 30, 2002 were previously reported as \$97,218,949 and exposure to bond issues and surety bonds of the Facility Finance Authority were previously reported as \$36,883,150.

10. RESTATEMENT

On the Statement of Changes in Net Investments Managed for the fiscal year ended 2002, the Investments Sold, Matured and Called has been restated as \$1,077,446,586 from \$1,237,245,896 to reflect the transfer of \$159,799,310 of the Private Equity venture capital and leveraged buyout investments to the Montana Private Equity Pool (MPEP).

11. YEAR END PORTFOLIO

The June 30, 2003 All Other Funds portfolio is listed below. The security type percentage is based on the fair value ratio of the specific category of securities to the total portfolio.

LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor
John W. Northey, Legal Counsel

Deputy Legislative Auditors:
Jim Pellegrini, Performance Audit
Tori Hunthausen, IS Audit & Operations
James Gillett, Financial-Compliance Audit

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

We have audited the accompanying Statement of Net Assets of the Enterprise Fund of the state of Montana Board of Investments as of June 30, 2003 and 2002, and the related Statement of Revenues, Expenses, and Changes in Fund Net Assets and Statement of Cash Flows for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in note 1, the financial statements present only the Enterprise Fund of the Montana Board of Investments and are not intended to present fairly the financial position, of the state of Montana as of June 30, 2003 and 2002, and the results of operations and cash flows for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the state of Montana Board of Investments' Enterprise Fund as of June 30, 2003 and 2002, and the results of its operations and cash flows of its Enterprise Fund for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

Signature on File

James Gillett, CPA
Deputy Legislative Auditor

Increase/decrease in fair value of investments	\$ 1,303	\$ 68,500
Total noncash transactions	\$ 1,303	\$ 68,500

The accompanying notes are an integral part of these financial statements.

STATE OF MONTANA BOARD OF INVESTMENTS ENTERPRISE FUND

NOTES TO FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2003 AND JUNE 30, 2002

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Basis of Accounting

The Board uses the accrual basis of accounting for the Enterprise Fund. Under the accrual basis of accounting, expenses are recorded when incurred and revenues are recorded when earned. The financial statements are prepared from the Statewide Accounting, Budgeting, and Human Resource System (SABHRS) and information contained in the bond trustee statements. The statements include the financial activity administered by the Board in the Enterprise Fund.

b. Presentation of Programs

The Board uses the Enterprise Fund to account for its programs created under the Economic Development Bond Act and the Municipal Finance Consolidation Act.

Economic Development Bond Act programs include:

- The Industrial Development Bond Program (IDB) provides access to limited economic development projects through the issuance of conduit debt.
- The Conservation Reserve Enhancement Program (CRP), created in 1990 by issuing bonds, allows farmers to receive a lump sum payment by assigning their federal CRP contract to the Board. The farmers under contract must comply with seeding and other requirements. The Conservation Reserve Enhancement Program is funded by the Montana Trust Funds Bond Pool.
- The Family Friendly Business Loan Program provides zero interest loans to qualified business owners who hire participants of the Families Achieving Independence in Montana (FAIM) employment and training component.

Municipal Finance Consolidation Act programs include:

- The INTERCAP loan program provides funds to eligible Montana governments to finance capital expenditures for up to ten years.
- The Irrigation District Pooled Loan Program provided funds for the Board to purchase the refunding bonds from participating irrigation districts for the purpose of prepaying the U.S. Department of Interior, Bureau of Reclamation Projects Loans.
- The School District Pooled Refunding Program provided funds for the Board to purchase the general obligation refunding bonds of participating Montana School Districts.

c. Fixed Asset Depreciation

The equipment fixed assets recorded in the Enterprise Fund are depreciated on a straight-line basis, with salvage value, in accordance with state policy.

d. Receivables

The Enterprise Fund notes/loan receivables of \$61,771,266 as of June 30, 2003, and \$59,487,684 as of June 30, 2002, represent loans made to Montana businesses and local governments. As of June 30, 2003 and 2002, there were no uncollectible account balances.

e. Capitalized Cost of Issue

The Enterprise Fund capitalized cost of issue asset of \$1,220,532 and \$984,976 as of June 30, 2003 and June 30, 2002, respectively, represents paid bond issuance costs which have been capitalized and are being amortized, using the straight-line method, over the life of the bond.

f. Cash and Cash Equivalents

For purposes of the Statement of Cash Flows, the Enterprise Fund considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. Cash and cash equivalents, as identified in the Statement of Net Assets, are as follows:

	<u>June 30, 2003</u>	<u>June 30, 2002</u>
Cash in treasury	\$ 13,726	\$ 17,612
Cash with fiscal agent	2,243,569	(245,742)
Short Term Investment Pool (STIP)	142,680	80,417
First American treasury obligation class D corporate trust fund	<u>8,362,982</u>	<u>7,958,209</u>
Cash and cash equivalents	\$ <u>10,762,957</u>	\$ <u>7,810,496</u>

Due to the correction of an error, the Cash in Treasury as of June 30, 2002 has been restated from \$16,794 to \$17,612 and the June 30, 2002 Cash and Cash Equivalents total has been restated from \$7,809,678 to \$7,810,496.

The Enterprise Fund invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

g. Restricted Assets

The Statement of Net Assets for the Enterprise Fund reports restricted assets. Net assets are reported as restricted when constraints placed on net asset use are either:

- a. Externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments.
- b. Imposed by law through constitutional provisions or enabling legislation.

The net assets of all Enterprise Fund programs with the exception of MEDB (Montana Economic Development Bonds) Guarantee Fund Account, MEDB Guarantee CRP Note Reserve, MEDB Contingency Account, MEDB Family Friendly Account and CRP are restricted under bond indentures governing the use of these funds.

2. INVESTMENTS

The deposits and investments in the Enterprise Fund are restricted by the bond trust indentures to the following: government and agency obligations, certificates of deposits, repurchase agreements, and investment agreements. Deposits and investments must be made with Montana banks or in the Short Term Investment Pool (STIP) administered by the Board. The deposits and investments are combined on the Board's financial statements.

Investments are presented in the Statement of Net Assets at fair value. Investment fair values for publicly traded securities are determined primarily by reference to market prices supplied to the Board's trustee. Amortized cost, or carrying value, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line method to the maturity date of the securities.

The Board's investments in the Enterprise Fund are classified on the next page as to credit risk by Category 1, which includes investments that are insured or registered, or securities held by the Board or its agent in the Board's name.

**Risk as of June 30, 2003
Long-Term Investments**

<u>Investment Type</u>	<u>Category 1</u>	<u>Carrying Value</u>	<u>Fair Value</u>

Government Securities	\$ <u>1,418,888</u>	\$ <u>1,418,888</u>	\$ <u>1,443,516</u>
Total short-term investments	\$ <u>1,418,888</u>	\$ <u>1,418,888</u>	\$ <u>1,443,516</u>
Securites Lending Collateral Investment Pool	\$ <u>0</u>	\$ <u>0</u>	\$ <u>0</u>

There were no derivative transactions during the above fiscal years for investments held by the trustee.

3. SECURITY LENDING

The Enterprise Fund is a participant in the Board's Short Term Investment Pool (STIP).

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's STIP securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2003 and 2002, State Street lent, on behalf of the Board, certain STIP securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2003 and 2002 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2003 and 2002. Moreover, there were no losses during fiscal years 2003 and 2002 resulting from a default of the borrowers or State Street.

During fiscal years 2003 and 2002, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2003 and June 30, 2002, the Board had no credit risk exposure to borrowers.

4. BONDS PAYABLE

Long-Term Bonds Payable

Economic Development Bonds (EDB) and Municipal Finance Consolidation Act Bonds (MFCAB)

These bonds are issued under the Economic Development Bond Act, and the Municipal Finance Consolidation Act, for the purpose of assisting Montana's small businesses and local governments in obtaining low cost financing. Outstanding obligations are listed as follows (in thousands):

Bonds Payable as of June 30, 2003

<u>Program</u>	<u>Series</u>	<u>Amount Issued</u>	<u>Interest Range %</u>	<u>Principal Payments</u>		<u>Balance June 30,2003</u>

Total Long-Term Bonds Payable						\$ <u>9,709</u>

(1) The Board issued these bonds to provide funds to purchase the Refunding Bonds of participating Irrigation Districts for the purpose of prepaying the U.S. Department of Interior, Bureau of Reclamation Projects Loans. The Irrigation Bonds and the interest thereon are payable solely from the collection of a special tax or assessment which is a lien against real property in the Irrigation District. While the Irrigation Bonds are not obligations of the State of Montana, the bonds are limited obligations of the Board due to an irrevocable pledge to lend money for deposit by the Trustee of the Irrigation

District Pooled Loan Program Reserve Account E in an amount equal to any deficiencies therein on any payment date. The Indenture does not permit the issuance of additional bonds.

(2) The Conservation Reserve Enhancement Program is funded by the Montana Trust Funds Bond Pool.

(3) The Board issued these bonds to provide funds to purchase the general obligation refunding bonds of participating Montana School Districts. The School District Refunding Bonds and the interest thereon are payable from real property taxes levied within the school district. The 1991 Bonds are limited obligations of the Board, and are not a debt or liability of the State of Montana, and neither the faith and credit nor the taxing power of the state is pledged to the payment of principal of or interest on the bonds.

Fiscal year 2004 debt service requirements (principal & interest) are listed below (in thousands):

<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009+</u>	<u>Total</u>
\$2,680	\$2,352	\$1,785	\$1,648	\$1,629	\$1,544	\$11,638

Fiscal year 2003 debt service requirements (principal & interest) are listed below (in thousands):

<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008+</u>	<u>Total</u>
\$2,849	\$2,789	\$2,459	\$1,889	\$1,750	\$3,226	\$14,962

Current Bonds Payable

The Enterprise Fund is authorized to issue INTERCAP bonds under the Municipal Finance Consolidation Act. These bonds may not aggregate more than \$120 million as amended by the 2003 Legislature. Previously, INTERCAP bonds may not aggregate more than \$80 million through June 30, 2011 and then \$75 million thereafter. The INTERCAP bonds provide funds for the Board to make loans to eligible government units. The bonds are not a debt or liability of the State of Montana. The bonds are limited obligations of the Board payable solely from: a) repayments of principal and interest on loans made by the Board to participating eligible Montana governments; b) investment income under the indenture; and c) an irrevocable pledge by the Board. The Board has no taxing power. These bonds may be redeemed, at the bondholder's option, any March 1, prior to maturity. The Board did not enter into an arms-length financing agreement to convert the bonds "put", but not resold into some other form of long-term obligation. Accordingly, these bonds, considered demand bonds, are recorded as current liabilities of the Enterprise Fund. The INTERCAP obligations at June 30, 2003 and June 30, 2002, are listed below (in thousands):

<u>Series</u>	<u>Amount Issued</u>	<u>Interest Range</u>	<u>Maturity</u>	<u>Balance June 30, 2003</u>	<u>Balance June 30, 2002</u>
1992	6,500	Variable	2005	6,075	6,075
1994	7,500	Variable	2009	6,975	7,005
1995	7,500	Variable	2010	7,115	7,150
1997	10,000	Variable	2017	9,740	9,775
1998	12,500	Variable	2018	12,285	12,285
2000	15,000	Variable	2025	15,000	15,000
2003	<u>\$15,000</u>	Variable	2028	<u>15,000</u>	<u>0</u>
Total INTERCAP Debt	<u>\$74,000</u>			<u>72,190</u>	<u>57,290</u>
Current Portion of Long-Term Bonds Payable				<u>2,077</u>	<u>2,040</u>
Total Current Bonds Payable				<u>\$74,267</u>	<u>\$59,330</u>

5. OTHER DEBT

Conduit Debt

In this program, the Board is authorized to issue stand-alone industrial revenue bonds, under the Economic Development Act, as conduit (no commitment) debt. Assets and revenues of the borrower are pledged to repay the bonds. Because the Board has no obligation for this debt, these bond issues are not reflected on the Board's financial statements. Bonds issued by the Board as conduit (no-commitment) debt are listed below (in thousands):

<u>Project</u>	<u>Issue Date</u>	<u>Maturity Date</u>	<u>Amount Issued</u>	<u>Balance June 30, 2003</u>	<u>Balance June 30, 2002</u>
MT Cenex (Farmers Union)	August 1985	09/01/2010	\$ 3,925	\$ 3,925	\$ 3,925
Colstrip	October 1989	12/30/2015	60,800	57,300	59,100
Yellowstone Energy (BGI)	July 1993	12/31/2019	118,345	117,345	117,645
Stillwater Mining	July 2000	07/01/2020	30,000	30,000	30,000
Gainey Foundation	October 2002	09/01/2014	<u>6,000</u>	<u>6,000</u>	<u>0</u>
Total conduit debt			<u>\$ 219,070</u>	<u>\$ 214,570</u>	<u>\$ 210,670</u>

In this program, the Board is authorized to issue Qualified Zone Academy Bonds (QZAB), under the Municipal Finance Consolidation Act, as conduit (no commitment) debt. The revenues, and in some cases the taxing power, of the borrower are pledged to repay the bonds. Because the Board has no obligation for this debt, these bond issues are not reflected on the Board's financial statements. Bonds issued by the Board as conduit (no-commitment) debt are listed below (in thousands):

<u>Project</u>	<u>Issue Date</u>	<u>Maturity Date</u>	<u>Amount Issued</u>	<u>Balance June 30, 2003</u>	<u>Balance June 30, 2002</u>
Huntley Project K-12 Schools	December 2000	07/01/2013	\$ 750	\$ 750	\$ 750
Total conduit debt			<u>\$ 750</u>	<u>\$ 750</u>	<u>\$ 750</u>

6. TRANSFERS OUT

In fiscal year 2003, the Enterprise Fund transferred \$297,266 to the Board of Investment's Investment account.

7. INTERCAP PROGRAM LOAN COMMITMENTS

The Board makes firm commitments to fund loans from the INTERCAP loan program. As of June 30, 2003 and 2002, respectively, the Board committed to make loans to eligible Montana governments totaling \$20,170,082 and \$26,023,707.

8. NET ASSETS

Net Assets represents the accumulated net profits of the Enterprise Fund programs. The Net Assets for fiscal years ended June 30, 2003 and June 30, 2002 include \$192,823 and \$191,520, respectively, in unrealized appreciation/depreciation in reporting the fair value of the Enterprise Fund investments.
