## INTRODUCTION

The Montana Board of Investments (Board) is honored to submit its Annual Report for the fiscal year ended June 30, 2004. This report, required by law, discloses investment performance for the past fiscal year, summarizes the in-state investment activities of the Board, and provides public access to audited financial statements. Unless otherwise noted, all references to years in this report are state fiscal years beginning July 1 and ending June 30.

### **General Board Responsibilities**

***Unified Investment Program*** - Article VIII, Section 13 of the Montana Constitution requires that the legislature provide for a unified investment program for public funds and that the program be audited annually. Section 17-6-201, MCA established the unified investment program, created the Board, and gave the Board sole authority to invest state funds in accordance with state law and the state Constitution. State law requires that the Board operate under the "prudent expert principle," defined as: 1) discharging its duties with the care, skill, prudence, and diligence that a prudent person acting in a like capacity with the same resources and familiar with like matters exercises in the conduct of an enterprise of a like character with like aims; 2) diversifying the holdings of each fund to minimize the risk of loss and maximize the rate of return; and 3) discharging its duties solely in the interest of and for the benefit of the funds managed.

Prior to the Board's assumption of the state's investment program, state funds were invested by individual state agency staff, usually on a part-time basis. The creation of the Board in 1972 permitted a full-time professional investment staff to invest all state and (at the discretion of local governments) local government funds. At its first meeting in August 1971 the Board established four major goals:

- to centralize the state's investments;
- to invest the state's idle cash;
- to increase earnings on the state's investments; and
- to establish a sound system of control over the investment process, including provisions for systematic financial reporting, measurement of investment results, and a regular independent audit.

The unified investment program has grown from a book value of \$321 million at year-end 1972 to a book value of \$8.98 billion at year-end 2004 - an annual average increase of 11.0 percent. During the same period, the number of accounts invested by the Board increased from 40 accounts to 473 accounts.

***In-State Investments*** - In addition to the Board's primary role of managing the state's unified investment program, the legislature has encouraged the Board to assist in Montana's economic development. Montana law (17-6-304, MCA) states that the "objectives for investment of the Permanent Coal Tax Trust Fund are to diversify, strengthen, and stabilize the Montana economy, and to increase Montana employment and business opportunities while maintaining and improving a clean and healthful environment. " Section 17-6-305, MCA, states that "the Board shall endeavor to invest up to 25 percent of the Permanent Coal Tax Trust Fund . . . in the Montana economy, with special emphasis on investments in new or expanding locally owned enterprises." In recent years the Legislature has created two new loan programs - the "Infrastructure and Value-Added Loan Programs – and set aside \$50.0 million of the Trust for each program.

**Commercial/Infrastructure/Value-Added Loans** - The Board manages these programs in conformance with the "prudent expert principle" and does not invest solely to improve Montana's economy. Operating the in-state investment program under the "prudent expert principle" has not prevented the Board from investing millions of the Trust to spur Montana's economy. Since the program's inception in 1984 through 2004, the Board has funded 1,154 loans totaling \$451.2 million in 43 of Montana's 56 counties. Loans funded by county are shown on Page 50.

**Mortgages** - The Board also purchases Montana mortgages with pension funds as a part of the in-state investment program. At year-end 2004 the Board held 2,069 mortgages with total book values of \$123.6 million in 54 of Montana's 56 counties - a decrease from the 3,053 mortgages valued at \$205.9 million held at year-end 2003. The Board serves as a secondary market to qualified financial institutions in the in-state investment programs and does not lend directly to borrowers. Outstanding mortgages by county are shown on Page 48.

**Bond Program** - As a part of the Board's in-state investment activities, it also sells bonds and lends the proceeds to eligible governments for a variety of projects. Loan terms range from one to ten years, and short-term loans to finance cash flow deficits or interim financing are also available. Both the bond program and the in-state investment program, funded from the Permanent Coal Tax Trust, were created in fiscal year 1984 as part of the "Build Montana" program. Since the program's inception, \$190.4 million has been loaned to eligible governments. Additional information on the Bond Program is shown on Page 52.

**Securities Lending** - Section 17-1-113, MCA, authorizes the Board to lend securities held by the state. Investment firms borrow securities to cover short positions, failed deliveries, arbitrage trades, and other brokerage activities. In recent years the Board has lent securities to qualified borrowers who pass rigorous tests and meet high standards for credit quality. Although state law requires that securities on loan be collateralized at least 100 percent, the Board requires borrowers to maintain collateral at 102 percent for domestic securities and 105 percent for international securities. To ensure that the collateral ratio is maintained, securities on loan are marked to market daily and the borrower must provide additional collateral if the value of the securities on loan increases. In addition to the strict collateral requirements imposed by the Board, the credit quality of approved borrowers is monitored continuously.

State Street Bank and Trust, the state's custodial bank, manages the state's securities lending program and retains 25 percent of the income generated as compensation for managing the program. The state earned \$907,508 of securities lending income in 2004, compared to \$934,933 in 2003. Because this program is demand driven by the markets, earnings are volatile.

## **Board Operations**

***Board Staff*** - The Board, comprised of nine members appointed by the Governor to staggered four-year terms, employs a Chief Investment Officer and an Executive Director who hire staff as authorized by the legislature. The current authorized staffing level of 34 full-time equivalents consists of two positions hired by the Board, plus 17 investment staff, six accounting staff, three bond program staff, and six support staff. Board staff also provides administrative support to the Montana Facility Finance Authority. Except for private equity, international stock, small-cap domestic stocks, and equity index type investments, the unified investment program is managed by Board staff.

***Board Administrative Costs*** - The investment portion of Board operations is funded by administrative charges against the funds it invests, while the bond program is primarily funded by the "spread" between the interest paid on bonds issued and interest received on loans made. Effective in 1998, the Legislature sets the maximum fees the Board may charge in the investment program. Board management fees in 2004 were 3.7 basis points of the average fair market value of internally managed portfolios. Custodial bank fees were less than 1 basis point of the Total Fund's average fair market value.

## **Board Policies and Procedures**

**Investment Policies** - The Board adopts an investment policy for each individual fund it invests, except for funds investing in STIP only. The policies are tailored to the specific needs of the fund and are implemented only after consultation with the administrators of the funds. Asset allocations and investment time horizons are established by policy, as are the benchmarks against which investment performance is measured.

**Benchmarks** - The Board establishes appropriate benchmarks for each asset class and the Custodial Bank develops a composite benchmark for each fund that parallels the fund's asset allocation at market value.

**Board Meetings** - Board meetings are held at approximate six-week intervals. Meeting dates, agenda, and minutes are posted on the Board's web page at [www.investmentmt.com](http://www.investmentmt.com). All Board decisions are discussed and voted on in meetings open to the public.

## **Report Content**

This report contains historical data from 1972 (the first fiscal year the Board managed the unified investment program) through 2004. All historical data were extracted from the Board's annual published reports. Statistical data are provided on the Board's investment activity in 2004 and changes in investments from 2003. Appendix A includes income generated by account and securities portfolios for all accounts managed by the Board. Appendix B contains the Board's audited financial statements with accompanying portfolios. The financial statements provide detailed information on the investment pools, the "all other funds" account, and the Bond Program.

## **Report Terminology**

**Book Values** of fixed-income investments represent the securities' par values, plus or minus amortized premiums or discounts. Book value of equity securities is the average cost of the securities at the time of purchase.

**Fair Market Values** reflect the value of securities on June 30 as priced by the Custodial Bank, or other sources.

**Net Asset Value (NAV)** as it relates to Investment Pools reflects the fair value of the pool securities, adjusted for payables, receivables, and cash on hand at year end. The aggregate fair value of the pool units held by pool participants equals the NAV of the pool.

**Income Return** utilizes actual invested balances and investment income as recorded in the state accounting system. The calculation divides the annual net income by one-half the sum of the beginning and ending invested balances. The income includes interest, dividends, amortization of premiums/discounts, securities lending income, and distributed realized gain/loss. The calculation is performed by Board staff. Income return does not consider any change in the fair market value of the portfolio during the period.

**Total Rates of Return**, calculated by the Custodial Bank, include all investment income and the unrealized gains/losses resulting from annual changes in the market value of investments, after cash flows are netted. For periods longer than one year the returns are compounded and annualized. The total rate of return is used by the Board to compare investment staff performance to various stock/bond indices selected by the Board.

## ECONOMIC AND INVESTMENT OVERVIEW

**Bonds** - The bond market seesawed due to a rapidly changing economic picture. Bond prices rose steadily until April and then underwent a sudden reversal, boosting yields (which move in opposite direction from prices) in response to reports of higher-than-expected inflation and job growth. Declining bond prices nearly cancelled out the interest earned on long-term bonds during the year. The broad domestic bond market, as measured by the Lehman Aggregate Bond Index returned only 0.32 percent for the 12 months.

Although returns on fixed-income investments did not keep pace with

inflation in 2004, during the past five years, returns on fixed-income investments have exceeded inflation as shown in the above graph. The 3-month US Treasury Bill yielded slightly more than inflation during the period, while the 2-Year US Treasury and the Lehman Aggregate Bond Index provided returns well in excess of inflation.

**Domestic Stock** - A strong rally in domestic stock prices during the first half of the fiscal year produced solid gains for the year despite a volatile second-half. Through February, stocks benefited from strong corporate earnings growth and a string of positive economic surprises. The market environment then deteriorated when job growth slowed, the reported growth in second-quarter gross domestic product was revised downward, and rising crude oil prices became a drag on the economy.

Although returns on all domestic stocks exceeded inflation for the year, during the past five years

returns on large cap stocks (500 Index) have not kept pace with inflation as depicted in the adjacent graph. Mid cap stocks (400 Index) and small cap stocks (600 Index) provided returns well in excess of inflation during the period. Because large cap stocks comprise such a significant portion of the domestic stock market (nearly 89 percent) as measured by the S&P 1500 Index, investments in the broad index yielded an annualized negative return of 1.05 percent during the period.

## International/Domestic Equities

### 5-Year Annualized Increases

— Europe/Far East Index - 0.40%  
 — S&P 1500 Index - (1.05)%

### 2004 Increases

Europe/Far East - 32.85%  
 S&P 1500 - 20.38%

While there were significant differences in returns on international and domestic stock in fiscal 2004, longer term comparisons show a closer correlation. During the five-year period depicted in the above graph the broad international index, as measured by the EAFE (Europe & the Far East) Index outperformed the broad domestic index, as measured by the S&P 500 Index by only 1.45 percent.

**International Stock** - International stocks also rallied strongly during the first half of the fiscal year. Returns on international stock significantly exceeded domestic stock returns during fiscal 2004 largely due to the weakness in the US Dollar (which increases the returns on international investments purchased with the US dollar), particularly during the first seven months of the fiscal year. Since international stock returns are not perfectly correlated with domestic stock, adding international stocks to a portfolio reduces portfolio volatility or risk.

While there were significant

## International Regional Equities

### 5-Year Annualized Increases

— Europe/Far East Index - 0.40%  
 — Europe Index - 0.68%  
 — Pacific Basin Index - (0.43)%

### 2004 Increases

Europe/Far East - 32.85%  
 Europe - 29.39%  
 Pacific Basin - 39.46%

**Europe & Far East** - The two components of the EAFE performed quite differently in fiscal 2004, with Europe underperforming the Pacific Basin component by more than 10.0 percent as shown in the adjacent graph. However, during the past five years, the Europe component has outperformed the Pacific Basin component by more than one percent annually.

**Private Equity** - Private equity investors were rewarded handsomely during fiscal 2004, as the Board's Private Equity Pool returned 29.11 for the year. Equity valuations have jumped as investors returned to this asset class. Demand for private equity continues to

overwhelm the supply of top-tier private equity funds. The Board has been investing in this asset class since 1987. The long-term goal is to earn a 15 percent annual total rate of return. At year-end, 4.28 percent of the pension funds were invested in private equity. The Board's target for this asset class is 7.0 percent

**Short-Term Investments** - The Federal Reserve started raising short-term rate in June after lowering them 13 times over the preceding 41 months. The short-term rate began the year at 1.0 percent and ended at 1.25 percent. The systematic lowering of rates by the Federal Reserve has significantly reduced investment earnings on bank deposits and money market accounts. Investors in the Board's Short Term Investment Pool have experienced a significant reduction in income, from a net yield of 6.64 percent in fiscal 2001 to

1.11 percent in fiscal 2004. The yield in this pool will closely track any further Federal Reserve increases in short-term rates.

The Ibbotson firm has been tracking returns of various asset classes during the past 76 years, from 1926 through 2003. The Ibbotson calculated returns are shown below:

<b><u>Asset Type</u></b>	<b><u>Annualized Return</u></b>
Long-term domestic corporate bonds	5.9%
Long-term government bonds	5.4%
US treasury bills	3.7%
Large-cap domestic stocks	10.4%
Small-cap domestic stocks	12.7%
Inflation	3.0%.

# Total Funds By Source

\$9.59 Billion Fair Value At Year-End 2004

(In Millions)

## TOTAL FUND

The Total Fund is comprised of all funds invested by the Board.

Fund types invested include pensions, trusts, insurance, debt service, state agency and higher education operating accounts, and local government funds.

Unless otherwise provided by law, the Board must invest all state funds. Local governments may invest funds with the Board at their discretion.

At June 30, 2004 the fair value of the Total Fund was \$9.59 billion compared to \$8.97 billion a year earlier. The increase was primarily attributable to increases in the fair value of investments held in the various portfolios. Fair values reflect the value of securities on June 30 as priced by the custodial bank, or other sources.

During the year the Board invested 473 individual accounts, consisting of 296 state agency accounts and 177 local government accounts.

# Total Funds By Investment

\$9.59 Billion Fair Value At Year-End 2004

(In Millions)

The Total Fund portfolio by major fund type and asset type are shown in the tables on the next page.

The Total Fund invested balances and income history are shown on Page A – 17 in Appendix A.

## 2004 RFBP Participants

Net Asset Value Of Participant Units \$1.60 Billion

(In Millions)

## RETIREMENT FUNDS BOND POOL (RFBP)

On April 1, 1995, all fixed-income investments held by the nine pension funds were transferred to the newly-created Retirement Funds Bond Pool (RFBP). Each pension fund received shares in the pool equal in value to the fair value of its fixed-income portfolio on the date of the transfer.

The upper graph depicts the net asset value of the pool at June 30. The lower graph represents the fair value of the securities held by the pool. The difference in the net asset value and the securities held is the interest receivables included in the net asset value of the pool.

The RFBP distributed \$113.7 million in income to participants in 2004, compared to \$132.1 million in 2003. Income distributed includes, interest accruals, and discount/premium, and realized gains/losses.

The RFBP financial statement, which lists the individual securities in the portfolio, is shown on Page B-1 in Appendix B.

## 2004 RFBP By Investment

Fair Value Of Investments \$1.62 Billion

(In Millions)

<u>Year</u>	<u>% Return</u>	<u>Benchmark</u>	<u>Benchmark % Return</u>	<u>Return +/- Benchmark</u>
2004	1.07	LB Aggregate Bond	0.32	0.75
3 Year Annualized Average	8.49	LB Aggregate Bond	6.36	2.13
5 Year Annualized Average	8.20	LB Aggregate Bond	6.95	1.25

**INVESTMENT OBJECTIVE/CONSTRAINTS**

- Diversified portfolio, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.
- Above average risk tolerance, especially long-term investment risk.
- Low liquidity requirements, except for investment purposes.
- Securities purchased are investment-grade as per Standard & Poor's or Moody's rating services with maturities not exceeding 40 years.
- No additional purchases permitted if credit risk exceeds two percent.
- Mortgage-backed securities purchased must be backed by the US Government or its agencies.
- All securities must pay in US Dollars.

## 2004 TFBP Participants

Net Asset Value Of Participant Units \$1.26 Billion

## 2004 TFBP By Investment

Fair Value Of Investments \$1.27 Billion

## TRUST FUNDS BOND POOL (TFBP)

On October 1, 1995, all fixed-income investments held by the state's major trust funds were transferred to the newly-created Trust Funds Bond Pool (TFBP). Each trust fund received shares in the pool equal in value to the fair value of their fixed-income portfolio on the date of the transfer.

The upper graph depicts the net asset value of the pool at June 30. The lower graph represents the fair value of the securities held by the pool. The difference in the net asset value and the securities held is due to interest receivables and cash included in the net asset value.

The TFBP distributed \$86.8 million in income to participants in 2004, compared to \$81.3 million in 2003. Income distributed includes interest accruals, discount/premium, and realized gains/losses.

The TFBP financial

statement, which lists the individual securities in the portfolio, is shown Page B-11 in Appendix B.

The tables on the next page show:

- The changes in book value of portfolio securities,
- The difference between book and fair value of the securities portfolio, and
- The securities portfolio's total rate of return.

## **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Diversified portfolio, producing a total rate of return exceeding the Lehman Brothers Aggregate Bond Index over a five-year rolling period.
- Above average risk tolerance, especially long-term investment risk.
- Low liquidity requirements, except for investment purposes.
- Securities purchased are investment-grade as per Standard & Poor's or Moody's rating services with maturities not exceeding 40 years.
- No additional purchases permitted if credit risk exceeds two percent.
- Mortgage-backed securities purchased must be backed by the US Government or its agencies.
- All securities must pay in US Dollars.
- Current income is important since it is distributed to participants.

**SHORT TERM INVESTMENT POOL (STIP)**

**2004 STIP Participants**

Net Asset Value Of Participant Units \$1.48 Billion

The Short Term Investment Pool (STIP), created in 1974, provides participants access to a short-term money market fund. Shares are fixed at \$1.00, fractional shares may be purchased, and participants may buy or sell shares with one business day's notice. Income is distributed on the first day of the month.

The upper graph depicts the net asset value of the pool at June. The lower graph shows the historical yield to participants based on distributed income after management and custody fees are deducted.

**Annual STIP Yields**

(In % Net of Management Fees)

There were 473 accounts invested in STIP during the year, consisting of 296 state accounts and 177 local government accounts. The STIP distributed \$15.8 million to participants in 2004, compared to \$21.3 million in 2003.

The STIP financial statement, which lists the individual securities in the portfolio, is shown on Page portfolio is listed on Page

B-21 in Appendix B.

The tables on the next page show:

- The changes in Net Asset Value by major participant type,
- The book and fair value of the securities portfolio by major asset type, and
- The securities portfolio's total rate of return.

## **INVESTMENT OBJECTIVE/CONSTRAINTS**

- Diversified money market fund, producing a total rate of return 105 percent of the 91-Day US Treasury Bill.
- Highly liquid portfolio.
- Maximum security maturity of 397 days.
- Participants include state agencies, local governments and school districts.
- Risk tolerance is low.

## 2004 MDEP Participants

Net Asset Value Of Participant Units \$2.90 Billion

## MONTANA DOMESTIC EQUITY POOL (MDEP)

The Montana Domestic Equity Pool (MDEP) was created in May 1, 2003, when all investments held in the Montana Common Stock Pool, the Standard and Poor's 500 Index Fund A and the Dimensional Fund Advisors US Small Cap Index were combined to create the pool.

The upper graph shows the net asset of the pool at June 30. The lower graph shows the fair value of investments held by active and passive management.

The MDEP distributed \$32.4 million of income to participants in 2004, compared to \$28.9 million in 2003. Income distributed includes dividends, security lending, and miscellaneous income. All realized capital gains and losses are retained in the pool.

The MDEP financial statement, which lists the individual securities in the

## 2004 MDEP By Investment

Fair Value Of Investments \$2.90 Billion

portfolio, is shown on Page B – 27 in Appendix B.

The tables on the following pages show:

- The 10-largest holdings in the actively-managed portfolio,
- Changes in the fair value of the securities portfolio by sector,
- The book value and fair value of the securities portfolio, and
- The active-managed securities portfolio's total rate of return.

# 2004 MTIP Participants

Net Asset Value Of Participant Units \$857.90 Million  
(In Millions)

# MONTANA INTERNATIONAL STOCK POOL (MTIP)

The Montana International Equity Pool (MTIP) was created during 1997 when the nine pension funds purchased pool shares to fund investments in international stock. Cash dividends, interest and related income currency gains/losses are distributed monthly.

The upper graph depicts the net asset value of the pool at June 30. The lower graph shows the fair value of the securities held by the pool by region.

# 2004 MTIP By Investment

Fair Value of Investments \$853.9 Million

The difference between the net asset value of the pool and the fair value of investments held is due to investments purchased but not yet paid for. Net asset value is reduced by the payable due for the purchase.

The MTIP distributed \$7.1 million of income to participants in 2004, compared to \$8.5 million in 2003. The MTIP financial

statement, which lists the individual securities in the portfolio, is shown on Page B-36 in Appendix B.

The tables on the following pages show:

- The investment managers and the fair value of their securities portfolios,
- The changes in securities fair value by country,
- The book and fair values of securities portfolios by country, and
- The total rates of return by actively-managed securities portfolio.

**MONTANA PRIVATE EQUITY POOL (MPEP)** The Montana Private Equity Pool was created on May 1, 2002 when all private equity investments held by the nine pension funds were transferred to the pool. Each pension fund received shares in the pool equal to the fair value of their private equity investments and also transferred cash to the pool to provide for investment purposes. The MPEP financial statement, which lists the portfolio, is shown on Page B-49 in Appendix B.

Private equity investments are participations in non-publicly traded equity ownership of a fund or operating company either directly or more commonly through a partnership. As of June 30, 2004, seven private equity managers invested the pool's assets.

**Adams Street Partners** – A fund-of-fund investment manager, formerly, Brinson Partners offers a wide range of private equity capital investment alternatives.

**Kolberg, Kravis & Roberts** - A global leveraged-buyout firm organized in 1975 that seeks investment opportunities in a wide-range of industries.

**Madison-Dearborn Partners** - A private equity investment firm, founded in 1992, that seeks growth equity transactions and management buyout opportunities in a wide range of industries.

**Welsh Carson Anderson Stowe** - A leveraged-buyout firm founded in 1979 focused on information services, communications and healthcare industries.

**Lexington Partners** – A private equity firm, founded in 1994, specializing in secondary investments that provide liquidity to owners of domestic and international private equity limited partnerships. The firm also co-investments with other private equity sponsors and invests in newly-formed private equity partnerships.

**Oaktree Capital Management** – A firm investing in distressed debt, high yield, and convertible securities markets. The Board invested \$75.0 million with the firm in September 2002.

**Arclight Capital Partners** – Established in 2001, the firm is one of the leading private investment firms focused exclusively on the electric power industry.

The types of investments made by private equity managers generally fall into the following categories:

**Private Equity** – Private equity investments in funds or operating companies in an asset class other than cash, stocks, or fixed income securities and real estate.

**Venture Capital** – Equity or equity-like investments in companies that have undeveloped or developing products or revenue.

**Leveraged Buy-Outs** – Equity investments in public or private companies that purchase a significant portion or majority control of the company.

**Mezzanine** – Investments in the subordinated debt and/or equity of privately owned companies. The debt holder participates in equity appreciation through conversion features, such as rights, warrants, and/or options.

**Special Situations** – Includes: 1) investments in the exploration for oil and/or gas reserves or in the development of proven reserves; 2) investments in land to harvest timber; and 3) investments that have a special component usually related to geographical, economic, or social issues sometimes referred to as Economically Targeted Investments.

**Secondary Investments** – Investments in a previously-owned limited partnership or investment in previously owned limited partnership via a secondary fund.

**Distressed Debt** – Public and private debt of companies that appear unlikely to meet their financial obligations but are attractive to investors, not for repayment of interest and principal which are unlikely to be paid, but for the claim placed on the firm's value by unpaid creditors.

## Pension Funds By Source

## Pension Funds By Investment

\$5.95 Billion Fair Value At Year-End 2004

(In Millions)

## PENSION FUNDS

The upper Graph depicts the state's nine pension fund investment portfolios at fair value as of June 30.

The lower graph depicts total pension fund investments by major investment type.

By law, all public pension funds in the state, including local governments and school districts, are managed by the state. The Board of Investments manages all pension fund investments. Pension fund operations are administered by two boards appointed by the Governor.

The Teachers' Retirement Board manages the Teachers' Retirement System, while the Public Employees' Retirement Board manages the other eight systems.

As of June 30 approximately 98 percent of pension fund investments at fair value were managed in various investment pools created by the Board. These pools, which operate similar to

mutual funds, simplify investing and accounting, and provide broader diversification for the smaller funds. Income is distributed monthly to pool participants.

The pension funds earned \$315.9 million on their investments in 2004, compared to \$232.2 million in 2003. The total rate of return of each fund is shown in the individual pensions that follow.

# Pension Equity Investments

The Board has increased pension investments in equities in recent years to increase the total rate of return. The current target is 67 percent of the fair value of pension investments.

Declining equity prices reduced fair value of total pension fund investments from 2001 through 2003. Pension fund assets of \$5.95 billion in 2004 finally surpassed the 2000 value at the peak of the stock market bubble.

During 2001 through 2003 the Board actively sold fixed-income investments and invested the sale proceeds in the equity markets.

This rebalancing and a resurgent of domestic and international stock markets brought pension fund equity allocation to 68 percent of total pension fund investments in 2004.

From 1994 to 2002, the Board significantly increased pension investments in Montana mortgages. Mortgages investments peaked at

# Pension Mortgages History

## Outstanding Principal At Year-End

\$324.0 million in 2002. During 2003 and 2004, mortgage rates on the secondary market declined to less than 6 percent and the Board declined to purchase mortgages for the pension funds at these rates. This policy, combined with heavy mortgage refinancings of mortgages in the portfolio caused a significant drop in the pension mortgage portfolio to \$123.6 million at year-end 2004.

## TRUST FUNDS

The Board invests several trust funds, some of which are created and protected by the state constitution.

Other trusts have been created statutorily by the legislature or involve federal funds.

Several trust funds were established as a part of settlements between the state and private corporations to ensure environmental clean up of polluted sites.

# Trust Funds By Investment

## \$1.69 Billion Fair Value At Year-End 2004

(In Millions)

The upper graph shows the various trust funds by type. The lower graph shows the trust fund investments by major asset class.

The table on the next page shows the change in the book value from 2003 to 2004 by individual trust fund.

(1) Includes Treasure State Endowment, Treasure State Water, CST Bond, and Permanent Income Accounts

A complete listing of individual trust fund investment portfolios is shown beginning on Page A – 1 in Appendix A. The investment income earned by each trust is shown beginning on Page A-1 in Appendix A.

## COAL TAX TRUST FUND

Article IX, Section 5 of the state Constitution requires that 50 percent of all coal severance tax revenues be deposited in a permanent trust fund (Trust), in which the principal "shall forever remain inviolate unless appropriated by a three-fourths vote of each house" of the legislature. The Board is encouraged to invest up to 25 percent of the Trust in Montana businesses.

The legislature has partitioned the Trust into several sub-funds. The Permanent Fund was initially established when the Trust was created, while the Severance Tax Bond Fund, created later, provides debt service guarantees and is invested solely in STIP. The Treasure State Endowment Fund was created July 1, 1993, with a \$10.0 million transfer from the Permanent Fund. From July 1, 1993 through June 30, 1999 one-half of the coal severance tax earmarked for the Trust was deposited in the Permanent Fund and the remaining 50 percent was deposited in the Treasure State Endowment Fund.

Effective July 1, 1999, a new "Treasure State Endowment Regional Water Fund" sub-fund was created and 25 percent of Trust revenues dedicated to that account.

Income from the Permanent Fund and the two Bond Funds is deposited in the Permanent Fund Income Fund where it is swept periodically to the state General Fund. All sub-funds, except the income fund, are protected by the constitution and may be appropriated only by a three-fourths vote of each house of the legislature. Income from the Treasure State Endowment is appropriated by the Legislature for local government infrastructure projects. Treasure State Endowment Regional Water Fund income is appropriated by the Legislature for local government water projects.

The book values of the Coal Tax Trust sub-funds are shown below:

<b>Coal Tax Trust Subfunds at June 30</b>						
<b>Subfund</b>	<b>2004 \$ Book Value</b>	<b>% of Total</b>	<b>2003 \$ Book Value</b>	<b>% of Total</b>	<b>\$ Change</b>	<b>% Change</b>

(1) An Index Composite paralleling the Fund's asset allocation at fair value

The Resource Indemnity Trust Fund earned \$7.4 million in investment income in 2004, compared to \$7.2 million in 2003. The Resource Indemnity Trust Fund invested balances and investment income history are shown on Page A-22 in Appendix A.

## COAL TAX PARKS/CULTURAL TRUST FUNDS

A portion of the coal severance tax is dedicated to a statutorily created Parks Trust Fund and a Cultural Trust Fund (Trusts). Investment income generated by the Trusts is appropriated by the legislature to acquire/operate state parks and to fund cultural and aesthetics projects. The 1997 Legislature appropriated \$3.9 million of Cultural Trust principal to Purchase Historical Properties.

<b>Coal Tax Parks/Cultural Funds Annual Change At June 30</b>

The trusts earned \$1.5 million in investment income in 2004, compared to \$1.4 million in 2003. The invested balances and investment income history of these trusts are shown on Page A-23 in Appendix A.

## OTHER TRUST FUNDS

**Fish, Wildlife, and Parks (FWP) Mitigation Trust** - expendable trust funds fish and wildlife mitigation/enhancements.

**Abandoned Mine Trust** - expendable trust funds abandoned mine reclamation.

**FWP Real Property Trust** - non-expendable trust funds operations, development, and maintenance of FWP real property.

**Weed Control Trust** - non-expendable \$2.5 million trust funds noxious weed control.

**Wildlife Habitat Trust** - funds acquisition/development/maintenance of wildlife habitat.

**Montana Post and Pole Trust** - funds environmental cleanup of the former Montana Pole and Treatment Plant in Butte.

**Guaranteed Student Loan** - the federal portion of student loan monies.

**The UCFRB Funds** represent proceeds from state settlements with the Atlantic Richfield Company for restoration of the Upper Clark Fork River Basin.

**Streamside Tailing Funds** are derived from a consent decree between the state and the Atlantic Richfield Company for remedial treatment of the Silver Bow Creek/Butte area.

**Tobacco Trust** – The nation’s largest tobacco companies are required to pay at least \$205.0 billion over the next 25 years to the states. Forty percent of Montana’s share is deposited in a trust fund.

**Zortman/Landusky Funds** were paid by the Pegasus mining company and its insurer to provide long-term water treatment at the closed Zortman and Landusky mines near Malta.

The other trust portfolios are listed beginning on Page A-7 in Appendix A. The investment income earned by each trust is shown beginning on Page A-1 in Appendix A.

## STATE FUND INSURANCE

The State Compensation Insurance Fund (State Fund) provides workers' compensation and occupational disease insurance for claims arising from injuries occurring on or after July 1, 1990. Effective on that date, the state's workers' compensation fund was divided into two funds with separate liabilities. The "old" fund retained all financial obligations for claims for injuries occurring prior to July 1, 1990, while the "new" fund assumed claim obligations for injuries occurring after that date.

The State Fund earned \$27.8 million in investment income in 2004, compared to \$29.1 million in 2003. The State Fund portfolio is listed beginning on Page A-9 of Appendix A.

## OTHER INSURANCE FUNDS

**Old Workers - Compensation Fund** - pays claims for all injury claims occurring prior to July 1, 1990.  
**Group Insurance** - created in 1981, provides health and life insurance to non-university state employees.

**Subsequent Injury** - provides benefits to workers who are vocationally handicapped and whose Workers' Compensation benefits have expired.

**Hail Insurance** - insures crops from hail damage. The entire account is currently held in STIP.

Other insurance programs whose investments are held solely in STIP include:

University Group Benefits.....	\$14,405,399
Uninsured Employers .....	431,815
Agency Insurance.....	2,059,371
<b>Unemployment Insurance Benefits .....</b>	<b>3,382,443</b>

## TREASURER'S FUND

The Treasurer's Fund (Fund) is comprised of surplus cash in all state accounts that do not retain their investment earnings. All earnings are deposited in the State General Fund. State law authorizes the Board to determine the amount of surplus cash in the Fund to be invested and the type of investments to be made. Invested balances at book value vary widely due to varying levels of excess cash in the state's General Fund and other accounts comprising the Fund. This fund has been a major investor in STIP since 1974 when STIP was created. The "Other" category depicted in the graph consists of US Government securities and Repurchase Agreements.

The Treasurer's Fund earned \$6.4 million in investment income in 2004 and 2003. The Treasurer's Fund Portfolio is listed beginning on Page A-7 of Appendix A. The Treasurer's Fund invested balance and income history are shown on Page A-24 of Appendix A.

## MONTANA RESIDENTIAL MORTGAGES

### Pension Mortgages History

#### Outstanding Principal At Year-End

The Board invests pension funds in Montana mortgages by purchasing all or a portion of mortgages from qualified financial institutions. Interest rates are set weekly, based on quotes from the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, the two major US secondary mortgage markets. Financial institutions charge a fee for servicing the loans. The number and location of mortgages purchased by the Board depend upon the mortgage lending activities of individual financial institutions and their interest in the Board's mortgage program.

#### Montana Mortgages By Type Annual Change At June 30

<u>Mortgage Type</u>	<u>2004</u> <u>Book Value</u>	<u>% Of</u> <u>Total</u>	<u>2003</u> <u>Book Value</u>	<u>% Of</u> <u>Total</u>	<u>\$</u> <u>Change</u>	<u>%</u> <u>Change</u>
Residential Conventional	85,373,121	69.1	145,672,381	70.8	(60,299,260)	(41.4)
Residential FHA	30,690,906	24.8	44,621,235	21.7	(13,930,330)	(31.2)
Residential VA	3,387,178	2.7	5,151,065	2.5	(1,763,887)	(34.2)
Multi-Family Conventional	581,552	0.5	1,986,337	1.0	(1,404,785)	(70.7)
Commercial	3,586,615	2.9	8,430,191	4.1	(4,843,575)	(57.5)
<b>Total Mortgages</b>	<b>123,619,372</b>	<b>100.0</b>	<b>205,861,209</b>	<b>100.0</b>	<b>(82,241,837)</b>	<b>(40.0)</b>

Mortgage rates on the secondary market declined to less than 6 percent during 2003 and the Board declined to purchase mortgages for the pension funds at these rates. This policy, combined with heavy mortgage refinancings of mortgages in the portfolio caused a significant drop in the pension mortgage portfolio during 2003 and 2004.

**Loan Losses/Arrears** – Pension Mortgage loans in arrears 90 or more days decreased from .36 percent of total mortgage holdings at year end 2003 to .24 percent of mortgage holdings at year end 2004. These arrears ratios compare to .50 percent and .44 percent respectively for Montana \* financial institutions during the period. The number of properties in foreclosure decreased from six at year-end 2003 to one at year-end 2004. All mortgages are secured by single-family residential, multi-family residential, or commercial properties in Montana.

## COAL TAX TRUST LOANS

Created in 1984 as part of the "Build Montana" program, this program invests Coal Tax Trust funds in Montana to stimulate the state's economy. State law authorizes the Board to invest the Trust to increase employment and business opportunities, while maintaining and improving the state's physical environment. The "other" portion of the graph is comprised of these loans:

- DNRC - \$44.5 Million
- Science & Tech - 13.9 Million
- Dep. of Revenue – 5.7 Million
- Dep. of Justice - 2.0 Million
- Facilities Finance - .9 Million

**Loan Types** – Five loans types are available in the In-State Investment Program, some of which offer a job credit interest rate reduction equal to 0.05 percent for each job created, up to a maximum reduction of 2.5 percent.

**The Federal Guaranteed Loan Program** purchases the guaranteed portion of loans, guaranteed by the Small Business Administration, the Bureau of Indian Affairs, the Rural Business and Cooperative Service, and the Economic Development Administration. Loan proceeds may be used for working capital, inventory, equipment, real property, or similar items. At year-end 2004, this Program had \$66.99 million in loan principal outstanding, or 48.8 percent of total outstanding Commercial Loan principal.

**The Business Loan Participation Program** purchases from originating financial institutions up to 80 percent of a participation loan. Unencumbered land, buildings, and equipment may be financed with the loan proceeds. The financial institutions charge a fee to service the loan and the Board's loan is collateralized proportionally to the Board's share of the loan. At year-end 2004, this Program had \$65.67 million in loan principal outstanding, or 47.9 percent of total outstanding Commercial Loan principal.

**The Economic Development Linked Deposit Program** offers businesses long-term, fixed-rate financing for working capital, inventory, or real property. The Board places a long-term deposit at a pre-established rate with the financial institution originating the loan. The lender assumes all loan risk and is assured a specific "spread" for the term of the loan. At year-end 2004, this Program had \$4.52 million in loan principal outstanding, or 3.3 percent of total outstanding Commercial Loan principal.

**The Infrastructure Loan Program** provides loans to eligible local governments for constructing infrastructure required by job creating businesses in their jurisdiction. At year-end 2004, this Program had \$8.30 million in loan principal outstanding. Total loans outstanding in this Program are limited by law to \$50.0 million.

**The Value-added Loan Program** provides low interest loans to value-added type businesses that create or retain jobs. At year-end 2004, this Program had \$9.20 million in loan principal outstanding. Total loans outstanding in this Program are limited by law to \$50.0 million.

**Loan Yield** - On June 30, 2004, the average weighted yield of all outstanding commercial loans, excluding Value-Added Loans whose interest rates are set by law, was 6.33 percent.

**Loan Losses/Arrears** - The number of loans in this program in arrears 90 or more days increased from .08 percent of total outstanding loans at year-end 2003 to .87 percent of outstanding loans at year-end 2004. These arrears ratios compare to .80 percent and 2.04 percent, respectively for Montana\* financial institutions during that period. There were no losses in 2003 or 2004.

\*Source: Total FDIC Past Due and Non Accrual as of 3/31-04

In addition to the Coal Tax Loan Program and the Residential Mortgage Programs, the Board also invests other state funds in Montana and guarantees bonds as shown in the table below:

(1) Guarantees of INTERCAP and Montana Facility Finance Authority Bonds

## BOND PROGRAMS

### INTERCAP Loans From Inception By Borrower Type \$190.43 Million

**INTERCAP** - The Board administers several bond programs under the Montana Economic Development Bond and the Municipal Finance Consolidation Acts, created as part of the "Build Montana" program in 1984.

The INTERCAP program lends funds to eligible governments for a variety of purposes. The upper graph depicts the types of borrowers using the program since its inception. Since 1987, 387 eligible governments have received 978 loans, totaling \$190.43 million.

### INTERCAP Loans From Inception By Project Type \$190.43 Million

The lower graph shows the types of projects for which loans were made since program inception. At June 30, 2004, there was \$64.92 million in outstanding loan balances.

INTERCAP loans are funded with proceeds from bonds issued by the Board. Since the program's inception, the Board has issued \$109 million in bonds with \$90.55 million outstanding at June 30, 2004.

Loan interest rates, which are reset each February 16 based on the interest on the bonds funding the loans, were set at 2.70 percent on February 16, 2004.

Other bond programs managed by the Board are:

- ***School District Pooled Refunding Program***

In 1991 the Board purchased general obligation refunding bonds of participating school districts, enabling the districts to refinance their outstanding bonds at a lower interest rate. The 16 school districts participating in this \$6.234 million bond issue saved a total of \$577,600 in interest over the life of the refunding bonds. Although this Program is inactive, it could be re-activated given sufficient demand.

- ***Pooled Irrigation Program***

Five irrigation districts participated in this Program that prepaid their outstanding loans to the federal Bureau of Reclamation. The Board issued bonds of \$4.976 million in 1988 to prepay \$15.6 million of non-interest bearing federal loans held by the districts. The Board lent the bond proceeds to the districts at an average 7.20 percent interest. Although the districts paid off non-interest federal loans with interest bearing loans, they saved a total of \$5.9 million, because the federal loans were prepaid at steep discounts, thereby significantly lowering the amount of principal owed by the districts.

- ***Qualified Zone Academy Bond Program (QZAB)***

This program allows qualifying school districts to borrow money at no or nominal interest rates by issuing qualified zone academy bonds. Bonds outstanding as of June 30 are listed below:

<b>Project</b>	<b>Issue Date</b>	<b>Issue Amount</b>	<b>6/30/04 Balance</b>
Huntley Project Schools	12/00	750,000	750,000
Bozeman Public Schools	11/03	1,586,000	1,586,000
Philipsburg Schools	12/04	2,000,000	2,000,000
<b>Total</b>		<b><u>4,336,000</u></b>	<b><u>4,336,000</u></b>

### **Economic Development Bond Act**

- ***Stand Alone Economic Development Bond Program***

This Program provides qualifying businesses access to tax-exempt funds and the Board has issued bonds to finance several projects. The Board acts as a legal funding conduit only and is not pecuniarily liable for the repayment of the bonds. Bonds outstanding as of June 30 are listed below:

<b>Project</b>	<b>Issue Date</b>	<b>Issue Amount</b>	<b>6/30/04 Balance</b>
Colstrip	10/89	60,800,000	55,300,000
BGI	07/93	118,345,000	116,945,000
Stillwater Mining	07/00	30,000,000	30,000,000
Gainey Foundation	10/02	6,000,000	5,570,000
<b>Total</b>		<b><u>219,070,000</u></b>	<b><u>207,815,000</u></b>

- ***Montana Conservation Reserve Payment (CRP) Enhancement Program***

This Program provides loans to Montana farmers to refinance outstanding loans and/or to purchase additional land and farm equipment. The borrowers assign their federal CRP contracts to the Board in exchange for a loan ranging from 60 percent to 75 percent of the remaining payments on the CRP contracts. When the Program began, bonds were issued to provide funding for the loans. Recently, the loans have been funded from the Trust Funds Bond Pool as an investment. Loan interest rates are typically set at 0.50 higher than the interest set by the Trust Funds Bond Pool manager. A total of 230 loans, totaling \$30.11 million have been funded under this Program.

- ***Pooled Economic Development Bond Program***

This Program, inactive since 1986 due to federal tax law revisions, provided loans to small businesses to expand and improve their facilities. The Board funded the loans by issuing tax-exempt bonds. Except for a pledge of revenues and a guaranty fund, the Board has no pecuniary liability under this Program. Although there are two loans outstanding in this program, the bonds issued to fund the loans have been repaid.

The Bond Program financial statements begin on Page 68 of Appendix B.

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Retirement Funds Bond Pool, as of June 30, 2004, and 2003, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Retirement Funds Bond Pool, as of June 30, 2004, and 2003, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

STATE OF MONTANA BOARD OF INVESTMENTS  
RETIREMENT FUNDS BOND POOL

NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2004 AND 2003

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Retirement Funds Bond Pool (RFBP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, to participate in a diversified pool. The RFBP was created on April 1, 1995, by the transfer of all fixed income and variable-rate securities owned by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

RFBP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The RFBP portfolio includes corporate asset-backed, other corporate, U.S. government mortgage-backed, government, Yankee securities and cash investments. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. U.S. government mortgage-backed securities reflect participation in a pool of residential mortgages. Government securities include direct and indirect obligations of the U.S. Treasury and state and local government bonds. Yankee bonds are U.S. dollar denominated bonds issued by foreign corporations and governments and U.S. companies issuing debt in foreign markets.

The RFBP portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Some RFBP REMICs are interest-only strips (IOs). Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. IOs receive cash flow from the interest payment component on underlying mortgage loans. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 6 for the Year End Portfolio.)

RFBP fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The RFBP variable-rate securities float with LIBOR (London Interbank Offered Rate) or the weighted average of the net mortgage interest rates for the mortgage loan group. The three variable-rate securities, with a total amortized cost of \$250,000 and \$450,000, respectively, as of June 30, 2004 and 2003, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 6 for the Year End Portfolio.)

The RFBP, as an internal investment pool, invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

Investments are presented in the Statement of Net Asset Value at fair value. Fair values are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

**Participant Units**

The Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all fixed income and variable-rate securities, at amortized cost, into the RFBP at the start-up date and were issued units according to the market value of each participant's portfolio. The initial unit value as of April 1, 1995, was \$100.00. Unit values thereafter are calculated weekly and at month end, based on portfolio pricing, to allow for participant transactions to occur as determined by the investment staff.

The June 30, 2004 unit value of \$104.32 decreased from a June 30, 2003 unit value of \$110.84. The yield on bonds increased during the fiscal year, which has the effect of decreasing bond prices and the pool unit value. A one percent (1%) change in interest rates is expected to have a five to seven percent (5%-7%) inverse change in the unit value. RFBP investments are considered long-term in nature.

The Value of Units Purchased and Sold by Participants of \$87.9 million and \$2.7 million, respectively, for fiscal year 2004, as compared to \$213.5 million sold for fiscal year 2003, reflects the pension funds' portfolio rebalancing. RFBP units were purchased and sold to adjust the pension funds' portfolio towards the stated equity/fixed income asset allocation.

#### Broker Receivable/Payable

RFBP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the RFBP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

#### Other

Accumulated income, recorded as Income Due Participants, is distributed monthly on the first calendar day of each month. Realized portfolio gains/losses are distributed at least annually to the participants.

Interest income reported in the Statement of Investment Income and Distribution includes interest accruals and miscellaneous income. For fiscal year 2004, the decrease in interest income of \$13.5 million is attributed, primarily, to lower interest rates.

Administrative expenses incurred by the Board are charged daily to RFBP based on the Board's expenses applicable to RFBP. These expenses include costs for the custodial bank contract.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street loaned, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit as collateral. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine.

As of June 30, 2004, the carrying and fair values of the underlying securities on loan for the RFBP were \$198,575,526 and \$209,968,206 respectively. Cash collateral provided for the securities on loan totaled \$215,688,215.

As of June 30, 2003, the carrying and fair values of the underlying securities on loan for the RFBP were \$63,891,787 and \$79,703,155 respectively. Cash collateral provided for the securities on loan totaled \$82,134,484.

#### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2004 and June 30, 2003. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2004

##### Category 1

Securities Lending Collateral Investment Pool			\$ <u>82,134,484</u>	\$ <u>82,134,484</u>	\$ <u>82,134,484</u>

\*At June 30, 2003, these underlying securities with fair values of \$79,703,155 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the above instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires RFBP investments, at the time of purchase, to be rated investment grade as defined by Moody's or Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the government mortgage-backed category, the RFBP portfolio holds REMICs totaling \$1,034,466 and \$1,703,480 in amortized cost, respectively, as of June 30, 2004 and June 30, 2003. These securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. The IOs are more sensitive to prepayments by mortgagees resulting from interest rate changes than other REMIC securities.

The IO REMIC securities purchased in August and September 1992 are being reduced periodically towards zero according to the expected average life of the underlying mortgages. The IO securities amortized cost is \$250,000 as of June 30, 2004 and \$450,000 as of June 30, 2003.

Corporate asset-backed securities represent debt securities collateralized by a pool of assets. The RFBP corporate asset-backed securities are secured by lease payments and real estate. Credit risk for corporate asset backed securities is generally less than other corporate securities because assets are held by a third party.

As of June 30, 2004 and June 30, 2003, Burlington Industries, Inc. presented a legal and higher credit risk to the Board.

The Board owns a Burlington Industries, Inc., \$6 million par, 7.25% bond maturing September 15, 2005. In September 2000, the company announced a reduction of stockholders equity. Due to an increasing senior bank line and declining credit trend, the bond ratings for this issue were downgraded, in May 2001, by the Moody's and Standard & Poor's rating agencies. During fiscal year 2001, the book value of Burlington Industries Inc. was reduced from the August 31, 2000 book value of \$5,609,640 to \$2,400,000. Due to the company's filing for Chapter 11 bankruptcy protection on November 11, 2001, the book value was reduced to \$1,200,000. In October 2003, Burlington Industries, Inc. received court approval to sell its assets. Under the company's recovery plan, the Board received \$1,454,961 in August 2004 for its unsecured claim. This transaction reduced the book value to \$0 and generated a gain of \$254,961. The Board is expected to receive additional proceeds for its claim.

As of June 30, 2003, Enron Corp. presented a legal and higher credit risk to the Board.

The RFBP held a \$7 million par 6.40% Enron bond maturing July 15, 2006 and a \$7 million par 6.95% Enron bond maturing July 15, 2028. The combined book value of these securities was \$13,582,030 as of November 30, 2001. On December 12, 2001, the Enron Corp. filed for Chapter 11 bankruptcy protection. Accordingly, the November 2001 book value for the two issues was reduced to \$5.6 million as of June 30, 2002. In October 2002, the book value was reduced to \$2.8 million for both issues. In July 2003, both issues were sold, on the market, for a total of \$2.36 million.

## 5. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$5 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25, 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$538,632 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$5,683,075 in principal and interest plus \$150,000 as a consent fee. As of November 15, 2004, this matter is still pending.

## 6. YEAR END PORTFOLIO

The June 30, 2004 RFBP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Coupon</u>	<u>Maturity</u>	<u>Par</u>	<u>Book Value</u>	<u>Fair Value</u>	<u>% of Total</u>

## LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Trust Funds Bond Pool, as of June 30, 2004, and 2003, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Trust Funds Bond Pool, as of June 30, 2004, and 2003, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

**STATE OF MONTANA BOARD OF INVESTMENTS  
TRUST FUNDS BOND POOL**

**NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2004 AND 2003**

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Trust Funds Bond Pool (TFBP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, to participate in a diversified pool. The TFBP was created on October 1, 1995, by the transfer of all fixed income and variable-rate securities owned by six funds. These funds included the 1) Coal Severance Tax Permanent Trust, 2) Resource Indemnity Trust, 3) Coal Tax Park Trust, 4) Trust and Legacy, 5) Coal Tax Cultural Trust and 6) Treasure State Endowment Trust funds. Since the pool's creation in 1995, the funds listed below became participants in the TFBP:

University of Montana Endowment Fund	January 1996
Montana Pole Superfund	September 1996
Upper Clark Fork River Basin (UCFRB) Restoration	July 1999
Upper Clark Fork River Basin (UCFRB) Cost Recovery	July 1999
Streamside Tailings Operable Unit	July 1999
Treasure State Regional Water Systems	July 2000
Tobacco Trust Fund	January 2001
University of Montana Designated Fund	July 2002
University of Montana Other Fund*	July 2002
Montana Tech of the U of M	March 2003
Real Property Trust	September 2003
Wildlife Habitat	September 2003
Acquisition Trust	April 2004
Bair Trust Fund	April 2004
Bradley Trust	April 2004
Merritt Wheeler Trust	April 2004
Sobotka Memorial Trust	April 2004
Teakle Trust	April 2004

\*In October 2003, the University of Montana Other Fund withdrew from the TFBP.  
In July 2004, Montana State University requested funds to be invested in the TFBP.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

TFBP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The TFBP portfolio includes corporate asset-backed, other corporate, U.S. government mortgage-backed, government, Yankee securities and cash investments. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. U.S. government mortgage-backed securities reflect participation in a pool of residential mortgages. Government securities include direct and indirect obligations of the U.S. Treasury and state and local government bonds. Yankee bonds are U.S. dollar denominated securities issued by foreign corporations and governments and U.S. companies issuing debt in foreign markets.

The TFBP portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 4 on Investment Risk Categories and Note 7 for the Year End Portfolio.)

TFBP fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The TFBP did not hold any variable rate securities as of June 30, 2004 and June 30, 2003.

Investments are presented in the Statement of Net Asset Value at fair value. Fair values for securities are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

The TFBP, as an internal investment pool, invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

#### Participant Units

The Coal Severance Tax Permanent Trust, Resource Indemnity Trust, Coal Tax Park Trust, Trust and Legacy, Coal Tax Cultural Trust, and Treasure State Endowment Trust funds transferred all fixed income and variable-rate securities, at amortized cost, into the TFBP at the start-up date and were issued units according to the fair value of each participant's portfolio. The initial unit value as of October 1, 1995, was \$100.00. Unit values are calculated weekly and at month end, based on portfolio pricing, to allow for participant transactions to occur as determined by the investment staff.

The June 30, 2004 unit value of \$100.03 decreased from a June 30, 2003 unit value of \$105.56. The yield on bonds increased during the fiscal year, which has the effect of decreasing bond prices and the pool unit value. A one percent (1%) change in interest rates is expected to have a five to seven percent (5%-7%) inverse change in the unit value. TFBP investments are considered long-term in nature and participants require long-term time horizons.

#### Broker Receivable/Payable

TFBP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the TFBP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

#### Other

Accumulated income, recorded as Income Due Participants, is distributed monthly on the first calendar day of each month. Realized portfolio gains/losses are distributed at least annually to the participants.

Interest income reported in the Statement of Investment Income and Distribution includes interest accruals and miscellaneous income. For fiscal year 2004, the decrease in interest income of \$5.1 million is attributed, primarily, to lower interest rates. Net realized gains increased by \$10.9 million in fiscal year 2004 due to market conditions.

Administrative expenses incurred by the Board are charged daily to TFBP based on the Board's expenses applicable to TFBP. These expenses include costs for the custodial bank contract.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street loaned, on behalf of the Board, certain securities held by State Street, as custodian, and received U.S. dollar currency cash, U.S. government securities, and irrevocable bank letters of credit as collateral. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine.

As of June 30, 2004, the carrying and fair value of the underlying securities on loan for the Trust Funds Bond Pool was \$164,208,920 and \$172,167,230, respectively. The collateral provided for the securities on loan totaled \$177,281,934 representing \$174,252,479 in cash and \$3,029,455 in securities collateral.

As of June 30, 2003, the carrying and fair value of the underlying securities on loan for the Trust Funds Bond Pool was \$57,555,310 and \$70,451,001, respectively. The cash collateral provided for the securities on loan totaled \$76,755,887.

#### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2004 and June 30, 2003. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2004

\*At June 30, 2003, these underlying securities, with a fair value of \$70,451,001, were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the U.S. government securities, the above instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires TFBP investments, at the time of purchase, to be rated investment grade as defined by Moody's or Standard & Poor's (S&P) rating services. The U.S. government securities are guaranteed directly or indirectly by the U.S. government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the U.S. government mortgage-backed category, the TFBP portfolio holds REMICs totaling \$429,878 and \$706,427, respectively, at amortized cost, as of June 30, 2004 and June 30, 2003. These securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages.

Corporate asset-backed securities represent debt securities collateralized by a pool of assets. The TFBP corporate asset-backed security is secured by lease payments and real estate. Credit risk for corporate asset backed securities is generally less than other corporate securities because assets are held by a third party.

As of June 30, 2004 and June 30, 2003, Burlington Industries, Inc. presented a legal and higher credit risk to the Board.

The Board owns a Burlington Industries, Inc., \$4 million par, 7.25% bond maturing September 15, 2005. In September 2000, the company announced a reduction of stockholders equity. Due to an increasing senior bank line and declining credit trend, the bond ratings for this issue were downgraded, in May 2001, by the Moody's and Standard & Poor's rating agencies. During fiscal year 2001, the book value of Burlington Industries Inc. was reduced from the August 31, 2000 book value of \$3,739,760 to \$1,600,000. Due to the company's filing for Chapter 11 bankruptcy protection on November 11, 2001, the book value was reduced to \$800,000. In October 2003, Burlington Industries, Inc. received court approval to sell its assets. Under the company's recovery plan, the Board received \$969,974 in August 2004 for its unsecured claim. This transaction reduced the book value to \$0 and generated a gain of \$169,974. The Board is expected to receive additional proceeds for its claim.

As of June 30, 2003, Enron Corp. presented a legal and higher credit risk to the Board.

The TFBP held a \$2 million par, 6.75% Enron bond maturing August 1, 2009, a \$3 million par 6.40% Enron bond maturing July 15, 2006 and a \$3 million par 6.95% Enron bond maturing July 15, 2028. The combined book value of these securities was \$7,560,870 as of November 30, 2001. On December 12, 2001, the Enron Corp. filed for Chapter 11 bankruptcy protection. Accordingly, the November 2001 book value for the three issues was reduced to \$3.2 million as of June 30, 2002.

In October 2002, the book value was reduced to \$1.6 million for the three issues. In July 2003, the three issues were sold, on the market, for a total of \$1.35 million.

## 5. PARTICIPANT LOAN

In accordance with Senate Bill 495 enacted by the 2001 Legislature, the Coal Severance Tax Permanent Trust loaned 483,604 TFBP shares, with a book value of \$46,366,904, to the Trust and Legacy fund on July 2, 2001. The loan proceeds were deposited in the Trust and Legacy Fund. A loan receivable was recorded in the Coal Severance Tax Permanent Trust and a corresponding liability was recorded in the Guarantee Fund, a General Fund sub-fund. The August 2002 Special Legislative Session approved the request to record this activity in a state special revenue fund of the Office of Public Instruction rather than in the Guarantee Fund. On June 30, 2004, the Trust and Legacy Fund paid \$1,820,816 to the Coal Severance Tax Permanent Trust reducing the TFBP shares on loan to 464,613 with a corresponding book value of \$44,546,088.

## 6. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$8 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$861,811 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$9,092,920 in principal and interest plus \$240,000 as a consent fee. As of November 15, this matter is still pending.

## 7. YEAR END PORTFOLIO

The June 30, 2004 TFBP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Coupon</u>	<u>Maturity</u>	<u>Par</u>	<u>Book Value</u>	<u>Fair Value</u>	<u>% of Total</u>

## LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Short Term Investment Pool, as of June 30, 2004, and 2003, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Short Term Investment Pool, as of June 30, 2004, and 2003, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

November 15, 2004

STATE OF MONTANA BOARD OF INVESTMENTS  
SHORT TERM INVESTMENT POOL - NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2004 AND 2003

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Short Term Investment Pool (STIP) was created by the Board to allow qualifying funds, per sections 17-6-201, 202 and 204, MCA, to participate in a diversified pool. Although state agencies are legally required to invest in STIP, local governments may voluntarily participate in STIP.

The purpose of STIP is to obtain the highest possible return, yet maintain a highly liquid position whereby funds may be invested for relatively short periods, one day or more, depending upon the participant's anticipated use of the funds. The investments and the income from STIP are owned by the participants, as they purchase units, and are managed on their behalf by the Board.

Although STIP is not registered with the Securities and Exchange Commission (SEC) as an investment company, the Board has as policy that STIP will, and does, operate in a manner consistent with the SEC's rule 2a7 of the Investment Company Act of 1940. In meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

STIP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The STIP portfolio may include asset-backed securities, commercial paper, corporate and government securities, repurchase agreements, and variable-rate (floating-rate) instruments. These securities are purchased to provide shareholders with a diversified portfolio earning a competitive total rate of return.

Asset-backed securities represent debt securities collateralized by a pool of mortgage and non-mortgage assets such as trade and loan receivables, equipment leases, credit cards, etc. Commercial paper is unsecured short-term debt with maturities ranging from 1 to 270 days. Commercial paper issued at a discount, direct or by brokers, is backed by bank credit lines. Repurchase agreements (REPOs) represent an agreement between a seller and a buyer, usually of US government securities, whereby the seller agrees to repurchase the securities at an agreed upon price and stated time. Variable-rate (floating-rate) securities pay a variable rate of interest until maturity. The STIP portfolio's variable-rate securities float with LIBOR (London Interbank Offered Rate).

Investments held are reported at fair value, annually, based on market prices supplied to the Board by the Board's custodial bank. The difference between amortized cost and fair value is reflected as an unrealized gain or loss in the investments managed. The STIP investment portfolio consists of securities with a maximum maturity of 397 days or less with the exception of securities having rate reset dates. The portfolio is carried at amortized cost or book value.

**Participant Units**

The STIP unit value is fixed at \$1 for both participant buys and sells. A purchased unit earns income on the purchase date and ceases to earn income on the day before the unit is sold. Participants may buy or sell fractional shares. For fiscal years 2004 and 2003, income was distributed on the first calendar day of each month, with the exception of the June distribution. Income for June 2004 and June 2003 was distributed on the last calendar day of the month. Participants may automatically reinvest their income in additional units.

During fiscal years 2004 and 2003, the Board did not provide or obtain any legally binding guarantees to support the value of the participant units.

**Broker Receivable/Payable**

STIP security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the STIP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

## Other

Administrative expenses incurred by the Board are charged daily to STIP based on the Board's expenses applicable to STIP.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street loaned, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine. On June 30, 2004 and June 30, 2003, the Board had no credit risk exposure to borrowers.

As of June 30, 2004 and June 30, 2003, there were no securities on loan.

### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized below and on the following page to give an indication of the level of risk assumed at June 30, 2004 and June 30, 2003. Category 1 includes investments that are insured or registered or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2004

<u>Security Investment Type</u>	<u>C a t e g o r y 1</u>				
	<u>Securities Not On Loan</u>	<u>On Loan for Securities Collateral</u>	<u>Not Categorized</u>	<u>Carrying Amount</u>	<u>Fair Value</u>

Securities Lending Collateral Investment Pool		\$ 0	\$ 0	\$ 0	0

STIP investments' credit risk is measured by investment grade ratings given individual securities. Board of Investment's policy requires that STIP investments have the highest rating in the short term category by at least one Nationally Recognized Statistical Rating Organizations (NRSRO). The six NRSRO's include Standard and Poors, Moody's, Duff and Phelps, Fitch, IBCA and Thompson's Bank Watch.

Asset-backed securities have less credit risk than do securities not backed by pledged assets, while market risk for asset-backed securities is the same as market risk for similar non asset-backed securities.

While variable-rate securities have credit risk identical to similar fixed-rate securities, their interest rate (income) is more sensitive to interest rate changes. However, their market risk (value/price) may be less volatile than fixed-rate securities because their value will usually remain at or near par as a result of their interest rates being periodically reset to maintain a current market yield.

The Board is not aware of any legal risks regarding any STIP investments.

## 5. YEAR END PORTFOLIO

The June 30, 2004 STIP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

## LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana Domestic Equity Pool, as of June 30, 2004, and 2003, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana Domestic Equity Pool, as of June 30, 2004, and 2003, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

STATE OF MONTANA BOARD OF INVESTMENTS  
MONTANA DOMESTIC EQUITY - NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2004 AND 2003

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Common Stock Pool (MTCP) was created by the Board to allow retirement and endowment funds, per section 17-6-201, MCA, the opportunity to participate in the equity market via a diversified pool. MTCP was created as of July 1, 1980, by the transfer of all common stock owned by the Public Employees' Retirement System, Teachers' Retirement System, and other funds into MTCP.

In March 1996, the Board approved the Investment Policy Statement to reflect the name change from the Montana Common Stock Pool to the Montana Stock Pool. The Montana Stock Pool is referred to as "Montcomp" or MTCP. This policy statement provided for the investment in common or preferred stock. The Investment Policy Statement has been subsequently revised and approved to allow investment in the following security types:

September 1996	Securities convertible into common or preferred stocks
June 2000	Equity derivatives
January 2004	American Depositary Receipts (ADR's)

The Board authorized creation of the Montana Domestic Equity Pool (MDEP) in April 2003. This pool combines the domestic equity investments of the Montana Stock Pool (MTCP), Barclays Global Investors (BGI) and Dimensional Fund Advisors (DFA). Effective May 1, 2003, the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all the BGI S&P 500 Equity Index Fund A and the DFA Small Cap Subtrust investments totaling \$740 million, at cost, from the All Other Funds portfolio to the new pool. The pension and endowment funds also exchanged their investment in the Montana Stock Pool (MTCP) for units in the new Montana Domestic Equity Pool (MDEP).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

MDEP investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The MDEP portfolio may include common stock, equity index, preferred stock, convertible equity securities, American Depositary Receipts (ADR's) and equity derivatives. Common stock represents ownership units (shares) of a public corporation. Common stock owners are entitled to vote on director selection and other important matters as well as receive dividends on their holdings. Equity index investments are investments in selected mutual funds whose equity portfolios match a broad based index or composite. Preferred stock, as a class of stock, pays dividends at a specified rate and has preference in the payment of dividends and liquidation of assets. Preferred stock holders, ordinarily, do not have voting rights. Convertible securities are securities carrying the right to exchange, or "convert" the instrument for other securities of the issuer or of another issuer. This definition most often applies to preferred stocks or corporate bonds carrying the right to exchange for a fixed number of shares of the issuer's common stock. ADR's are receipts issued by a US depository bank representing shares of a foreign stock or bonds held abroad by the foreign sub-custodian of the American depository bank. Equity derivatives "derive" their value from other equity instruments such as futures and options.

In June 2000, the Board approved the securitization of MTCP cash by investing in an equity derivative, the State Street Stock Performance Index Futures Fund (SPIFF). Portfolio cash is swept daily into SPIFF maintaining 100% equity exposure through holdings of stock index futures.

The MDEP, as an internal investment pool, invested its excess cash, on creation, in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values. In July 2003, the STIP account was closed and a SPIFF account was opened to securitize MDEP cash by investing in an equity derivative.

In January 2003, the Board approved a staff recommendation to hire Dimensional Fund Advisors (DFA), as an external manager, to invest in domestic small market capitalization (small cap) companies. Market capitalization refers to the value of a corporation as determined by the market price of its issued and outstanding common stock. DFA's Small Cap Subtrust targets those companies whose market capitalization comprises the smallest 8 percent of the total market universe. The total market universe is defined as the aggregate capitalization of the NYSE, AMEX and NASDAQ firms.

Investments are presented in the statement of Net Asset Value at fair value. Equity investments, on valuation date, are stated at the closing price of the security's primary exchange. Carrying value, parenthetically disclosed, represents the equity security purchase price plus a fixed commission where applicable.

### Participant Units

The Public Employees' Retirement System and the Teachers' Retirement System transferred all stock owned into MTCP at the start-up date and were issued units according to the fair value of their contribution, retaining their original total cost basis. The initial unit value as of July 1, 1980, was \$1,000. Unit values thereafter and until March 31, 2000 were calculated weekly and at the close of the last business day of the month, based on the fair value of MTCP equity holdings and other assets. Effective April 1, 2000, the unit values are calculated daily. Daily unit value calculations were discontinued as of January 1, 2003. Since January 2003, MTCP unit values are calculated weekly and at the close of the last business day of the month. Depending on stock market conditions and the investment officer's decision, MDEP participants may then buy or sell units on the first calendar day of each month based on the month end values.

On July 1, 1994, the initial unit value changed from \$1,000 to \$100. This change was required for the Board's new accounting system. On August 17, 2000, shareholders, on record, received one MTCP share for each MTCP share held as the result of a 2:1 split. The unit value on August 31, 2000, prior to the split, was \$1,014 while the unit value, after the split, was \$507.

On May 1, 2003, the pension funds transferred all the Barclays Global Investors (BGI) S&P 500 Equity Index Fund A and the Dimensional Fund Advisors (DFA) Small Cap Subtrust investments, at cost, to the MDEP. On the same date, the pension and endowment funds transferred their MTCP investments, at cost, to the MDEP. The pension and endowment funds were issued units according to the fair value of each participant's portfolio. The initial MDEP unit value on May 1, 2003 was \$100. On conversion date, MTCP participants exchanged approximately 5.8 million MTCP units, valued at \$302 per unit, for 24.1 million MDEP units, issued at \$100 per unit.

As reported in the Statement of Changes in Net Asset Value, the value of MDEP units purchased by participants increased \$37 million in fiscal year 2004 while the value of MDEP units sold increased by \$86 million based on changes in the market. This change is based on fiscal year 2004 consisting of 12 months as compared to fiscal year 2003 consisting of two months. The value of MTCP units purchased in fiscal year 2004 decreased by \$14 million to \$0 due to the MDEP creation on May 1, 2003. The fiscal year 2004 and 2003 changes are the result of an asset allocation decision and do not reflect a change from the stated investment policy to increase retirement fund exposure to equity investments. MTCP participant purchases and sales from July 2002 to March 2003 were based on a MTCP per unit value ranging from \$259 per unit to \$308 per unit. In June 2003, the MDEP participants purchased units at \$105 per unit to fund \$25 million for the DFA US Small Cap Trust. In fiscal year 2004, MDEP participants bought and sold units at a price ranging from \$108 to \$125 per unit. The increase of \$407 million in the Change in Fair Value of Investments Managed reflects the equity market appreciation since fiscal year 2003.

### Broker Receivable/Payable

MDEP security transactions are recorded as of trade date rather than settlement date. Because of this generally accepted practice, the MDEP portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

### Other

Investment income reported in the Statement of Investment Income and Distribution includes dividend accruals, tax reclaim accruals, SPIFF gain/losses and miscellaneous income. MDEP dividends are recorded on the ex-dividend date.

The MDEP Income Available for Distribution is distributed as of the first calendar day of each month. Administrative expenses incurred by the Board are charged daily to MDEP based on the Board's expenses applicable to MDEP. For fiscal year 2004, these expenses include \$1,038,000 for the Board and the custodial bank contract and

\$619,067 in accruals for external manager fees. For fiscal year 2003, these expenses include \$966,446 for the Board and the custodial bank contract and \$17,700 in accruals for external manager fees for May and June 2003.

### 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street loaned, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit as collateral. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine.

As of June 30, 2004, the carrying and fair values of the underlying securities on loan for the Montana Domestic Equity Pool were \$18,798,876 and \$20,254,272 respectively. The collateral provided for the securities on loan totaled \$20,641,660 in cash.

As of June 30, 2003, the carrying and fair values of the underlying securities on loan for the Montana Domestic Equity Pool were \$19,578,118 and \$18,747,547 respectively. The collateral provided for the securities on loan totaled \$19,085,755 in cash.

### 4. INVESTMENT RISK CATEGORIES

State of Montana investments are categorized on the next page to give an indication of the level of risk assumed at June 30, 2004 and June 30, 2003. Category 1 includes investments that are insured or registered or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2004

5. OWENS-CORNING COMPLAINT

On October 11, 2002, the Board received a summons and complaint regarding the bankruptcy of Owens-Corning. The company seeks a determination that the dividend payments paid from October 1996 through July 2000 represent “fraudulent transfers under Chapter 11 Bankruptcy provisions and applicable state law, and are, therefore, voidable”. The complaint states the Montana Board of Investments was the “recipient of dividends in the amount of \$357,099 for the relevant period”. The Board has prepared a response to the complaint.

## 6. YEAREND PORTFOLIO

The June 30, 2004 MDEP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

<u>Security Name</u>	<u>Shares</u>	<u>Carrying Value</u>	<u>Fair Value</u>	<u>% of Total</u>

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana International Equity Pool, as of June 30, 2004, and 2003, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana International Equity Pool, as of June 30, 2004, and 2003, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

**STATE OF MONTANA BOARD OF INVESTMENTS  
MONTANA INTERNATIONAL EQUITY POOL**

**NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2004 and 2003**

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana International Equity Pool (MTIP) was created by the Board to allow qualifying funds, per section 17-6-201, MCA, the opportunity to participate in the international equity market via a diversified pool. MTIP, approved by the Board in June 1996, consists of one pool investing in one or more separate funds. On January 3, 1997, the MTIP was funded by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds. Currently, the MTIP has investments with four externally managed funds, Pyrford International, Schroder Investment Management NA, Nomura Asset Management U.S.A. Inc. and Barclays Global Investors.

In fiscal year 2003, the Board funded external managers, Pyrford International, \$27 million, and Schroder Investment Management NA, \$9 million, for a total active investment funding of \$36 million. In May 2003, the Board funded the Barclays Global Investors (BGI) MSCI Europe Index Fund with an initial \$15 million investment.

On July 1, 2003, the Board funded MTIP with a \$35 million purchase in the State Street Stock Performance Index Futures Fund (SPIFF). SPIFF shares were subsequently sold to fund \$25 million to the BGI MSCI Europe Index Fund on July 3, 2003.

In August 2003, the Board invested in the BGI All Country Pacific Index Strategy Fund with an initial funding of \$15 million.

On October 30, 2003, the Board voted to retain Schroder Investment Management NA, hire Nomura Asset Management U.S.A, Inc. and terminate SG Yamaichi Asset Management, Co. as active managers for the Board's Pacific Basin equity mandate. Schroder Investment Management NA was originally selected by the Board in October 1996.

SG Yamaichi Asset Management, Co. ceased equity trading in the Pacific Basin on October 31, 2003. The MTIP investment in SG Yamaichi Asset Management, Co. of \$105 million was transferred to Nomura Asset Management U.S.A, Inc. Upon transition, Nomura Asset Management U.S.A, Inc. began equity trading in the Pacific Basin on December 1, 2003.

The internally managed fund, BOI Internal International, was closed in January 2004. The BOI Internal International assets were sold and restructured by Barclays Global Investors for an investment of \$190.4 million in the BGI MSCI Europe Index Fund. The sale and restructure of the BOI Internal International fund generated a gain of \$25.7 million.

In fiscal year 2004, the Board funded \$15 million to BOI Internal International, \$170 million to the Barclays Global Investors (BGI) MSCI Europe Index Fund, \$40 million to the BGI All Country Pacific Index Strategy Fund and \$28 million to the State Street SPIFF account.

Schroder Investment Management NA, Nomura Asset Management U.S.A, Inc. from December 2003, SG Yamaichi Asset Management Co. through October 2003, and the BGI All Country Pacific Index Strategy Fund are authorized to invest in 12 Pacific Basin countries. These countries are listed as follows:

## Pacific Basin Countries

Australia	Indonesia	Malaysia	Singapore
China	Japan	New Zealand	Taiwan
Hong Kong	Korea	Philippines	Thailand

As approved by the Board, the BOI Internal International fund, Pyrford International and the BGI MSCI Europe Index Fund may invest in 16 European countries. These countries are listed as follows:

## European Countries

Austria	France	Italy	Spain
Belgium	Germany	Netherlands	Sweden
Denmark	Greece	Norway	Switzerland
Finland	Ireland	Portugal	United Kingdom

In March 2003, the Board voted to liquidate all BOI Internal International holdings in France. On October 30, 2003, the Board voted to add France to the list of approved countries for the BOI Internal International portfolio.

In December 2003, the Board voted to retain Pyrford International, as an external investment manager for Europe. Pyrford International was originally selected by the Board in August 1998.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Investments

MTIP investments are purchased in accordance with the statutorily mandated “Prudent Expert Principle”. The MTIP portfolio includes equity investments in six funds - BOI Internal International through January 2004, Pyrford International, Schroder Investment Management NA, Nomura Asset Management U.S.A, Inc. from December 2003, SG Yamaichi Asset Management Co. through October 2003, the BGI MSCI Europe Index Fund and the BGI All Country Pacific Index Strategy Fund. The six funds may invest in securities of foreign-based corporations listed on legal and recognized foreign exchanges as well as domestic exchanges. Security types may include ordinary common shares, preferred shares, convertible securities, American Depositary Receipts (ADR’s), Global Depositary Receipts (GDR’s), and other global securities, as appropriate.

Common stock represents ownership units (shares) of a public corporation. Common stock owners are entitled to vote on director selection and other important matters as well as receive dividends on their holdings. Preferred stock pays a stipulated dividend and has a claim prior to that of common stock upon the earnings of a corporation. Convertible securities are securities carrying the right to exchange, or “convert” the instrument for other securities of the issuer or of another issuer. ADR’s are receipts issued by a US depository bank representing shares of a foreign stock or bonds held abroad by the foreign sub-custodian of the American depository bank. GDR’s are receipts issued by non-US bank depositories, which represent shares of a foreign stock or bonds.

### Broker Receivable/Payable

MTIP security transactions are recorded as of the trade date rather than settlement date. Because of this generally accepted practice, the MTIP portfolio at June 30 may include receivables from brokers for securities sold, but not delivered, and payables to brokers for securities purchased, but not received.

### Valuation and Foreign Currency

Investments are presented in the statement of Net Asset Value at current US dollar value. The MTIP’s fair value is derived from the Net Asset Value per Share, as separately calculated, for four funds - BOI Internal International through January 2004, Pyrford International, Schroder Investment Management NA, Nomura

Asset Management U.S.A, Inc. from December 2003, and SG Yamaichi Asset Management Co. through October 2003. Each fund's Net Asset Value per Share represents the per unit ownership of the fund's Net Assets. The Net Assets are the excess of the valued securities, cash, receivables and other assets over the fund's liabilities. Each fund's Net Assets are reported at current US dollar value after conversion, by the custodial bank, State Street Bank and Trust, from the foreign currency amounts. The MTIP's fair value also includes the per share fair value of the BGI MSCI Europe Index Fund, the BGI All Country Pacific Index Strategy Fund and the State Street Bank SPIFF account.

State Street Bank, as custodian, is responsible for reporting the foreign currency transactions in both the local and base or functional (US dollar) currency. The four funds' cash, receivables, fair value of investment securities, other assets and liabilities are translated into US dollars at the Interactive Data Control (IDC) 11:00 a.m. Eastern Standard Time (EST) exchange rate as of the balance sheet date. Purchases and sales of investment securities, income and expenses are converted into US dollars using the Reuters noon EST exchange rate on the transaction date.

Currency exposures may be hedged, partially or fully, at the discretion of the manager to preserve the US dollar value of investments made. Currency speculation, such as over-hedging, reverse hedging or other trading activity not specifically aimed at preserving the US dollar value of investments, is not authorized.

Fair values for the funds holding the publicly traded securities are determined by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank, their primary pricing service, IDC and Barclays Global Investors. Equity investments, traded on a national security exchange, are stated at the last reported sales price on valuation day, while equity securities traded in the over-the-counter market are stated at the last quoted bid price.

#### Participant Units

The Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds sold units in the Short Term Investment Pool at the start up date and were issued units in MTIP at an initial unit value of \$100. Unit values thereafter are calculated weekly and once a month at the close of the last business day of the month, based upon the fair value of the MTIP equity holdings, other assets and liabilities. Based on the investment officers' decision, participants may then buy or sell units on the first business day of each month. All participant buys or sells occur after distribution of accumulated income.

#### Investment Income and Distribution

Investment Income represents the monthly income distributions to the MTIP from the investment manager funds. The funds' income distributions include dividends accrued as of the ex-dividend date, interest, tax refunds and securities lending income, and related income currency gains/losses. Income currency gains/losses result from the difference between the amount of dividend, interest and foreign withholding taxes accrued for the fund in US dollars and the amount received or paid in equivalent US dollars.

Realized gains/losses from the sale of securities and related foreign exchange transactions are retained by each fund. Realized foreign exchange gains/losses arise from sales and maturities of portfolio securities, sales of foreign currencies, and currency gains/losses realized between the trade and settlement dates.

The fiscal year 2004 administrative expense of \$2,280,171 represents \$1,762,323 in quarterly fees accrued and paid to the external managers per their contracts and \$517,848 in monthly charges accrued and paid to the Board of Investments.

The fiscal year 2003 administrative expense of \$1,785,948 represents \$1,358,700 in quarterly fees accrued and paid to the external managers per their contracts, and \$427,248 in monthly charges accrued and paid to the Board of Investments.

As described above, the Board of Investments fee includes costs for the custodial bank contract. Administrative expenses incurred by the Board are charged daily to MTIP based on the Board's expenses applicable to MTIP.

The MTIP Income Available for Distribution is distributed at least monthly to the retirement fund participants, net of external manager fees and administrative expenses, on the first business day of the following month.

### **3. SECURITIES LENDING**

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 105 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street loaned, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar and foreign currency cash, US government securities, sovereign debt of foreign countries, and irrevocable bank letters of credit as collateral. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine.

As of June 30, 2004, the carrying and fair values of the underlying securities on loan for MTIP were \$33,107,687 and \$41,747,542, respectively. The collateral provided for the securities on loan totaled \$43,804,312 in cash collateral.

As of June 30, 2003, the carrying and fair values of the underlying securities on loan for MTIP were \$75,267,314 and \$74,813,847, respectively. The collateral provided for the securities on loan totaled \$78,496,331 in cash collateral.

### **4. INVESTMENT RISK CATEGORIES**

State of Montana investments are categorized below to give an indication of the level of risk assumed at June 30, 2004 and June 30, 2003. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral.

Risk as of June 30, 2004

## LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Asset Value for the state of Montana Board of Investments, Montana Private Equity Pool, as of June 30, 2004, and 2003, and the related Statement of Changes in Net Asset Value and Statement of Investment Income and Distribution for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net asset value of the state of Montana Board of Investments, Montana Private Equity Pool, as of June 30, 2004, and 2003, and its changes in net asset value and investment income and distribution for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

November 15, 2004

STATE OF MONTANA BOARD OF INVESTMENTS  
MONTANA PRIVATE EQUITY POOL

NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2004 AND 2003

1. HISTORY AND ORGANIZATION

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Private Equity Pool (MPEP) was established by the Board to allow retirement funds, per section 17-6-201, MCA, the opportunity to participate in the venture capital and leveraged buyout markets and other private equity investments via a diversified pool. The Board approved creation of the MPEP in April 2002. Effective May 1, 2002, the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds transferred all their venture capital and leveraged buyout investments, at cost, totaling \$159,799,310, and cash of \$15,000,000 to the new pool. These investments were previously recorded in the All Other Funds financial statements for fiscal year 2001.

Given the complexity and specialization of private equity investment, the Board contracts with seven private equity managers to invest in venture capital, leveraged buyout and other private equity investments. The retained private equity managers include Adams Street Partners, formerly Brinson Partners; Kohlberg, Kravis, Roberts and Company, (KKR); Welsh Carson Anderson and Stowe; Madison Dearborn Partners; Lexington Partners; Oaktree Capital Management and ArcLight Energy Partners. According to Board policy, the external managers may not invest more than 30% of total private equity invested capital in non-US company partnerships unless the fund is a designated non-US fund. Total non-US exposure in MPEP is limited to 25% of total invested capital.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

Montana Private Equity Pool investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle". The MPEP portfolio includes venture capital, leveraged buyout, mezzanine, distressed debt, special situation and secondary investments. Venture capital represents private equity investments in early stage financing of rapidly growing companies with an innovative product or service. Leveraged buyouts (LBO's) permit an investment group to acquire a company by leveraging debt, as a financing technique, to establish a significant ownership position on behalf of the company's current management team. Mezzanine investments are the subordinated debt and/or equity of privately owned companies. The debt holder participates in equity appreciation through conversion features, such as rights, warrants, and/or options. Distressed debt represents the private and public debt of companies that appear unlikely to meet their financial obligations. This debt is attractive to investors, not for repayment of interest and principal, which are unlikely to be paid, but for the claim placed on the firm's value by unpaid creditors. Without undue principal risk, distressed debt investment managers seek capital appreciation through the sale of restructured debt obligations or newly issued securities. Special situation investments include the investment in the exploration for oil and/or gas reserves or in the development of proven reserves, investment in land to harvest timber, and investments that have a special component usually related to geographical, economic, or social issues. Secondary investments are investments in previously owned limited partnerships. These investments may be direct or via a general partner specializing in secondary investments. Private equity investments are long-term, by design, and extremely illiquid.

In creating the pool, the Board chose to securitize MPEP cash by investing in an equity derivative, the State Street Stock Performance Index Futures Fund (SPIFF). Portfolio cash is swept daily into SPIFF maintaining 100% equity exposure through holdings of stock index futures.

Investments are presented in the Statement of Net Asset Value at fair value. Because no recognized market exists for private equity investment, the MPEP investments, on valuation date, are stated at the fair value reported in the most recent external managers' valuation reports. Carrying value, parenthetically disclosed, represents the private equity security purchase price.

### Broker Receivable/Payable

MPEP security transactions are recorded as of trade date rather than settlement date. Because of this generally accepted practice, the MPEP portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

### Participant Units

The pension funds transferred all their venture capital and leveraged buyout investments, at cost, into the MPEP at the start-up date and were issued units according to the fair value of each participant's portfolio and cash contribution. The initial unit value as of May 1, 2002 was \$100. Although unit values are calculated at month end, the pool portfolio will be priced at least quarterly at the fair value reported in the external managers' valuation reports. Given the quarterly portfolio valuations, pool participant transactions will most likely occur on a quarterly basis. Based on the Investment Officer's decision, participants may buy, reinvest or sell units on the first business day of each month. All participant buys, reinvestments or sells occur after distribution of accumulated income.

### Investment Income and Distribution

The Statement of Investment Income and Distribution reports cash dividends, interest, net realized gains and losses, and miscellaneous income. The fiscal year 2004 net realized gains of \$76.6 million, as compared to fiscal year 2003 net realized gains of \$4.3 million, were generated from external investment manager decisions. These net realized gains were distributed to the MPEP participants. MPEP dividends are recorded on the ex-dividend date.

The MPEP Income Available for Distribution is distributed or reinvested, on behalf of the nine retirement fund participants, at least quarterly or as determined by the Investment Officer. Any cash distributions or reinvestments will occur on the first business day of the following month. The Income Available for Distribution is net of MPEP external manager fees and administrative expenses.

The fiscal year 2004 administrative expense of \$2,681,882 represents fees paid to the external managers of \$2,485,166 per their contracts and \$196,716 paid to the Board of Investments. The Board of Investments fee includes costs for the custodial bank contract. Administrative expenses incurred by the Board are charged daily to MPEP based on the Board's expenses applicable to MPEP.

The fiscal year 2003 administrative expense of \$3,056,068 represents fees paid to the external managers of \$2,816,202 per their contracts and \$239,866 paid to the Board of Investments. The Board of Investments fee includes costs for the custodial bank contract. Administrative expenses incurred by the Board are charged daily to MPEP based on the Board's expenses applicable to MPEP.

### Security Lending

Because there is no active security lending market for this asset class, MPEP does not participate in security lending.

## 3. COMMITMENTS

Private equity investments, typically, represent a seven to ten year commitment characterized by capital calls occurring during the first five years with distributions to the investor over the remaining term of the investment. The original and remaining commitments and their respective carrying and fair values, as of June 30, 2004, are listed on the next page.

Commitments as of June 30, 2004

<u>Security Investment</u>	<u>Original Commitment Date</u>	<u>Original Commitment</u>	<u>Commitment Remaining</u>	<u>Carrying Value</u>	<u>Fair Value</u>
Separate Account Partnerships	Jan 1988/Apr 1990	\$ 14,000,000	\$ 438,015	\$ 2,453,700	\$ 1,061,060

#### 4. INVESTMENT RISK

Private equity investments are recognized as investments with a higher degree of risk with a higher return potential than traditional equity investments. Portfolio diversification of risk is to be achieved through multiple partnership relationships and investments diversified by time, financing stage, industry sector, investment size and geographical region. Private equity investments typically have a low correlation relative to other investment asset classes and should contribute to the reduction of portfolio risk and the enhancement of expected returns on a total investment portfolio basis.

#### 5. NOTICE OF LIABILITY

The Montana Board of Investments is a limited partner in the private equity partnership of O'Donnell & Masur L.P. O'Donnell & Masur L.P. invested in Gardiner Communications, Inc. All partners of O'Donnell & Masur L.P. received a Notice of Liability from the Internal Revenue Service claiming unpaid federal corporate taxes for Gardiner Communications, Inc. As a recipient of the distributions on the sale and dissolution of Gardiner Communications, Inc., the Board faces potential liability. O'Donnell & Masur L.P. has retained legal counsel to represent all partners receiving a Notice of Liability. On September 5, 2003, legal counsel filed a petition on the Montana Board of Investment's behalf in U.S. Tax Court to perfect the Board's right to contest this matter. On February 9, 2004, all partners of O'Donnell & Masur L.P. were informed that the Internal Revenue Service Appeals Officer had completed his review of the Gardiner Communications, Inc. matter. The Officer concluded "no additional taxes are due from Gardiner Communications, Inc. and thus, no transferee liability to the partners of O'Donnell & Masur, L.P."

## 6. YEAR END PORTFOLIO

The June 30, 2004 MPEP portfolio is listed below. The security type percentage is based on the fair value ratio of the specific security investment type to the total portfolio.

## LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Investments Managed for the state of Montana Board of Investments, All Other Funds, as of June 30, 2004, and 2003, and the related Statement of Net Investment Income and Statement of Changes in Net Investments Managed for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net investments managed by the Montana Board of Investments, All Other Funds, as of June 30, 2004, and 2003, and its net investment income and changes in its net investments managed for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

November 15, 2004

The accompanying notes are an integral part of these financial statements.

STATE OF MONTANA BOARD OF INVESTMENTS  
ALL OTHER FUNDS  
NOTES TO FINANCIAL STATEMENTS  
JUNE 30, 2004 AND 2003

**1. HISTORY AND ORGANIZATION**

The Board was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis per section 17-6-201, MCA. The All Other Funds (AOF) investments and income are owned by various State of Montana agencies and managed on their behalf by the Board.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Investments**

The AOF investments are purchased in accordance with the statutorily mandated "Prudent Expert Principle" and applicable investment restrictions of the participants. The AOF portfolio includes securities classified as corporate asset-backed, other corporate, US government mortgage-backed, US government, Yankee bonds, equity index, real estate, mortgages and loans. Corporate asset-backed securities represent debt securities collateralized by a pool of assets. US government mortgage-backed securities reflect participation in a pool of residential mortgages. US government securities include direct obligations of the US Treasury and indirect obligations of the US government. Yankee bonds are US dollar denominated bonds issued by foreign corporations and governments and US companies issuing debt in foreign markets. Equity index investments are investments in selected mutual funds whose equity portfolios match a broad based index or composite.

The AOF portfolio includes structured financial instruments known as REMICs (Real Estate Mortgage Investment Conduits). REMICs are pass-through vehicles for multiclass mortgage-backed securities. Strip investments represent the separate purchase of the principal and interest cash flows of a mortgage security. These securities, purchased for portfolio diversification and a competitive rate of return, are identified and reported as government mortgage-backed securities in the investment risk and portfolio disclosures. (See Note 6 on Investment Risk Categories and Note 10 for the Year End Portfolio.)

AOF fixed income securities pay a fixed rate of interest until maturity while the variable-rate (floating-rate) securities pay a variable interest rate until maturity. The AOF variable-rate securities float with LIBOR (London Interbank Offered Rate) or the weighted average of the net mortgage interest rates for the mortgage loan group. The one variable-rate security, with an amortized cost of \$15,585,949 and \$17,889,456 as of June 30, 2004 and 2003, respectively, is identified and reported as a government mortgage-backed security in the investment risk and portfolio disclosures. (See Note 6 on Investment Risk Categories and Note 10 for the Year End Portfolio.)

Effective May 1, 2003, all the Barclays Global Investors (BGI) S&P 500 Equity Index Fund A and the Dimensional Fund Advisors (DFA) US Small Cap Trust investments totaling \$740 million, at cost, were transferred from the All Other Funds portfolio to the new Montana Domestic Equity Pool (MDEP). These investments were held by the Public Employees', Municipal Police Officers', Game Wardens', Sheriffs', Judges', Highway Patrol Officers', Teachers', Volunteer Firefighters' and Firefighters' Unified retirement funds.

Investments are presented in the Statement of Net Investments Managed at fair value. Fair values for publicly traded securities are determined primarily by reference to market prices supplied to the Board by the Board's custodial bank, State Street Bank and Trust. The real estate investments and residential and multi-family mortgages are valued based on a discounted cash flow. The commercial in-state coal tax loans and the nonparticipating repurchase agreements are reported at amortized cost. Amortized cost, parenthetically disclosed, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life or maturity date of the securities. Amortized cost may also be referred to as book value.

**Broker Receivable/Payable**

All Other Funds security transactions are recorded as of the trade date rather than the settlement date. Because of this generally accepted practice, the AOF portfolio at June 30 may include receivables from brokers for securities sold but not delivered, and payables to brokers for securities purchased but not received.

### Montana Mortgages and Loans Receivable

The Montana mortgages and loans receivable, included in the Net Investments Managed at Fair Value, represent residential mortgages and multifamily commercial loans funded by the Public Employees' and Teachers' pension funds and other loans funded by the Coal Severance Tax Trust fund. The Coal Severance Tax Trust loan portfolio includes loans made by the Montana Science and Technology Alliance (MSTA) Board. The MSTA Board was abolished on July 1, 1999 and by law, the MSTA portfolio was assigned to the Board of Investments (BOI). (See Note 7 for the Montana mortgages and loans portfolio.)

As of June 30, 2004 and 2003, there were no uncollectible account balances for Montana mortgages and loans receivable.

### Investment Income

Investment income reported in the Statement of Net Investment Income includes fixed income and mortgage interest earnings, real estate income, commercial loan interest earnings and commitment fees. For fiscal year 2004, the decrease in interest income of \$11.9 million is attributed, primarily, to a decrease in the commercial loan and mortgage interest earnings.

### Realized Gain on Sales

Realized gain on sales reported in the Statement of Net Investment Income represents the net gain/loss resulting from the sale of fixed income, private equity and pool investments. The sale of pool units in fiscal year 2004 from the Montana Domestic Equity Pool (MDEP), Montana Private Equity Pool (MPEP), Retirement Funds Bond Pool (RFBP) and Trust Funds Bond Pool (TFBP) resulted in a net gain to participants of \$73,214,644. In fiscal year 2003, the sale of pool units from the Montana Private Equity Pool (MPEP), Trust Funds Bond Pool (TFBP), Retirement Funds Bond Pool (RFBP) and the Montana Stock Pool (MTCP) generated a net gain to participants of \$41,475,231.

## 3. SECURITIES LENDING

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street Bank loaned, on behalf of the Board, certain securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit as collateral. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street Bank made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street Bank.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine.

As of June 30, 2004, the carrying and fair value of the underlying securities on loan for the All Other Funds was \$219,045,397 and \$222,235,651, respectively. The collateral provided for the securities on loan totaled \$228,078,235 representing \$226,699,848 in cash and \$ 1,378,387 in securities collateral.

As of June 30, 2003, the carrying and fair value of the underlying securities on loan for the All Other Funds was \$49,363,730 and \$55,128,809, respectively. The collateral provided for the securities on loan totaled \$56,643,400 in cash collateral.

#### 4. COAL TAX LOAN AND MORTGAGE COMMITMENTS

The Board makes firm commitments to fund loans from the Coal Severance Tax Trust fund. These commitments have expiration dates and may be extended according to the Board's policies. As of June 30, 2004, the Board had committed but not yet purchased \$69,281,764 in loans from Montana lenders, compared to \$57,672,181 as of June 30, 2003. In addition to the above commitments, lenders had reserved \$12,021,150 for loans as of June 30, 2004, compared to \$41,421,046 on the same date in 2003.

The Board makes firm commitments to fund mortgages from the Public Employees' and Teachers' retirement funds. As of June 30, 2004 and 2003, the Board had committed but not yet purchased from Montana lenders mortgages totaling \$124,550 and \$392,275, respectively. Lenders had reserved no funding for mortgages as of June 30, 2004 and as of June 30, 2003.

#### 5. PENSION FUND REAL ESTATE INVESTMENTS

##### 100 North Park Building

In January 1996, the Board, on behalf of the Public Employees' and Teachers' Retirement funds, purchased the 100 North Park Avenue Building in Helena, Montana as a real estate investment. Acquired for a cost of \$4,864,326, the building carries a fair value of \$5,795,000 as of June 30, 2004. During fiscal year 2004, building improvements for lighting, fire alarms, sprinkler systems, hallway remodeling and leasing fees totaling \$453,209 were added to the cost of the building. Building improvements and leasing fees totaling \$129,465 were added to the cost of the building in fiscal year 2003. The three-story building provides office space for approximately eight to ten tenants.

##### 2401 Colonial Drive Building

In August 1997, the Board authorized the construction of an office building, as a real estate investment owned equally by the Public Employees' and Teachers' Retirement funds. Construction costs, including interest capitalization, totaled \$6,481,741 as of June 30, 2000. In fiscal year 2004, office remodeling payments and leasing fees of \$54,517 were added to the building cost. For fiscal year 2003, \$155,800 was expended on building landscaping, leasing fees, lighting and construction. The three-story building, providing office space for three tenants, was occupied in November 1999. As of June 30, 2004, the building carries a cost and fair value of \$7,041,755 and \$7,581,000, respectively.

##### 2273 Boot Hill Court Building

In August 1999, the Board authorized the purchase of a new office building in Bozeman, Montana. Upon construction completion, the Public Employees' and Teachers' Retirement funds purchased the building, in March 2004, as a real estate investment with equal ownership, for \$2,051,032. The building, located on state school trust land, is occupied by four state agencies. As of June 30, 2004, the building carries a fair value of \$2,082,014.

##### 1712 Ninth Avenue Building

In November 2000, the Board reviewed the transfer of the Public Employees' Retirement Administration (PERA) office building, located at 1712 Ninth Avenue, Helena, to the Board of Investments. By issuance of a corrective deed, the Board of Investments was named owner and building manager for the use and benefit of the PERA. During fiscal years 2004 and 2003, parking lot improvements, architect fees, and remodeling construction totaling \$9,525 and \$160,480, respectively, were added to the building cost for a year end book value of \$498,712. As of June 30, 2004, the building is valued at \$576,369.

The schedule below details the minimum future rentals for the above buildings with non-cancelable operating leases as of June 30, 2004 and 2003:

##### Minimum future rentals for the year ending June 30, 2004:

<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010+</u>	<u>Total</u>
\$773,141	\$497,523	\$442,228	\$308,401	\$243,861	\$980,388	\$3,245,543

##### Minimum future rentals for the year ending June 30, 2003:

<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009+</u>	<u>Total</u>
\$241,763	\$181,792	\$164,149	\$155,328	\$129,439	\$0	\$872,471

**California Street Property**

In December 1998, the Board acquired a parcel of land adjacent to the Colonial Drive building to provide for additional parking. This land was purchased for \$204,835. As of June 30, 2004 the property carries a fair value of \$207,667.

**6. INVESTMENT RISK CATEGORIES**

State of Montana investments are categorized below and on the next page to give an indication of the level of risk assumed at June 30, 2004 and June 30, 2003. Category 1 includes investments that are insured or registered, or securities that are held by the Board or its agent in the Board's name. Not Categorized includes investments held by broker-dealers under securities loans with cash collateral. Long-term investments are carried at amortized cost and short-term investments are carried at original cost.

\*At June 30, 2003, these underlying securities, with a fair value of \$55,128,809 were loaned for cash collateral under a security lending agreement with the state's agent.

With the exception of the US government securities, the fixed income instruments have credit risk as measured by major credit rating services. Credit risk is defined as the risk that the issuer of a fixed income security may default in making timely principal and interest payments. The Board of Investment's policy requires AOF fixed income investments, at the time of purchase, to be rated an investment grade as defined by Moody's and Standard & Poor's (S&P) rating services. The US government securities are guaranteed directly or indirectly by the US government.

Market risk for the above securities is caused by changes in the price or principal value of the security due to changes in interest rates and market liquidity.

As reported in the U.S. government mortgage-backed category, the AOF portfolio holds a REMIC with an amortized cost of \$15,585,949 and \$17,889,456 as of June 30, 2004 and 2003. The REMIC securities are based on separate or combined cash flows from principal and interest payments on underlying mortgages. When underlying mortgages are prepaid, the interest cash flows are reduced while principal cash flows are increased. If homeowners pay on mortgages longer than anticipated, the cash flow effect would be the opposite.

Corporate asset-backed securities are based on cash flows from principal and interest payments on underlying auto loan receivables, credit card receivables, and other assets. These securities, while sensitive to prepayments due to interest rate changes, have less credit risk than securities not backed by pledged assets. Market risk is also less because principal is paid back prior to the maturity date of the securities.

7. MONTANA MORTGAGES AND LOANS

The Montana mortgages and loans portfolio is shown below.

<u>Montana Mortgages and Loans</u>	<u>2004</u> <u>Book Value</u>	<u>2003</u> <u>Book Value</u>
<b>Multifamily Commercial Loans</b>	<b>\$ 4,105,800</b>	<b>\$ 10,173,421</b>
<b>Residential Mortgages</b>	<b>119,513,572</b>	<b>195,687,788</b>
Science and Technology Alliance <sup>(1)</sup>	13,959,035	14,287,541
Department of Natural Resources <sup>(2)</sup>	44,546,088	46,366,904

Montana Facility Finance	943,904	1,543,021
Local Government Infrastructure	8,298,805	9,050,975
Value-added Loans	9,202,821	6,854,640
Department of Revenue <sup>(3)</sup>	5,698,442	0
Commercial Loans	<u>137,175,547</u>	<u>156,815,490</u>
<b>Permanent Coal Trust Loans</b>	<b>221,861,642</b>	<b>236,820,571</b>
<b>Total Montana Mortgages and Loans</b>	<b>\$ <u>345,481,014</u></b>	<b>\$ <u>442,681,780</u></b>

(1) The Montana Science and Technology Alliance (MSTA) loans include funding for research and development, mezzanine and seed capital loans.

(2) In accordance with Senate Bill 495 enacted by the 2001 Legislature, the Coal Severance Tax Permanent Trust loaned 483,604 TFBP shares, with a book value of \$46,366,904, to the Department of Natural Resources, Trust and Legacy fund on July 2, 2001. The loan proceeds were deposited in the Trust and Legacy Fund. A loan receivable was recorded in the Coal Severance Tax Permanent Trust and a corresponding liability was recorded in the Guarantee Fund, a General Fund sub-fund. The August 2002 Special Legislative Session approved the request to record this activity in a state special revenue fund of the Office of Public Instruction rather than in the Guarantee Fund. On June 30, 2004, the Trust and Legacy Fund paid \$1,820,816 to the Coal Severance Tax Permanent Trust reducing the TFBP shares on loan to 464,613 with a corresponding book value of \$44,546,088.

(3) On August 26, 2004, the Board voted to increase the Department of Revenue loan commitment to \$17 million. This loan provides funding for the Department of Revenue's POINTS Computer System replacement project, IRIS.

## 8. DEUTSCHE BANK SECURITIES, INC. COMPLAINT

The Board received a summons and complaint, dated September 3, 2002, regarding the sale of a Pennzoil Quaker State, \$2 million par, 6.75% corporate bond maturing April 1, 2009. Deutsche Bank Securities claims a "breach of contract" for the March 25, 2002 sale of the bond at a price of \$94.669 plus accrued interest. Deutsche Bank Securities seeks damages of \$215,453 for the additional costs incurred to acquire the bond from third parties, plus any statutory interest, costs and expenses. On October 1, 2002, Shell Oil Company acquired Pennzoil and subsequently announced a public tender of Pennzoil Quaker State debt. The Board tendered the Pennzoil Quaker State holdings on October 8, 2002 at a price of \$113.099. The tender was accepted with a settlement date of November 1, 2002. On November 4, 2002, the Board received \$2,273,230 in principal and interest plus \$60,000 as a consent fee. As of November 15, 2004, this matter is still pending.

## 9. LOAN GUARANTEES

As of June 30, 2004, loan guarantees provided by the Coal Severance Tax Permanent Trust to the Enterprise Fund and the Montana Facility Finance Authority, totaled \$126,787,072. Board of Investment exposure to bond issues of the Enterprise Fund was \$92,052,796 while exposure to bond issues and surety bonds of the Facility Finance Authority was \$34,734,276.

As of June 30, 2003, loan guarantees provided by the Coal Severance Tax Permanent Trust to the Enterprise Fund and the Montana Facility Finance Authority total \$110,596,691. Board of Investment exposure to bond issues of the Enterprise Fund is \$74,478,374 while exposure to bond issues and surety bonds of the Facility Finance Authority is \$36,118,317.

## LEGISLATIVE AUDIT DIVISION

Scott A. Seacat, Legislative Auditor  
John W. Northey, Legal Counsel

Deputy Legislative Auditors:  
Jim Pellegrini, Performance Audit  
Tori Hunthausen, IS Audit & Operations  
James Gillett, Financial-Compliance Audit

### INDEPENDENT AUDITOR'S REPORT

To the Members of the  
Montana Board of Investments:

We have audited the accompanying Statement of Net Assets of the Enterprise Fund of the state of Montana Board of Investments as of June 30, 2004, and 2003, and the related Statement of Revenues, Expenses, and Changes in Fund Net Assets and Statement of Cash Flows for the fiscal years then ended. These financial statements are the responsibility of the Board of Investments' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in note 1, the financial statements present only the Enterprise Fund of the Montana Board of Investments and are not intended to present fairly the financial position of the state of Montana as of June 30, 2004, and 2003, and the results of the operations and cash flows for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the state of Montana Board of Investments' Enterprise Fund as of June 30, 2004, and 2003, and the results of its operations and cash flows of its Enterprise Fund for the fiscal years then ended in conformity with accounting principles generally accepted in the United States of America.

The other data included in this report was not audited by us, and accordingly, we express no opinion on such data.

Respectfully submitted,

*(Signature on File)*

James Gillett, CPA  
Deputy Legislative Auditor

November 15, 2004

STATE OF MONTANA BOARD OF INVESTMENTS ENTERPRISE FUND

NOTES TO FINANCIAL STATEMENTS  
FOR THE FISCAL YEARS ENDED JUNE 30, 2004 AND JUNE 30, 2003

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Basis of Accounting

The Board uses the accrual basis of accounting for the Enterprise Fund. Under the accrual basis of accounting, expenses are recorded when incurred and revenues are recorded when earned. The financial statements are prepared from the Statewide Accounting, Budgeting, and Human Resource System (SABHRS) and information contained in the bond trustee statements. The statements include the financial activity administered by the Board in the Enterprise Fund.

b. Presentation of Programs

The Board uses the Enterprise Fund to account for its programs created under the Economic Development Bond Act and the Municipal Finance Consolidation Act.

Economic Development Bond Act programs include:

- The Industrial Development Bond Program (IDB) provides access to limited economic development projects through the issuance of conduit debt.
- The Conservation Reserve Enhancement Program (CRP), created in 1990 by issuing bonds, allows farmers to receive a lump sum payment by assigning their federal CRP contract to the Board. The farmers under contract must comply with seeding and other requirements. The Conservation Reserve Enhancement Program is funded by the Montana Trust Funds Bond Pool.
- The Family Friendly Business Loan Program provides zero interest loans to qualified business owners who hire participants of the Families Achieving Independence in Montana (FAIM) employment and training component.

Municipal Finance Consolidation Act programs include:

- The INTERCAP loan program provides funds to eligible Montana governments to finance capital expenditures for up to ten years.
- The Irrigation District Pooled Loan Program provided funds for the Board to purchase the refunding bonds from participating irrigation districts for the purpose of prepaying the U.S. Department of Interior, Bureau of Reclamation Projects Loans.
- The School District Pooled Refunding Program provided funds for the Board to purchase the general obligation refunding bonds of participating Montana School Districts.

c. Fixed Asset Depreciation

The equipment fixed assets recorded in the Enterprise Fund are depreciated on a straight-line basis, with salvage value, in accordance with state policy.

d. Receivables

The Enterprise Fund notes/loans receivables of \$64,962,608 as of June 30, 2004, and \$61,717,146, previously stated as \$61,771,266 as of June 30, 2003, represent loans made to Montana businesses, state and local governments. The Enterprise Fund notes/loans are classified in three categories as follows:

- 1) Notes/loans receivable from local governments and Montana businesses
- 2) Interfund notes/loans receivable from state agency governments
- 3) Component Unit notes/loans receivable from certain state agencies and university units for which the State is financially accountable.

As of June 30, 2004 and 2003, there were no uncollectible account balances. However, in November 2003, the Enterprise Fund wrote off a loan principal balance of \$10,791 for the Rosebud Food and Fuel loan. The Family Friendly Business Loan Program funded \$27,000 for this loan in June 1999.

The InterFund notes/loans receivable as of June 30, 2004 and 2003 includes \$168,868 and \$149,686, respectively, in interest accruals from state agencies and university units.

**e. Capitalized Cost of Issue**

The Enterprise Fund capitalized cost of issue asset of \$1,506,489 and \$1,220,532 as of June 30, 2004 and June 30, 2003, respectively, represents paid bond issuance costs which have been capitalized and are being amortized, using the straight-line method, over the life of the bond.

**f. Cash and Cash Equivalents**

For purposes of the Statement of Cash Flows, the Enterprise Fund considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. Cash and cash equivalents, as identified in the Statement of Net Assets, are as follows:

	<u>June 30, 2004</u>	<u>June 30, 2003</u>
Cash in Treasury	24,756	13,726
Cash with Fiscal Agent (Note 9)	2,490,280	2,297,689
Short Term Investment Pool (STIP)	186,263	142,680
First American treasury obligation class D corporate trust fund	<u>4,833,409</u>	<u>8,362,981</u>
	<u>7,534,708</u>	<u>10,817,077</u>

The Enterprise Fund invests its excess cash in the Board's Short Term Investment Pool, STIP, an external investment pool. An external investment pool commingles the moneys of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio. STIP participants include both state agencies and local governments. By meeting certain conditions, STIP, as a 2a7-like pool, is allowed to use amortized cost rather than fair value to report net assets to compute unit values.

**g. Restricted Net Assets**

The Statement of Net Assets for the Enterprise Fund reports restricted assets. Net assets are reported as restricted when constraints placed on net asset use are either:

- a. Externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments.
- b. Imposed by law through constitutional provisions or enabling legislation.

The net assets of all Enterprise Fund programs with the exception of MEDB (Montana Economic Development Bonds) Guarantee Fund Account, MEDB Guarantee CRP Note Reserve, MEDB Contingency Account, MEDB Family Friendly Account and CRP are restricted under bond indentures governing the use of these funds.

**2. INVESTMENTS**

The deposits and investments in the Enterprise Fund are restricted by the bond trust indentures to the following: government and agency obligations, certificates of deposits, repurchase agreements, and investment agreements. Deposits and investments must be made with Montana banks or in the Short Term Investment Pool (STIP) administered by the Board. The deposits and investments are combined on the Board's financial statements.

Investments are presented in the Statement of Net Assets at fair value. Investment fair values for publicly traded securities are determined primarily by reference to market prices supplied to the Board's trustee. Amortized cost, or carrying value, represents the original cost, adjusted for premium and discount amortization where applicable. Premiums and discounts are amortized/accreted using the straight-line method to the maturity date of the securities.

The Board's investments in the Enterprise Fund are classified on the next page as to credit risk by Category 1, which includes investments that are insured or registered, or securities held by the Board or its agent in the Board's name.

<b>Risk as of June 30, 2004</b>			
<b>Long-Term Investments</b>			
<u>Investment Type</u>	<u>Category 1</u>	<u>Carrying Value</u>	<u>Fair Value</u>

Securites Lending Collateral Investment Pool	\$ <u>0</u>	\$ <u>0</u>	\$ <u>0</u>

There were no derivative transactions during the above fiscal years for investments held by the trustee.

### 3. SECURITY LENDING

The Enterprise Fund is a participant in the Board's Short Term Investment Pool (STIP).

Under the provisions of state statutes, the Board has, via a Securities Lending Authorization Agreement, authorized the custodial bank, State Street Bank and Trust, to lend the Board's STIP securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. During the period the securities are on loan, the Board receives a fee and the custodial bank must initially receive collateral equal to 102 percent of the fair value of the loaned securities and maintain collateral equal to not less than 100 percent of the fair value of the loaned security. The Board retains all rights and risks of ownership during the loan period.

During fiscal years 2004 and 2003, State Street loaned, on behalf of the Board, certain STIP securities held by State Street, as custodian, and received US dollar currency cash, US government securities, and irrevocable bank letters of credit as collateral. State Street does not have the ability to pledge or sell collateral securities unless the borrower defaults.

The Board did not impose any restrictions during fiscal years 2004 and 2003 on the amount of the loans that State Street made on its behalf. There were no failures by any borrowers to return loaned securities or pay distributions thereon during fiscal years 2004 and 2003. Moreover, there were no losses during fiscal years 2004 and 2003 resulting from a default of the borrowers or State Street.

During fiscal years 2004 and 2003, the Board and the borrowers maintained the right to terminate all securities lending transactions on demand. The cash collateral received on each loan was invested, together with the cash collateral of other qualified plan lenders, in a collective investment pool, the Securities Lending Quality Trust. The relationship between the average maturities of the investment pool and the Board's loans was affected by the maturities of the loans made by other plan entities that invested cash collateral in the collective investment pool, which the Board could not determine.

**4. BONDS PAYABLE**

**Long-Term Bonds Payable**

**Economic Development Bonds (EDB) and Municipal Finance Consolidation Act Bonds (MFCAB)**

These bonds are issued under the Economic Development Bond Act, and the Municipal Finance Consolidation Act, for the purpose of assisting Montana's small businesses and local governments in obtaining low cost financing. Outstanding obligations are listed as follows (in thousands):

**Bonds Payable as of June 30, 2004**

<u>Program</u>	<u>Series</u>	<u>Amount Issued</u>	<u>Interest Range %</u>	<u>Principal Payments</u>		<u>Balance June 30, 2004</u>
				<u>FY 2005</u>	<u>@ Maturity</u>	
Municipal Finance Consolidation Act Bonds (Irrigation Program) (1)	1988	4,976	6.60-7.75	325	130 (2014)	1,205

Conservation Reserve Enhancement Program (CRP Bonds) (2)		<u>6,977</u>	6.00-8.00	<u>1,270</u>	30 (2011)	<u>6,977</u>
<b>Total Bonds Payable</b>		<u><b>\$ 18,187</b></u>		<u><b>\$ 2,077</b></u>		<u><b>\$ 9,265</b></u>
Less Current Portion (FY2003 Principal Payments)						<u>(2,077)</u>
<b>Total Long-Term Bonds Payable</b>						<u><b>\$ 7,188</b></u>

(1) The Board issued these bonds to provide funds to purchase the Refunding Bonds of participating Irrigation Districts for the purpose of prepaying the U.S. Department of Interior, Bureau of Reclamation Projects Loans. The Irrigation Bonds and the interest thereon are payable solely from the collection of a special tax or assessment which is a lien against real property in the Irrigation District. While the Irrigation Bonds are not obligations of the State of Montana, the bonds are limited obligations of the Board due to an irrevocable pledge to lend money for deposit by the Trustee of the Irrigation District Pooled Loan Program Reserve Account E in an amount equal to any deficiencies therein on any payment date. The Indenture does not permit the issuance of additional bonds.

(2) The Conservation Reserve Enhancement Program is funded by the Montana Trust Funds Bond Pool.

(3) The Board issued these bonds to provide funds to purchase the general obligation refunding bonds of participating Montana School Districts. The School District Refunding Bonds and the interest thereon are payable from real property taxes levied within the school district. The 1991 Bonds are limited obligations of the Board, and are not a debt or liability of the State of Montana, and neither the faith and credit nor the taxing power of the state is pledged to the payment of principal of or interest on the bonds.

**Future debt service (principal and interest) as of June 30, 2004 is listed below (in thousands):**

	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010+</u>	<u>Total</u>
\$	2,109	\$ 1,542	\$ 1,410	\$ 1,391	\$ 536	\$ 675	\$ 7,663

**Future debt service (principal and interest) as of June 30, 2003 is listed below (in thousands):**

	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009+</u>	<u>Total</u>
\$	2,680	\$ 2,352	\$ 1,785	\$ 1,648	\$ 1,629	\$ 1,544	\$ 11,638

**Current Bonds Payable**

The Enterprise Fund is authorized to issue INTERCAP bonds under the Municipal Finance Consolidation Act. These bonds may not aggregate more than \$120 million as amended by the 2003 Legislature. Previously, INTERCAP bonds may not aggregate more than \$80 million through June 30, 2011 and then \$75 million thereafter. The INTERCAP bonds provide funds for the Board to make loans to eligible government units. The bonds are not a debt or liability of the State of Montana. The bonds are limited obligations of the Board payable solely from: a) repayments of principal and interest on loans made by the Board to participating eligible Montana governments; b) investment income under the indenture; and c) an irrevocable pledge by the Board. The Board has no taxing power. These bonds may be redeemed, at the bondholder's option, any March 1, prior to maturity. The Board did not enter into an arms-length financing agreement to convert the bonds "put", but not resold into some other form of long-term obligation. Accordingly, these bonds, considered demand bonds, are recorded as current liabilities of the Enterprise Fund.

**The INTERCAP obligations at June 30, 2004 and June 30, 2003, are listed below (in thousands):**

<u>Series</u>	<u>Amount Issued</u>	<u>Interest Range</u>	<u>Maturity</u>	<u>Balance June 30, 2004</u>	<u>Balance June 30, 2003</u>
1992	6,500	Variable	2005	6,055	6,075

				<b><u>92,227</u></b>	<b><u>74,267</u></b>

## 5. OTHER DEBT

### Conduit Debt

In this program, the Board is authorized to issue stand-alone industrial revenue bonds, under the Economic Development Act, as conduit (no commitment) debt. Assets and revenues of the borrower are pledged to repay the bonds. Because the Board has no obligation for this debt, these bond issues are not reflected on the Board's financial statements. Bonds issued by the Board as conduit (no-commitment) debt are listed below (in thousands):

#### Conduit Debt

<u>Project</u>	<u>Issue Date</u>	<u>Maturity Date</u>	<u>Amount Issued</u>	Balance	Balance
				<u>June 30, 2004</u>	<u>June 30, 2003</u>
MT Cenex (Farmers Union)	August 1985	09/01/10	\$ 3,925	0	3,925
Colstrip	October 1989	12/30/15	60,800	55,300	57,300
Yellowstone Energy (BGI)	July 1993	12/31/19	118,345	116,945	117,345
Stillwater Mining	July 2000	07/01/20	30,000	30,000	30,000
Gainey Foundation	October 2002	09/01/14	<u>6,000</u>	<u>5,570</u>	<u>6,000</u>
Total conduit debt			<u>\$ 219,070</u>	<u>\$ 207,815</u>	<u>\$ 214,570</u>

In this program, the Board is authorized to issue Qualified Zone Academy Bonds (QZAB), under the Municipal Finance Consolidation Act, as conduit (no commitment) debt. The revenues, and in some cases the taxing power, of the borrower are pledged to repay the bonds. Because the Board has no obligation for this debt, these bond issues are not reflected on the Board's financial statements. Bonds issued by the Board as conduit (no-commitment) debt are listed below (in thousands):

#### QZAB Debt

<u>Project</u>	<u>Issue Date</u>	<u>Maturity Date</u>	<u>Amount Issued</u>	Balance	Balance
				<u>June 30, 2004</u>	<u>June 30, 2003</u>
Huntley Project K-12 Schools	December 2000	07/01/13	\$ 750	\$ 750	\$ 750
Bozeman Public Schools	November 2003	11/25/12	1,586	1,586	0
Phillipsburg Schools	December 2003	12/10/17	<u>2,000</u>	<u>2,000</u>	<u>0</u>
Total conduit debt			<u>\$ 4,336</u>	<u>\$ 4,336</u>	<u>\$ 750</u>

## 6. TRANSFERS OUT

In fiscal year 2003, the Enterprise Fund transferred \$297,266 to the Board of Investment's Investment account. No transfers were made to the Board of Investment's Investment account in fiscal year 2004.

## 7. INTERCAP PROGRAM LOAN COMMITMENTS

The Board makes firm commitments to fund loans from the INTERCAP loan program. As of June 30, 2004 and 2003, respectively, the Board committed to make loans to eligible Montana governments totaling \$37,068,745 and \$20,170,082.

## 8. NET ASSETS

Net Assets represents the accumulated net profits of the Enterprise Fund programs. The Net Assets for fiscal years ended June 30, 2004 and June 30, 2003 include (\$41,971) and \$192,823, respectively, in unrealized appreciation/depreciation in reporting the fair value of the Enterprise Fund investments.

## 9. RESTATEMENT

The Board implemented the provisions of the state's Management Memo 02-04-12 Accounting for INTERCAP Loans Provided to State Agencies (Including Higher Education Units) effective July 1, 2003. In implementing this Management Memo, the Notes/Loans Receivable as of June 30, 2003 were reclassified to reflect current year payments rather than note maturities. The financial statements for the year ended June 30, 2003 have been restated, for these changes, to compare with the financial statements for the year ended June 30, 2004. These restatements are described in the following paragraphs.

In the Statement of Net Assets as of June 30, 2003, the Cash and Cash Equivalents has been restated to reflect a change in Cash with Fiscal Agent. Cash with Fiscal Agent, previously reported as \$2,243,569, is now presented as \$2,297,689 to reflect a loan principal payment of \$54,120 received as of June 30, 2003. The Cash with Fiscal Agent change results in the total Cash and Cash Equivalents, as of June 30, 2003, being restated as \$10,817,077 from \$10,762,957. The Interest Receivable of

**\$900,532 reflects the reclassification of loan interest due from state agencies and university units. Interest Receivable was previously reported as \$1,050,039.
